

ARCHAEOLOGY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age that began with the Renaissance and the great discoveries – a time when people started digging up the past. In 1506 in Rome, with Michelangelo present, the Laocoön Group was unearthed. In the late sixteenth century Antonio Bosio explored the Roman catacombs, the underground cemeteries of the early Christians. In 1581 Vincenzo Galilei published ancient Greek hymns written down with musical notes. In 1667 Nicolaus Steno recognized that "tongue stones" were fossilized shark teeth. Pompeii was destroyed by Vesuvius in 79, and excavations began in 1748 – after 1669 years. Young aristocrats made the Grand Tour, mainly to Italy. Winckelmann described Greek art as "noble simplicity and quiet grandeur." In 1799 soldiers of Napoleon's expedition to Egypt found the Rosetta Stone, bearing the same text in hieroglyphs, demotic script and Greek. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In 1581 Vincenzo Galilei, Galileo's father, published ancient Greek...
 - a) coins from Athens
 - b) laws of Solon
 - c) hymns written down with musical notes
 - d) sailing charts
2. 👁 Which famous ancient sculpture was dug up in Rome in 1506, with Michelangelo present?
 - a) The Discobolus
 - b) The Venus de Milo
 - c) The Winged Victory of Samothrace
 - d) The Laocoön Group
3. 📖 The Rosetta Stone (found in 1799) contains the same text in hieroglyphs, demotic script and...
 - a) Latin
 - b) Hebrew
 - c) Greek
 - d) Arabic
4. 🏰 Pompeii was destroyed by the eruption of Vesuvius in AD 79, and regular excavations began in 1748. How many years passed?

5. ✨ In the 18th century young aristocrats made the "Grand Tour," a long educational journey mainly to...
 - a) Norway
 - b) Italy
 - c) Ireland
 - d) Russia
6. 🧑 The Rosetta Stone was found in 1799 by soldiers of...
 - a) Columbus's expedition
 - b) Napoleon's expedition to Egypt
 - c) the Hanseatic fleet
 - d) the army of John III Sobieski
7. 💖 Johann Joachim Winckelmann described the ideal of Greek art as "noble simplicity and..."
 - a) divine power
 - b) quiet grandeur
 - c) loud joy
 - d) eternal motion
8. 🌿 In 1667 Nicolaus Steno recognized that the "tongue stones" (glossopetrae) found in rocks were...
 - a) unicorn teeth
 - b) fossilized shark teeth
 - c) lightning turned to stone
 - d) dragons' tears
9. ⭐ At the end of the 16th century Antonio Bosio explored the Roman catacombs, which are...
 - a) the sewers of Rome
 - b) wine storage cellars
 - c) secret passages of the popes
 - d) underground cemeteries of the early Christians

PHILOSOPHY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when thinkers asked anew about humanity and the world. In 1516 Thomas More's "Utopia" described an ideal state on an island. In 1620 Francis Bacon advised building knowledge of nature through observation, experiment and induction. As a young man in 1618, Descartes wrote a treatise on music. Later he declared "Cogito, ergo sum" – "I think, therefore I am" – and he saw animal bodies as machines (automata). Blaise Pascal wrote that man is a reed, the weakest in nature, but a thinking reed. Baruch Spinoza identified God with nature: Deus sive Natura. Leibniz stated the principle of sufficient reason – nothing happens without a cause. And in 1748 Montesquieu called for dividing power into legislative, executive and judicial. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 As a young man (1618), Descartes wrote a treatise on...
 - a) music
 - b) growing grapevines
 - c) cartography
 - d) naval warfare
2. 👁 Thomas More's "Utopia" (1516) describes...
 - a) a voyage to India
 - b) an underground city
 - c) paradise on earth after the Flood
 - d) an ideal state on an island
3. 🗨 Descartes's Latin sentence "Cogito, ergo sum" means...
 - a) Pray and work
 - b) Remember that you will die
 - c) I think, therefore I am
 - d) I know that I know nothing
4. ⚖ Leibniz formulated the principle of sufficient reason, according to which nothing happens...
 - a) outside of time
 - b) in a repeatable way
 - c) without human will
 - d) without a cause
5. 🔥 Descartes believed that animal bodies work like...
 - a) flames
 - b) crystals
 - c) plants
 - d) machines (automata)
6. 🏛 In "The Spirit of the Laws" (1748) Montesquieu called for dividing power into legislative, executive and...
 - a) judicial
 - b) military
 - c) royal
 - d) ecclesiastical
7. 💖 Blaise Pascal wrote that man is only a reed, the weakest in nature, but...
 - a) an immortal reed
 - b) a hidden tree
 - c) a thinking reed
 - d) a bird in a cage
8. 🌿 Francis Bacon recommended building knowledge of nature through...
 - a) dreams and visions
 - b) observation, experiment and induction
 - c) reading only Aristotle
 - d) votes among scholars
9. ☆ Baruch Spinoza identified God with...
 - a) the king
 - b) fate
 - c) nature (Deus sive Natura)
 - d) human reason

HISTORY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and the great geographical discoveries. Columbus reached America in 1492, and Magellan set out in 1519 – 27 years later. Thanks to the Columbian exchange, potatoes, corn and tomatoes came to Europe. In 1517 the Reformation was started by Martin Luther, who published his 95 theses. In 1569 Mercator made a map that most enlarges areas lying close to the poles. In the same year the Union of Lublin created the Polish-Lithuanian Commonwealth; it lasted until the Third Partition in 1795, that is 226 years. The hussars were famous for powerful charges with long lances, and at Vienna in 1683 the Christian armies were led by John III Sobieski. In his "Memoirs," Jan Chryzostom Pasek described the life of a nobleman-soldier in the 17th century. In 1791 the Constitution of 3 May was adopted, Europe's first modern written constitution. And in 1797, in Italy, among the Polish Legions, "Dąbrowski's Mazurka" was written. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **"Dąbrowski's Mazurka" was written in 1797...**
 - a) in Vilnius at the university
 - b) in Paris at Napoleon's court
 - c) in Kraków during the insurrection
 - d) in Italy, among the Polish Legions
2. 🗺️ **A Mercator projection map (1569) enlarges most of all...**
 - a) Europe and nothing else
 - b) areas lying close to the poles
 - c) areas on the equator
 - d) the oceans, while shrinking the land
3. 📜 **The Constitution of 3 May (1791) is often called Europe's first...**
 - a) military code
 - b) modern written constitution
 - c) tax law
 - d) trade agreement
4. 🚢 **Columbus reached America in 1492, and Magellan's expedition set out in 1519. How many years passed between these events?**

5. ⚔️ **The Polish winged hussars were famous for...**
 - a) fighting on foot with bows
 - b) attacks from ships
 - c) powerful charges with long lances
 - d) defending fortresses with cannons
6. 🧑 **Who commanded the Christian armies in the victorious Battle of Vienna in 1683?**
 - a) John III Sobieski
 - b) Sigismund III Vasa
 - c) Jan Zamoyski
 - d) Stephen Báthory
7. 💖 **The "Memoirs" of Jan Chryzostom Pasek are a colorful account of...**
 - a) life at the court of Louis XIV
 - b) a merchant's journey to distant China
 - c) the life of a nobleman-soldier in the 17th century
 - d) the sailors on Columbus's expedition
8. 🌿 **Thanks to the "Columbian Exchange," the crops that came from America to Europe included...**
 - a) horses and sheep
 - b) wine and olive oil
 - c) wheat, rye and oats
 - d) potatoes, corn and tomatoes
9. ⭐ **The Reformation began in 1517 when the 95 Theses were published by...**
 - a) Henry VIII
 - b) Martin Luther
 - c) Erasmus of Rotterdam
 - d) John Calvin

LINGUISTICS

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when national languages were gaining strength. In 1501 the Venetian printer Aldus Manutius introduced a slanted typeface called italic type. Mikołaj Rej argued that Poles are no geese, for they have their own language. In 1564 Jan Mączyński published the first great dictionary of Latin and Polish. The melodies for Kochanowski's "Psalter of David" were composed by Mikołaj Gomółka. In 1599 the Bible of Father Jakub Wujek appeared – a Catholic Polish translation of Scripture. From 1660 to 1669 Samuel Pepys kept a diary, writing it in shorthand. French became the language of diplomacy in the seventeenth and eighteenth centuries. In 1753 Linnaeus popularized naming that is two-part (genus + species) and in Latin. And around 1760 the Abbé de l'Épée founded a school in Paris for deaf people, taught in sign language. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 Who composed the melodies for Jan Kochanowski's "Psalter of David" (1580)?
 - a) Wacław of Szamotuły
 - b) Stanisław Moniuszko
 - c) Mikołaj Gomółka
 - d) Frédéric Chopin
2. 👁 In 1501 the Venetian printer Aldus Manutius introduced a new slanted typeface called...
 - a) italic type
 - b) Cyrillic
 - c) Fraktur
 - d) Roman antiqua
3. 🗨 Mikołaj Rej wrote, urging Poles to write in Polish: "Let other nations know that Poles are not geese, that..."
 - a) they know Latin
 - b) they have their own language
 - c) they fight well
 - d) they read a lot
4. 📖 In 1564 Jan Mączyński published the first great dictionary of...
 - a) German and English
 - b) Hebrew and Greek
 - c) Latin and Polish
 - d) Polish and Chinese
5. 👂 Around 1760 the Abbé Charles-Michel de l'Épée founded in Paris the first free school for...
 - a) deaf people, taught in sign language
 - b) blind people
 - c) sailors
 - d) war orphans
6. 🌐 In the 17th–18th centuries the language of European diplomacy became...
 - a) French
 - b) Spanish
 - c) Dutch
 - d) Polish
7. 💖 In 1660–1669 Samuel Pepys kept a personal diary, writing it...
 - a) only in drawings
 - b) in Chinese
 - c) on clay tablets
 - d) in shorthand
8. 🌿 In 1753 Carl Linnaeus popularized a naming system that was...
 - a) two-part (genus + species) and in Latin
 - b) based on numbers
 - c) based on colors
 - d) made of three-letter codes
9. ⭐ The Bible translated by Fr. Jakub Wujek (1599) is...
 - a) a collection of Luther's sermons
 - b) the first Polish-Latin dictionary
 - c) an Orthodox prayer book
 - d) a Catholic Polish translation of Scripture

LITERARY STUDIES

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, a time of great writers. In 1580 Jan Kochanowski published his "Laments" after the death of his daughter Urszula, and Michel de Montaigne published his "Essays," becoming the creator of the essay. Around 1595 William Shakespeare wrote "Romeo and Juliet," and in his play Hamlet speaks the monologue "To be or not to be." Shakespeare also wrote sonnets – a classic sonnet has 14 lines. Cervantes's Don Quixote fought windmills he mistook for giants. In 1607 Claudio Monteverdi composed the opera "Orfeo." In 1667 John Milton told in "Paradise Lost" of Satan's rebellion and the fall of the first humans. In 1719 Daniel Defoe created Robinson Crusoe, a lone castaway on a desert island, and Swift's Gulliver first reached Lilliput. The heroes of Krasicki's "Fables" are very often animals. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 Who composed the opera "L'Orfeo" (1607), based on a Greek myth?
 - a) George Frideric Handel
 - b) Antonio Vivaldi
 - c) Claudio Monteverdi
 - d) Johann Sebastian Bach
2. 👁️ Don Quixote, Cervantes's hero, famously fought...
 - a) a dragon in a cave
 - b) pirates from Tunis
 - c) the king of Spain
 - d) windmills he mistook for giants
3. 📖 Who wrote the "Laments" (Treny), written after the death of his daughter Urszula?
 - a) Mikołaj Rej
 - b) Andrzej Frycz Modrzewski
 - c) Jan Kochanowski
 - d) Piotr Skarga
4. ➡️ How many lines does a classic sonnet have?

5. ⚔️ What is the name of the hero of Daniel Defoe's novel (1719) who survived many years alone on a desert island?
 - a) Tom Jones
 - b) Gulliver
 - c) Candide
 - d) Robinson Crusoe
6. 🧑 In Jonathan Swift's novel, Gulliver first arrives in a land of tiny people called...
 - a) Lilliput
 - b) El Dorado
 - c) Utopia
 - d) Atlantis
7. 💖 Michel de Montaigne, author of the "Essays," created which literary genre?
 - a) Reportage
 - b) The historical novel
 - c) The essay
 - d) The sonnet
8. 🌿 The characters in Ignacy Krasicki's "Fables" are very often...
 - a) machines
 - b) saints
 - c) animals
 - d) Polish kings
9. ☆ John Milton's poem "Paradise Lost" (1667) tells of...
 - a) the discovery of America by Columbus
 - b) a pilgrim's journey to India
 - c) Satan's rebellion and the fall of the first humans
 - d) the long siege and fall of Troy

CULTURE AND RELIGION

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and Baroque, full of masterpieces and spiritual change. Leonardo da Vinci painted the "Mona Lisa," and his "Vitruvian Man" shows the ideal proportions of the human body. From 1508 to 1512 Michelangelo painted the frescoes on the ceiling of the Sistine Chapel. The Church's answer to the Protestant Reformation was the Council of Trent, which met from 1545 to 1563, that is 18 years. In 1548 the "Spiritual Exercises" of St. Ignatius of Loyola, with the daily examen, were approved. St. Teresa of Ávila described the path of prayer in "The Interior Castle." In 1573 the Warsaw Confederation guaranteed peace between faiths (religious tolerance). In 1655 Jasna Góra held out against the Swedes. At balls people danced the polonaise, Poland's national dance. In gardens such as Versailles, trees were trimmed into geometric shapes. And Johann Sebastian Bach was cantor of St. Thomas Church in Leipzig for 27 years. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏴 For 27 years Johann Sebastian Bach was cantor of St. Thomas Church in...
 - a) Leipzig
 - b) Paris
 - c) Vienna
 - d) Salzburg
2. 👁 Who painted the "Mona Lisa"?
 - a) Raphael
 - b) Titian
 - c) Albrecht Dürer
 - d) Leonardo da Vinci
3. 🗨 The Council of Trent (1545–1563) was above all the Catholic Church's response to...
 - a) the Protestant Reformation
 - b) the invention of printing
 - c) the discovery of America
 - d) Turkish invasions
4. 📅 The Council of Trent met from 1545 to 1563. How many years passed from its opening to its closing?

5. ✂ What does Leonardo da Vinci's drawing "Vitruvian Man" show?
 - a) A flying machine
 - b) The ideal proportions of the human body
 - c) The structure of the heart
 - d) A plan of the city of Florence
6. 🤝 The Warsaw Confederation of 1573 guaranteed...
 - a) an alliance with France
 - b) election of the king by the pope
 - c) a ban on trade with Turkey
 - d) peace between faiths (religious tolerance)
7. 💖 Who wrote the "Spiritual Exercises," which include a daily examination of conscience (the examen)?
 - a) St. Francis of Assisi
 - b) St. Thomas Aquinas
 - c) St. Ignatius of Loyola
 - d) Martin Luther
8. 🌿 In Baroque French gardens, such as at Versailles, shrubs and trees were...
 - a) left completely wild
 - b) trimmed into geometric shapes
 - c) planted only in pots
 - d) replaced with statues
9. ⭐ In 1655, during "the Deluge," the monastery of Jasna Góra successfully held out against...
 - a) the Tatars
 - b) the Teutonic Knights
 - c) the Turks
 - d) the Swedes

ECONOMICS AND FINANCE

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when trade wrapped around the whole world. The Portuguese and the Dutch fought over the Moluccas, known as the Spice Islands. The Spanish mined silver in the Cerro Rico mountain at Potosí, in today's Bolivia. Raftsmen floated Polish grain down the Vistula mainly to Gdańsk. In 1526 Copernicus described the law by which bad money drives good money out of circulation. John Calvin preached predestination – that God destines people for salvation. In 1602 the Dutch East India Company was founded, and it sold its shares to anyone who wanted them. The Dutch "tulip mania" is an example of a speculative bubble. In 1637 Venice opened a public opera house that anyone who bought a ticket could get into. And Benjamin Franklin advised a young tradesman to remember that time is money. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎫 In 1637 the first public opera house opened in Venice. What was new was that...
 - a) anyone who bought a ticket could get in
 - b) only princes were admitted
 - c) operas were performed without singing
 - d) it played only church music
2. 👁 The Moluccas in Indonesia, fought over by the Portuguese and the Dutch, were called...
 - a) the Silver Islands
 - b) the Tulip Islands
 - c) the Coffee Islands
 - d) the Spice Islands
3. 🗨 The Copernicus-Gresham law says that bad money...
 - a) raises the price of bread
 - b) always loses its value
 - c) drives good money out of circulation
 - d) cannot exist
4. 📊 The "tulip mania" in Holland (1636–1637) is an example of...
 - a) a crop failure
 - b) a well-planned reform
 - c) a trade war with England
 - d) a speculative bubble
5. 🚢 Rafters floated Polish grain down the Vistula mainly to...
 - a) Vienna
 - b) Kraków
 - c) Gdańsk
 - d) Lviv
6. 🌐 The Dutch East India Company (VOC, 1602) was one of the first companies in the world that...
 - a) paid no taxes at all
 - b) sold its shares to anyone who wanted them
 - c) belonged to a single man
 - d) traded only in grain
7. 💖 In 1748 Benjamin Franklin advised a young tradesman to remember that time is...
 - a) a gift of fate
 - b) an enemy
 - c) money
 - d) an illusion
8. 🌿 The Spanish mined huge amounts of silver from the mountain Cerro Rico in...
 - a) California
 - b) Mexico
 - c) Brazil
 - d) Potosí (today's Bolivia)
9. ⭐ John Calvin taught the doctrine of predestination, meaning...
 - a) that God destines people for salvation
 - b) the duty to go on pilgrimage
 - c) the transmigration of souls
 - d) a ban on working on Sunday

PSYCHOLOGY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when scholars began to study the human mind. In 1621 Robert Burton published "The Anatomy of Melancholy," a work about sadness and depression. Vanitas paintings with a skull and an hourglass reminded viewers of the vanity and transience of life. In his "Meditations" Descartes used the method of doubting everything that is uncertain, and he placed the meeting point of soul and body in the brain's pineal gland. In 1651 Thomas Hobbes wrote in "Leviathan" that the state of nature is a war of all against all. The Baroque theory of affects held that music should arouse specific emotions in listeners. Christian Wolff popularized the word "psychology" – the study of the soul (psyche). In 1775 Lavater claimed that people's character could be read from their facial features. And Franz Mesmer treated patients with "animal magnetism," that is sessions that put them into a trance. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The Baroque "doctrine of the affections" held that music should...
 - a) arouse specific emotions in listeners
 - b) serve only for dancing
 - c) be quiet and without melody
 - d) imitate only birds
2. 👁 Johann Lavater's physiognomy (1775) claimed that a person's character could be read from...
 - a) their height
 - b) their fingerprints
 - c) their facial features
 - d) the color of their eyes
3. 📖 In the 18th century Christian Wolff popularized the word "psychology," meaning the study of...
 - a) law
 - b) the stars
 - c) the soul (psyche)
 - d) plants
4. 🧠 Descartes located the point where the soul joins the body in...
 - a) the brain's pineal gland
 - b) the heart
 - c) the liver
 - d) the lungs
5. ✨ In the 1770s Franz Mesmer treated patients with "animal magnetism," which meant...
 - a) sessions that put them into a trance
 - b) massage with ice and snow
 - c) a diet made up of fish
 - d) gymnastics on horseback
6. 🧑 In "Leviathan" (1651) Thomas Hobbes wrote that in the state of nature there is...
 - a) a war of all against all
 - b) learning without schools
 - c) trade without borders
 - d) eternal peace
7. 💖 In his "Meditations" Descartes used a method of...
 - a) doubting everything that is uncertain
 - b) drawing answers by lot
 - c) writing under the influence of dreams
 - d) learning by heart
8. 🍃 Robert Burton's "The Anatomy of Melancholy" (1621) is a vast work about...
 - a) sadness and depression
 - b) the anatomy of frogs
 - c) treating teeth
 - d) types of clouds
9. ☆ The "vanitas" motif in Baroque painting (a skull, an hourglass, a snuffed candle) was a reminder of...
 - a) the wealth of merchants
 - b) years of good harvests
 - c) the vanity and transience of life
 - d) military victories

EDUCATION

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when people rethought what school should be. In 1599 the "Ratio studiorum" was issued, the curriculum of Jesuit schools. In 1658 John Amos Comenius published "Orbis pictus," an illustrated textbook for children. John Locke compared a child's mind to a tabula rasa – a blank slate written on by experience. In "Emile" of 1762, Jean-Jacques Rousseau recommended upbringing close to nature, through experience; he was also the composer of the opera "The Village Soothsayer." In 1773 the Commission of National Education was founded, seen as the first ministry of education in Europe. It introduced teaching in Polish instead of Latin, as well as physical exercise and active games. From its founding to the Constitution of 3 May in 1791, 18 years passed. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Jean-Jacques Rousseau, author of "Emile," a book on education, was also...**
 - a) a court conductor in Vienna
 - b) a famous opera tenor in Paris
 - c) an organ builder in Geneva
 - d) the composer of the opera "The Village Soothsayer"
2. 📖 **John Amos Comenius's "Orbis Pictus" (1658) is...**
 - a) an atlas of the sky
 - b) an illustrated textbook for children
 - c) a collection of sermons
 - d) a map of the world
3. 🗉 **The Commission of National Education (1773) introduced school teaching in...**
 - a) Latin only
 - b) French
 - c) Polish instead of Latin
 - d) German
4. 📜 **The Commission of National Education was founded in 1773. How many years later was the Constitution of 3 May (1791) passed?**

5. 🎖️ **The Commission of National Education also added to the school curriculum...**
 - a) riding lessons for everyone
 - b) military service for pupils
 - c) physical exercise and active games
 - d) work in the mines
6. 🎓 **The Polish Commission of National Education is considered...**
 - a) the first university in Poland
 - b) a teaching religious order
 - c) a school for knights
 - d) the first ministry of education in Europe
7. 💖 **John Locke compared a child's mind to a "tabula rasa," meaning...**
 - a) a blank slate written on by experience
 - b) an unchangeable stone
 - c) an empty wine jar
 - d) a closed book
8. 🌿 **In "Emile" (1762) Rousseau recommended raising children...**
 - a) only from books in a library
 - b) close to nature, through experience
 - c) in a closed monastery
 - d) in a big city at court
9. ⭐ **The "Ratio Studiorum" (1599) was the curriculum of...**
 - a) universities in China
 - b) Benedictine schools
 - c) secular schools in England
 - d) Jesuit schools

SOCIOLOGY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to a world of nobles, townspeople and peasants. In 1555 the Peace of Augsburg set the principle "cuius regio, eius religio": subjects follow their ruler's religion. In the Commonwealth, Sarmatism reigned – a noble ideology of descent from the Sarmatians. A nobleman in a portrait wore a kontusz robe over a żupan tunic. Free election meant the king was chosen by all the nobility gathered on the election field, and the liberum veto meant a single deputy could break up a session of the Sejm. Serf labor grew over time, even to several days of work a week. In 1665–1666 London suffered the Great Plague – an epidemic of bubonic plague. In the eighteenth century Paris salons run by women hosted discussions of literature, philosophy and politics. And in 1792 Franciszek Karpiński wrote the carol "Bóg się rodzi" (God Is Born). Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The words of the Christmas carol "God Is Born" (Bóg się rodzi, 1792) were written by...
 - a) Jan Kochanowski
 - b) Adam Mickiewicz
 - c) Franciszek Karpiński
 - d) Ignacy Krasicki
2. 👁 In Sarmatian portraits, a Polish nobleman most often wore...
 - a) a wig and tailcoat
 - b) a kontusz robe over a żupan tunic
 - c) plate armor
 - d) a Roman toga
3. 🗨 Sarmatism was...
 - a) a noble ideology of descent from the Sarmatians
 - b) the name of a war with Russia
 - c) a style of Gothic architecture
 - d) a genre of music
4. 🗳 In the Polish-Lithuanian Commonwealth, the liberum veto meant that...
 - a) peasants could elect deputies
 - b) a single deputy could break up a session of the Sejm
 - c) the king could dissolve the Sejm
 - d) the Sejm sat without a break
5. 🗡 Over time, serf labor duty (pańszczyzna) in 16th–18th-century Poland...
 - a) grew, even to several days of work a week
 - b) was paid in gold
 - c) disappeared completely
 - d) applied only to townspeople
6. 🗳 Free election in the Polish-Lithuanian Commonwealth meant that the king was chosen by...
 - a) all the nobility gathered on the election field
 - b) a council of the kingdom's bishops
 - c) the townspeople
 - d) the previous king
7. 💖 Literary salons run by women in 18th-century Paris served for...
 - a) lessons in riding and fencing
 - b) card games played for money
 - c) discussions of literature, philosophy and politics
 - d) trading in expensive silk fabrics
8. 🍃 The Great Plague of London in 1665–1666 was an epidemic of...
 - a) chickenpox
 - b) cholera
 - c) influenza
 - d) bubonic plague
9. ☆ The principle "cuius regio, eius religio" (Peace of Augsburg, 1555) meant that...
 - a) subjects follow their ruler's religion
 - b) religion is forbidden
 - c) everyone chooses their own religion
 - d) the pope chooses rulers

LAW

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when modern law was being born. In 1609 Hugo Grotius argued in "Mare liberum" that the sea is free for ships of all nations. In 1648 the Peace of Westphalia ended the Thirty Years' War. In the Commonwealth, the pacta conventa differed from the Henrician Articles in that they were personal pledges of a specific king. In 1679 England adopted Habeas Corpus – the name means literally "you shall have the body." The Statute of Anne of 1710 is seen as the first copyright law, and Beaumarchais fought for playwrights' copyright. In 1764 Cesare Beccaria called for abolishing torture and the death penalty. In 1776 the Declaration of Independence was signed in Philadelphia, and in 1787 the U.S. Constitution introduced a federal system and separation of powers. In 1789 the French Declaration of the Rights of Man proclaimed that people are born free and equal in rights. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏹 **Beaumarchais, author of the comedy on which Mozart's opera "The Marriage of Figaro" is based, also fought for...**
 - a) hunting rights
 - b) playwrights' copyright
 - c) a ban on theaters
 - d) free trade in wine
2. 🇺🇸 **In which city was the United States Declaration of Independence signed (1776)?**
 - a) Washington
 - b) New York
 - c) Boston
 - d) Philadelphia
3. 📜 **England's Statute of Anne (1710) is considered the first law on...**
 - a) maritime law
 - b) copyright
 - c) criminal law
 - d) marriage
4. 📖 **The pacta conventa differed from the Henrician Articles in that they...**
 - a) applied only to townspeople
 - b) were personal pledges of a specific king
 - c) did not need to be sworn
 - d) were written in Turkish
5. 🏰 **The name of the English "Habeas Corpus" Act (1679) literally means...**
 - a) "freedom of trade"
 - b) "bread for everyone"
 - c) "you shall have the body"
 - d) "the right to bear arms"
6. 🧑 **Which war was ended by the Peace of Westphalia (1648)?**
 - a) The Seven Years' War
 - b) The Hundred Years' War
 - c) The Thirty Years' War
 - d) The Napoleonic Wars
7. 💖 **The Declaration of the Rights of Man and of the Citizen (France, 1789) states that people are born...**
 - a) free and equal in rights
 - b) into estates that cannot be changed
 - c) subjects of the king
 - d) with a predestined fate
8. 🌿 **In "Mare Liberum" (1609) Hugo Grotius argued that the sea...**
 - a) belongs to Spain
 - b) is free for ships of all nations
 - c) is dangerous and must be avoided
 - d) belongs to the pope
9. ⭐ **In "On Crimes and Punishments" (1764) Cesare Beccaria called for...**
 - a) abolishing torture and the death penalty
 - b) trials by ordeal
 - c) punishing entire families
 - d) harsher punishments for theft

OTHER (HUMANITIES)

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and the great discoveries. Columbus set out on his first voyage in 1492, and Copernicus published "On the Revolutions" in 1543 – 51 years later. Magellan's expedition of 1519–1522 was the first to sail all the way around the Earth. The Jesuit Matteo Ricci led a mission in China. Rembrandt painted an extraordinary number of self-portraits. From 1661 the first Polish newspaper appeared, "Merkuriusz Polski Ordynaryjny." In the eighteenth century the great "Encyclopédie" of Diderot and d'Alembert contained, besides the text, thousands of engravings in separate volumes. Mozart began composing as a small child. In 1784 Kant proclaimed the motto "Sapere aude" – "Dare to think for yourself." And in 1799 Alexander von Humboldt set out to explore the nature of South America. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Wolfgang Amadeus Mozart began composing as...**
 - a) a retiree
 - b) an adult after his studies
 - c) a small child
 - d) a soldier
2. 👁️ **Besides text, the great 18th-century "Encyclopédie" of Diderot and d'Alembert contained...**
 - a) only portraits of kings
 - b) the scores of every opera
 - c) nothing but star charts
 - d) thousands of engravings in separate volumes
3. 🗞️ **The Enlightenment motto "Sapere aude" (Kant, 1784) means...**
 - a) Dare to think for yourself
 - b) Remember that you will die
 - c) Divide and rule
 - d) Knowledge is power
4. 📏 **How many years passed from Columbus's first voyage (1492) to the publication of Copernicus's "On the Revolutions" (1543)?**

5. 🚢 **Ferdinand Magellan's expedition (1519–1522) was the first to...**
 - a) climb Mount Everest
 - b) sail all the way around the Earth
 - c) cross the Sahara
 - d) reach the pole
6. 🗞️ **What was the name of the first Polish newspaper, published from 1661?**
 - a) "Gazeta Krakowska"
 - b) "Kurier Warszawski"
 - c) "Monitor"
 - d) "Merkuriusz Polski Ordynaryjny"
7. 💖 **Over his lifetime Rembrandt painted an unusually large number of...**
 - a) icons
 - b) Japanese seascapes
 - c) maps
 - d) self-portraits
8. 🌿 **In 1799 Alexander von Humboldt set out to study the nature of...**
 - a) Australia
 - b) South America
 - c) Siberia
 - d) Antarctica
9. ⭐ **The Jesuit Matteo Ricci (16th/17th century) led a mission in...**
 - a) Ethiopia
 - b) Canada
 - c) Brazil
 - d) China

ARCHITECTURE AND URBAN PLANNING

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and Baroque, when architects designed palaces and whole towns. In 1580 Jan Zamoyski founded Zamość, designed by Bernardo Morando – a Renaissance "ideal city." Its bastion fortress had a star-shaped outline so defenders could fire on every section of the wall. Renaissance palaces were graced by the loggia, an open gallery with arcades. The name "Baroque" probably comes from the Portuguese "barroco," an irregularly shaped pearl. Bernini's colonnade in front of St. Peter's Basilica symbolizes the arms of the Church embracing the faithful. From 1632 to 1653 Emperor Shah Jahan built the Taj Mahal as a mausoleum for his beloved wife. Wilanów Palace was built as the summer residence of King John III Sobieski. Palaces had orangeries built to shelter orange trees over the winter. And in 1778 La Scala opera house opened in Milan. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The famous La Scala opera house opened in 1778 in...
 - a) Vienna
 - b) Venice
 - c) Milan
 - d) Naples
2. 🗿 Zamość, founded in 1580 by Jan Zamoyski and designed by Bernardo Morando, is an example of...
 - a) a medieval stronghold
 - b) a port city
 - c) a Renaissance "ideal city"
 - d) a village under German law
3. 🗨 The name "Baroque" probably comes from the Portuguese "barroco," meaning...
 - a) an irregularly shaped pearl
 - b) a tall tower
 - c) a golden dome
 - d) a dark church
4. 🏰 Bastion fortresses, such as the one in Zamość, had a star-shaped outline so that...
 - a) defenders could fire on every section of the wall
 - b) water would flow around them faster
 - c) they were easier to paint
 - d) more houses would fit inside
5. 🏰 In a Renaissance palace, a loggia is...
 - a) an open gallery with arcades
 - b) a watchtower above the gate
 - c) an underground castle prison
 - d) a kitchen for court servants
6. 👑 Wilanów Palace was built as the summer residence of King...
 - a) Sigismund Augustus
 - b) Casimir the Great
 - c) Stanislaus Augustus
 - d) John III Sobieski
7. ❤ Emperor Shah Jahan built the Taj Mahal (1632–1653) as...
 - a) a fortress against the Persians
 - b) the empire's treasury
 - c) a palace for his sons
 - d) a mausoleum for his beloved wife
8. 🍋 Orangeries, fashionable in 17th–18th-century palaces, were built to...
 - a) store ice for the summer
 - b) dry tobacco leaves
 - c) shelter orange trees over the winter
 - d) breed racehorses
9. ⭐ Bernini's colonnade in front of St. Peter's Basilica was meant to symbolize...
 - a) the power of the emperor
 - b) the road to Jerusalem
 - c) the arms of the Church embracing the faithful
 - d) the defensive walls of the Vatican

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when scholars studied electricity and built astonishing automata. In 1600 William Gilbert coined the word "electricus" from the Greek "elektron," meaning amber. In 1642 Blaise Pascal built the Pascaline to help his father with tax calculations. In 1739 Vaucanson's mechanical duck could flap its wings, "eat" and "digest." In 1745 the Leyden jar was the first device that stored an electric charge. In 1747 Julien de La Mettrie claimed that a human being is a very complex machine. In 1752 Benjamin Franklin flew a kite with a metal key on its string during a storm. In 1770 Kempelen's "Turk," a chess automaton, hid a living chess player inside. Jaquet-Droz's "Musician" plays real tunes on a small organ. And Luigi Galvani noticed that a dead frog's leg twitches when electricity is applied. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Pierre Jaquet-Droz's automaton "The Musician" (1770s)...**
 - a) conducts an orchestra
 - b) plays real tunes on a small organ
 - c) sings opera arias
 - d) tunes a violin
2. ⚡ **In 1752 Benjamin Franklin studied the electricity of lightning by flying, during a storm,...**
 - a) a boat with a mast
 - b) an arrow from a bow
 - c) a balloon with a lamp
 - d) a kite with a metal key on its string
3. 🗨 **William Gilbert (1600) coined the word "electricus" from the Greek "elektron," meaning...**
 - a) lightning
 - b) amber
 - c) spark
 - d) magnet
4. ⚙ **The Leyden jar (1745) was the first device that...**
 - a) produced light
 - b) measured temperature
 - c) powered an engine
 - d) stored an electric charge
5. 🦆 **Jacques de Vaucanson's mechanical duck (1739) could...**
 - a) swim along a river
 - b) speak French
 - c) flap its wings, "eat" and "digest"
 - d) fly over a palace
6. ♀ **"The Turk," Wolfgang von Kempelen's chess-playing automaton (1770), in fact...**
 - a) was steered by a magnet from Vienna
 - b) hid a living chess player inside
 - c) calculated moves using steam
 - d) played only against itself
7. 💖 **In 1642 Blaise Pascal built a calculating machine (the Pascaline) to help...**
 - a) astronomers measure the stars
 - b) merchants weigh grain
 - c) his father with tax calculations
 - d) the king at card games
8. 🐸 **In the 1780s Luigi Galvani noticed that the leg of a dead frog...**
 - a) twitches when electricity is applied
 - b) glows in the dark
 - c) freezes in warm air
 - d) grows in water
9. ☆ **In "Man a Machine" (1747) Julien de La Mettrie argued that...**
 - a) a human being is a very complex machine
 - b) the body does not exist
 - c) animals are angels
 - d) machines have souls

COMPUTER SCIENCE AND TELECOMMUNICATIONS

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when news and numbers began to travel faster. The ideas of the Reformation spread through printed pamphlets and Bible translations. In 1558 Sigismund Augustus founded a regular royal post in Poland. In 1614 John Napier published logarithms to make tedious multiplication of large numbers easier, and the slide rule let people multiply by sliding scales against each other. In 1676 Ole Rømer estimated the speed of light by watching eclipses of Jupiter's moons. In 1703 Leibniz described the binary system, which uses only the digits 0 and 1. A music box plays a tune stored as pins on a rotating cylinder. The word "telegraph" means in Greek "writing at a distance." And in 1794 the Chappe brothers' optical telegraph sent messages with semaphore arms on towers. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 A music box, popular from the late 18th century, plays a tune recorded...
 - a) on a punched paper tape
 - b) in electronic memory
 - c) as pins on a rotating cylinder
 - d) on a vinyl record
2. 👁 The Chappe brothers' optical telegraph (1794) transmitted messages...
 - a) by carrier pigeons
 - b) by ringing great bells
 - c) with semaphore arms on towers
 - d) by current flowing through wires
3. 🗨 The word "telegraph" comes from Greek and means...
 - a) all-seeing
 - b) swift messenger
 - c) sound transmitter
 - d) writing at a distance
4. ➡ In 1703 Gottfried Leibniz described a number system using only the digits 0 and 1, the...
 - a) Roman system
 - b) hexadecimal system
 - c) decimal system
 - d) binary system
5. 📏 The slide rule (c. 1620–1630) made it possible to multiply numbers by...
 - a) weighing weights on a balance
 - b) counting on the fingers of both hands
 - c) sliding scales against each other
 - d) turning a sand hourglass
6. 📮 A regular royal postal service in Poland was founded in 1558 by...
 - a) Sigismund Augustus
 - b) John III Sobieski
 - c) Casimir the Great
 - d) Stephen Báthory
7. ❤ John Napier published logarithms in 1614 in order to...
 - a) make tedious multiplication of large numbers easier
 - b) encrypt letters to the king
 - c) count sheep
 - d) measure the height of mountains
8. 🌿 In 1676 Ole Rømer was the first to estimate the speed of light by observing...
 - a) lightning over the sea
 - b) reflections in a mirror
 - c) sunrises
 - d) eclipses of Jupiter's moons
9. ☆ The ideas of the Reformation spread quickly across Europe mainly thanks to...
 - a) sermons on ships
 - b) the telegraph
 - c) carrier pigeons
 - d) printed pamphlets and Bible translations

BIOMEDICAL ENGINEERING

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when new ideas for helping the body were born. The knight Götz von Berlichingen, who lost a hand in 1504, wore an iron prosthetic hand with movable fingers. In 1543 Andreas Vesalius presented anatomy in precise engravings based on dissections. In 1633 St. Vincent de Paul and Louise de Marillac founded the Daughters of Charity. In 1661 Marcello Malpighi discovered capillaries in a frog's lungs. People who were hard of hearing used ear trumpets. On the Fahrenheit scale of 1724, water freezes at 32 degrees. Benjamin Franklin invented bifocal glasses for himself. In 1796 Edward Jenner carried out the first vaccination against smallpox with cowpox, and the word "vaccine" comes from the Latin "vacca," meaning cow. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎧 In the 17th–18th centuries people who were hard of hearing used...
 - a) electric headphones
 - b) ear trumpets
 - c) tube amplifiers
 - d) implants
2. 👁 In "On the Fabric of the Human Body" (1543) Andreas Vesalius presented anatomy...
 - a) on maps of the sky
 - b) based solely on the writings of Galen
 - c) in precise engravings based on dissections
 - d) in the form of poems
3. 🗨 The word "vaccine" comes from the Latin "vacca," meaning...
 - a) cow
 - b) pox
 - c) health
 - d) needle
4. 🌡 On the Fahrenheit scale (1724), at how many degrees does water freeze?

5. 🦾 The knight Götz von Berlichingen, who lost his hand in 1504, wore...
 - a) a wooden leg with a hinged knee
 - b) a wooden leg
 - c) an iron prosthetic hand with movable fingers
 - d) a leather glove
6. 🧑 Who in 1796 carried out the first vaccination against smallpox using cowpox?
 - a) Louis Pasteur
 - b) Robert Koch
 - c) Edward Jenner
 - d) William Harvey
7. 💖 Benjamin Franklin invented for himself...
 - a) bifocal glasses
 - b) diving goggles
 - c) sunglasses
 - d) glasses with a flashlight
8. 🍃 In 1661 Marcello Malpighi discovered under a microscope, in a frog's lungs,...
 - a) capillaries
 - b) brain nerve cells
 - c) heart muscle fibers
 - d) disease-causing bacteria
9. ☆ The Daughters of Charity, a congregation caring for the sick, was founded in 1633 by...
 - a) John Calvin and Theodore Beza
 - b) Martin Luther and Katharina
 - c) St. Vincent de Paul and Louise de Marillac
 - d) Ignatius of Loyola and Francis Xavier

CHEMICAL ENGINEERING

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when chemistry was becoming a science. Around 1600 the Polish alchemist Michael Sendivogius wrote of a "food of life" in the air, which is sometimes linked today with oxygen. Soldiers loaded a musket by pouring powder and a ball down the muzzle. In 1708–1710, in Meissen in Saxony, Europe's first true porcelain was made. In the 1750s Joseph Black called carbon dioxide fixed air. In 1761 Franklin built the glass harmonica, which sounded thanks to spinning glass bowls. In the 1770s oxygen was discovered by Carl Wilhelm Scheele and Joseph Priestley, and Lavoisier named the gas "oxygène" – oxygen. Lavoisier also stated the law of conservation of mass: the mass of the reactants equals the mass of the products. In 1794 he died on the guillotine during the French Revolution. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Benjamin Franklin's glass armonica (1761) produced sound thanks to...**
 - a) spinning glass bowls
 - b) strings of copper wire
 - c) wooden pipes
 - d) bronze bells
2. 👁 **Europe's first true porcelain was produced (1708–1710) in...**
 - a) Sèvres
 - b) Venice
 - c) Meissen in Saxony
 - d) Delft
3. 📖 **Lavoisier gave a name meaning "acid-former" to the gas we now call...**
 - a) carbon dioxide
 - b) hydrogen
 - c) nitrogen
 - d) oxygen
4. ⚖ **The law of conservation of mass (Lavoisier) says that in a chemical reaction the mass of the reactants...**
 - a) equals the mass of the products
 - b) always drops by half
 - c) increases when heated
 - d) depends on their color
5. 🔫 **A musket was loaded by...**
 - a) pouring in water
 - b) winding a spring
 - c) pouring powder and a ball down the muzzle
 - d) inserting a cartridge from the back
6. 👤 **Oxygen was discovered independently in the 1770s by Carl Wilhelm Scheele and...**
 - a) Isaac Newton
 - b) Galileo
 - c) Paracelsus
 - d) Joseph Priestley
7. ❤ **The Polish alchemist Michael Sendivogius (16th/17th century) wrote of a "food of life" in the air, which today is sometimes linked to...**
 - a) salt
 - b) gold
 - c) mercury
 - d) oxygen
8. 🌿 **In the 1750s Joseph Black described carbon dioxide and called it...**
 - a) royal vapor
 - b) fire water
 - c) fixed air
 - d) blue fire
9. ☆ **Antoine Lavoisier, the father of modern chemistry, died in 1794...**
 - a) on the guillotine during the French Revolution
 - b) in a shipwreck
 - c) in a duel
 - d) in a laboratory explosion

CIVIL ENGINEERING AND TRANSPORT

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and the great discoveries, when travel spanned the whole globe. Magellan's expedition sailed in 1519 and returned to Spain in 1522, so it lasted 3 years; its course was described in a journal by Antonio Pigafetta. Spanish galleons carried silver from America in convoys escorted by warships. In 1620 the Mayflower carried the Puritan Pilgrims to America. In 1666–1681 the Canal du Midi linked the Atlantic with the Mediterranean. On land, stagecoaches ran – the French name "diligence" means haste, care – and postilions played a post horn. In 1747 James Lind showed that sailors sick with scurvy are cured by citrus fruits. And in 1783 people rose into the air for the first time in the Montgolfier brothers' balloon. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Stagecoach postilions announced their arrival by playing...**
 - a) a post horn
 - b) a bell
 - c) a violin
 - d) a drum
2. 👁 **The Canal du Midi in France (1666–1681) connected...**
 - a) the Rhine with the Danube
 - b) the Atlantic with the Mediterranean
 - c) the Seine with the Thames
 - d) Paris with London
3. 🗨 **The French stagecoach called a "diligence" takes its name from a word meaning...**
 - a) a light carriage
 - b) a horse post
 - c) a paved road
 - d) haste, care
4. 🚢 **Magellan's expedition set sail in 1519 and returned to Spain in 1522. How many years did it last?**

5. 🚀 **In 1783 people rose into the air for the first time in...**
 - a) Otto Lilienthal's glider
 - b) the Montgolfier brothers' balloon
 - c) the Wright brothers' airplane
 - d) Count Zeppelin's airship
6. 🚢 **Spanish galleons carried silver from America...**
 - a) on log rafts
 - b) one at a time and only at night
 - c) in convoys escorted by warships
 - d) overland through Siberia
7. ❤ **The course of the first voyage around the world was described in his journal by expedition member...**
 - a) Vasco da Gama
 - b) Christopher Columbus
 - c) James Cook
 - d) Antonio Pigafetta
8. 🍃 **In 1747 James Lind showed that sailors sick with scurvy are cured by...**
 - a) ship's biscuits
 - b) rum
 - c) sea salt
 - d) citrus fruits
9. ☆ **In 1620 the ship "Mayflower" carried to America...**
 - a) the Puritan Pilgrims
 - b) Spanish soldiers
 - c) merchants from Venice and Genoa
 - d) Jesuit missionaries

A N S W E R S

MATERIALS ENGINEERING

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to the workshops of master craftsmen. In 1520 the Sigismund Bell at Wawel was cast in bronze; today it is one of Poland's national symbols. The goldsmith Benvenuto Cellini described his stormy life in an autobiography. The word "porcelain" comes from the Italian "porcellana," a cowrie shell.

Blue-and-white ware from Delft imitated Chinese porcelain, and at the court of Augustus II the Strong the secret of European porcelain was discovered by Johann Friedrich Böttger. The philosopher Baruch Spinoza earned his living as a grinder of optical lenses. In Cremona the world's most famous violins were made by Antonio Stradivari. In 1709 Abraham Darby began smelting iron with coke, which replaced increasingly expensive charcoal. And the peoples of South America made bouncy balls from the sap of the rubber tree. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎻 Who made the world's most famous violins in a workshop in Cremona?
 - a) Niccolò Paganini
 - b) Antonio Stradivari
 - c) Antonio Vivaldi
 - d) Andrea Palladio
2. 🗿 Blue-and-white tiles and vessels from Delft in Holland imitated...
 - a) Persian carpets
 - b) Roman mosaics
 - c) Chinese porcelain
 - d) Venetian glass
3. 🗨 The word "porcelain" comes from the Italian "porcellana," meaning...
 - a) white earth
 - b) a cowrie shell
 - c) royal tableware
 - d) clay from China
4. ⚒ In 1709 Abraham Darby began smelting iron with coke, which...
 - a) melted in water
 - b) replaced increasingly expensive charcoal
 - c) produced no heat
 - d) was cheaper than clay
5. ⚙ The philosopher Baruch Spinoza earned his living as...
 - a) a blacksmith
 - b) a baker
 - c) a ship's captain
 - d) a grinder of optical lenses
6. 🧑 Who, at the court of Augustus II the Strong, discovered the secret of making European porcelain?
 - a) Joseph Priestley
 - b) Abraham Darby
 - c) Antonio Stradivari
 - d) Johann Friedrich Böttger
7. 💖 The goldsmith and sculptor Benvenuto Cellini described his turbulent life in...
 - a) an autobiography
 - b) a military treatise
 - c) a dictionary
 - d) a poem about the sea
8. 🌿 From the sap of the rubber tree, the Indigenous peoples of South America made, among other things,...
 - a) paper
 - b) glass beads
 - c) bouncy balls
 - d) iron arrowheads
9. ⭐ The Sigismund Bell at Wawel, cast in bronze in 1520, is today...
 - a) part of the town hall clock
 - b) a ship's bell
 - c) one of Poland's national symbols
 - d) an exhibit from Vienna

MECHANICAL ENGINEERING

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to a world of pendulums, springs and steam. Galileo noticed that a pendulum's swing time hardly depends on how wide the swing is. In 1656 the first pendulum clock was built by Christiaan Huygens. Around 1700 Bartolomeo Cristofori built the pianoforte with a hammer action. In 1712 Newcomen's steam engine was called "atmospheric" because air pressure pushed the piston down once steam condensed; it was used for pumping water out of mines. James Watt raised the engine's efficiency by adding a separate condenser. The word "chronometer" means "time measurer." For nearly 40 years John Harrison perfected his marine clocks, and his H4 chronometer of 1761 let sailors determine longitude at sea. Deists compared God to a clockmaker who wound up the world. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏹 **Who built the piano (pianoforte) with a hammer mechanism around 1700?**
 - a) Johann Sebastian Bach
 - b) Antonio Stradivari
 - c) Bartolomeo Cristofori
 - d) Christiaan Huygens
2. 👁 **Who built the first pendulum clock (1656)?**
 - a) John Harrison
 - b) Galileo
 - c) Isaac Newton
 - d) Christiaan Huygens
3. 🗨 **The word "chronometer" comes from Greek and means...**
 - a) time measurer
 - b) spinning wheel
 - c) fast wagon
 - d) heavy hammer
4. ⚙ **James Watt greatly improved the efficiency of the steam engine by adding...**
 - a) a separate condenser
 - b) a wooden gear wheel
 - c) an electric motor
 - d) a sail
5. ⚙ **John Harrison's marine chronometer (H4, 1761) allowed sailors to...**
 - a) determine longitude at sea
 - b) measure water depth
 - c) predict storms
 - d) sail against the wind
6. 🧑 **Newcomen's steam engines were first used for...**
 - a) pumping water out of mines
 - b) grinding coffee
 - c) pulling trains
 - d) powering ships
7. 💖 **For nearly 40 years John Harrison, a self-taught carpenter,...**
 - a) wrote a novel
 - b) sailed around the world
 - c) built a cathedral
 - d) perfected his marine clocks
8. 🌿 **Galileo noticed that the time of one swing of a pendulum...**
 - a) grows with every swing
 - b) hardly depends on how wide the swing is
 - c) depends on the color of the weight
 - d) differs between day and night
9. ⭐ **18th-century deists compared God to...**
 - a) a soldier guarding the borders
 - b) a clockmaker who wound up the world
 - c) a king sitting on a throne
 - d) a gardener planting trees

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to mines, pumps and water wonders. In the sixteenth century the water organ in the gardens of the Villa d'Este at Tivoli played by the force of falling water. In 1556 Agricola published "De re metallica," a handbook of mining and metallurgy. At Potosí the Spanish used the forced labor of native people called the mita. From the seventeenth century, horses in the Wieliczka salt mine worked underground at treadmills that hoisted the salt. The Dutch drained polders with windmills that pumped water. In 1661 John Evelyn, in "Fumifugium," drew attention to air pollution in London. In 1684 the Machine of Marly pumped water from the Seine to the fountains of Versailles. In eighteenth-century England, coal increasingly replaced wood and charcoal. And the Lisbon earthquake of 1755 sparked a dispute among philosophers about the existence of evil in the world. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎺 The water organ in the gardens of the Villa d'Este in Tivoli (16th century) played thanks to...
 - a) an organ-pumper's labor
 - b) bellows worked by horses
 - c) wind from the mountains
 - d) the force of falling water
2. 🌀 The Machine of Marly (1684) pumped water from the Seine to the fountains of...
 - a) Versailles
 - b) Notre-Dame
 - c) the Louvre
 - d) Wilanów
3. 📖 Georgius Agricola's "De re metallica" (1556) is...
 - a) a handbook of mining and metallurgy
 - b) a treatise on church music
 - c) a code of town law
 - d) an atlas of stars and planets
4. 🌊 The Dutch drained polders, land lying below sea level, using...
 - a) fire
 - b) salt
 - c) windmills that pumped water
 - d) camels
5. 🐎 From the 17th century, horses worked underground in the Wieliczka salt mine, turning...
 - a) treadmills that hoisted the salt
 - b) carts full of tourists
 - c) the soil in the fields
 - d) pumps to put out fires
6. 👤 In the Potosí mines the Spanish used forced labor by Indigenous people called...
 - a) the guild
 - b) the mita
 - c) the tithe
 - d) the corvée
7. 💖 In "Fumifugium" (1661) John Evelyn drew attention to...
 - a) air pollution in London
 - b) the lack of water in Paris
 - c) noise in the ports
 - d) deforestation in Russia
8. 🌿 In 18th-century England, coal increasingly replaced...
 - a) solar energy
 - b) crude oil
 - c) wood and charcoal
 - d) natural gas
9. ⭐ The Lisbon earthquake (1755) sparked a dispute among philosophers, including Voltaire, about...
 - a) the shape of the globe
 - b) the election of a new pope
 - c) the existence of evil in the world
 - d) the price of wine in Portugal

1.d 2.a 3.a 4.c 5.a 6.b 7.a 8.c 9.c

ANSWERS

ASTRONOMY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when astronomers rebuilt the picture of the sky. In 1543 Nicolaus Copernicus put the Sun at the center of the world. Giordano Bruno taught that the universe is infinite. Johannes Kepler worked as assistant to Tycho Brahe and from his observations derived his first law: the planets orbit the Sun in ellipses. In "Harmonices Mundi" of 1619 he gave the planets melodies based on their motion. In 1609–1610 Galileo saw mountains and craters on the Moon through his telescope, and he named the moons of Jupiter he discovered the Medicean Stars. In 1633 he had to recant his views before the Inquisition tribunal in Rome. In 1668 Newton built a reflecting telescope. And Edmond Halley predicted that his comet would return in 1758. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In "Harmonices Mundi" (1619) Johannes Kepler assigned the planets...
 - a) the colors of the rainbow
 - b) the names of angels
 - c) scents
 - d) melodies based on their motion
2. 👁 Through his telescope (1609–1610) Galileo saw on the Moon...
 - a) mountains and craters
 - b) seas of real water
 - c) cities
 - d) forests
3. 🗨 Galileo named the moons of Jupiter that he discovered...
 - a) the Medicean Stars
 - b) the lamps of heaven
 - c) the eyes of Jupiter
 - d) the daughters of Zeus
4. ➡ According to Kepler's first law, the planets orbit the Sun along...
 - a) perfect circles
 - b) ellipses
 - c) straight lines
 - d) squares
5. 🌟 In 1668 Isaac Newton built by himself a telescope that was...
 - a) a hundred meters long
 - b) made of rock crystal
 - c) a water telescope with a float
 - d) a reflecting telescope
6. 👤 Johannes Kepler worked as an assistant to which astronomer, later using his observations?
 - a) Nicolaus Copernicus
 - b) Galileo
 - c) Edmond Halley
 - d) Tycho Brahe
7. ❤ In 1633 Galileo had to publicly recant his views before...
 - a) the English Parliament
 - b) the king of France
 - c) the Inquisition tribunal in Rome
 - d) the Senate of Venice
8. 🌿 Edmond Halley predicted that the comet later named after him would return in the year...
 - a) 1682
 - b) 1910
 - c) 1758
 - d) 1492
9. ☆ What did Nicolaus Copernicus place at the center of the world in "On the Revolutions of the Heavenly Spheres" (1543)?
 - a) The Sun
 - b) The North Star
 - c) The Earth
 - d) The Moon

MATHEMATICS

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when mathematics gained new tools. In 1557 Robert Recorde introduced the "=" sign, explaining that nothing is more equal than two parallel lines. Descartes joined algebra and geometry by introducing the coordinate system. Pierre de Fermat noted that he knew a proof of his theorem, but the margin was too narrow to contain it. In 1654 letters between Pascal and Fermat about dividing the stakes in an interrupted game began probability theory. In Pascal's triangle each number is the sum of the two numbers above it, and Pascal's wager says it is wiser to bet on belief in God. Calculus was created independently by Newton and Gottfried Wilhelm Leibniz. In 1722 Bach showed that in well-tempered tuning you can play in all 24 keys. And in 1736 Euler proved that in Königsberg you cannot cross every bridge exactly once. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In "The Well-Tempered Clavier" (1722) Bach showed that with tempered tuning one can play...
 - a) only in C major
 - b) only on the organ
 - c) in all 24 keys
 - d) without using the hands
2. 👁 Descartes combined algebra with geometry by introducing...
 - a) Pascal's triangle
 - b) the coordinate system
 - c) the number zero
 - d) the calculator
3. 📖 In 1557 Robert Recorde introduced the equals sign "=", explaining that...
 - a) it abbreviated an English word
 - b) the Romans already wrote it that way
 - c) nothing is more equal than two parallel lines
 - d) it looked like his family seal
4. ➡ In Pascal's triangle each number is...
 - a) the product of the numbers beside it
 - b) the square of the row number
 - c) the sum of the two numbers above it
 - d) always equal to 1
5. 🗝 In 1736 Leonhard Euler solved the puzzle of the seven bridges of Königsberg, showing that...
 - a) you cannot cross every bridge exactly once
 - b) you have to swim across the river
 - c) crossing two bridges is enough
 - d) the bridges form a circle
6. 🧠 Differential and integral calculus was created independently by Isaac Newton and...
 - a) Galileo
 - b) Gottfried Wilhelm Leibniz
 - c) Blaise Pascal
 - d) René Descartes
7. 💖 Pierre de Fermat noted in a book's margin that he had a proof of his theorem, but...
 - a) the proof was secret
 - b) he did not want to share it
 - c) he had forgotten it
 - d) the margin was too narrow to contain it
8. 🍀 Probability theory was launched by the correspondence of Pascal and Fermat (1654) about...
 - a) the lengths of rivers in Europe
 - b) dividing the stakes in an interrupted game
 - c) the number of grains of sand on a beach
 - d) the motion of the planets around the Sun
9. ☆ "Pascal's Wager" is the argument that...
 - a) numbers rule the world
 - b) the world is an accident
 - c) it is not worth playing dice
 - d) it is wiser to bet on belief in God

OTHER (TECHNOLOGY)

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to a world of new instruments and inventions. In sixteenth-century Nuremberg, Peter Henlein made a pocket watch that let people carry the time with them everywhere. In 1582 Pope Gregory XIII introduced the Gregorian calendar. The word "telescope" means "far-seeing," and Galileo's telescope magnified about 20 times. In 1643 Evangelista Torricelli invented the barometer to measure atmospheric pressure. In 1665 a famous, very large drawing of a flea appeared in "Micrographia" by Robert Hooke. Coffeehouses in Venice, London and Paris became places for meeting, talking and reading newspapers. In a harpsichord the strings are plucked by quills (plectra). And in 1797 André-Jacques Garnerin became the first to parachute from a balloon. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In a harpsichord, the strings are...
 - a) blown with air
 - b) struck by hammers
 - c) plucked by quills (plectra)
 - d) rubbed with a bow
2. 🖼️ The famous, very large drawing of a flea comes from the book...
 - a) "Micrographia" by Robert Hooke (1665)
 - b) "De re metallica" by Agricola
 - c) Diderot's "Encyclopédie"
 - d) "Orbis Pictus" by Comenius
3. 🗨️ The word "telescope" comes from Greek and means...
 - a) far-seeing
 - b) small sight
 - c) night eye
 - d) glass of the stars
4. 🔭 Galileo's telescope magnified images about...
 - a) a million times
 - b) 1,000 times
 - c) 20 times
 - d) 2 times
5. 🧗 In 1797 André-Jacques Garnerin was the first person to...
 - a) swim the English Channel
 - b) parachute from a balloon
 - c) climb Mont Blanc
 - d) ski down the Alps
6. ☕ The coffeehouses that appeared in the 17th century in Venice, London and Paris became places for...
 - a) meeting, talking and reading newspapers
 - b) the slave trade
 - c) fencing practice
 - d) swimming lessons
7. 💖 The pocket watch (Peter Henlein, Nuremberg, 16th century) for the first time made it possible to...
 - a) measure temperature
 - b) weigh gold
 - c) listen to music
 - d) carry the time with you everywhere
8. 🌿 In 1643 Evangelista Torricelli invented the barometer, an instrument for measuring...
 - a) temperature
 - b) humidity
 - c) wind force
 - d) atmospheric pressure
9. ⭐ The Gregorian calendar was introduced in 1582 by Pope...
 - a) Leo X
 - b) Gregory XIII
 - c) Pius V
 - d) John Paul II

BIOLOGY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when naturalists began to look closely at living things. The turkey came to Europe from America, and canaries from the Canary Islands, kept for their song. In 1665 Robert Hooke called the empty spaces in cork "cellulae," little rooms – cells. In 1668 Francesco Redi showed that in a covered jar of meat no fly larvae appeared. In the 1670s Antonie van Leeuwenhoek was the first to see bacteria and other microorganisms under a microscope. In 1699 Maria Sibylla Merian set out for Suriname to paint insects and their metamorphoses. Linnaeus proposed a "flower clock" of plants that open their flowers at different times of day. His students, who collected specimens on expeditions, were called his apostles. And the motto went: "God created, Linnaeus arranged." Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🇵🇹 **Canaries, brought to Europe from the Canary Islands in the 16th century, were bred above all for...**
 - a) their song
 - b) their writing quills
 - c) their eggs
 - d) their meat
2. 👁 **In the 1670s Antonie van Leeuwenhoek was the first to see under a microscope...**
 - a) viruses
 - b) atoms
 - c) double stars
 - d) bacteria and other microorganisms
3. 📖 **Robert Hooke called the empty spaces in cork "cellulae," meaning...**
 - a) air bubbles
 - b) grains of sand
 - c) little rooms
 - d) holes in cheese
4. 🦋 **In 1668 Francesco Redi challenged the theory of spontaneous generation because, in a covered jar of meat,...**
 - a) mice appeared
 - b) the meat turned to stone
 - c) grass grew
 - d) no fly larvae appeared
5. 🌸 **Linnaeus proposed a "flower clock," a flower bed of plants that...**
 - a) bloom only at night
 - b) turn to follow the sun
 - c) give off scent every hour
 - d) open their flowers at different times of day
6. 👤 **"Linnaeus's apostles" was the name for his students who...**
 - a) collected specimens on expeditions
 - b) taught in village schools
 - c) built churches in Lapland
 - d) preached sermons in Sweden
7. 💖 **In 1699 Maria Sibylla Merian set out for Suriname to...**
 - a) set up sugarcane plantations
 - b) convert the Indigenous people
 - c) look for gold in the jungle
 - d) paint insects and their metamorphoses
8. 🍃 **Which farm bird comes from America and reached Europe in the 16th century?**
 - a) The turkey
 - b) The mallard
 - c) The chicken
 - d) The goose
9. ⭐ **A motto attributed to Linnaeus says: "God created, Linnaeus..."**
 - a) described in verse
 - b) sold
 - c) hid
 - d) arranged

CHEMISTRY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when alchemy was slowly turning into chemistry. Jan Baptist van Helmont coined the word "gas" from the Greek "chaos." In 1669 Hennig Brand discovered phosphorus while seeking the philosopher's stone in urine. Robert Boyle, with Hooke's help, built a pump that removed air from a vessel. Boyle's law says that if we raise a gas's pressure at constant temperature, its volume will decrease. Boyle also funded lectures in defense of Christianity. Around 1706 Prussian blue was discovered in Berlin, one of the first synthetic pigments. In 1749 Handel composed music for a show of fireworks in London. According to phlogiston theory, when something burns an invisible "phlogiston" escapes from it, but Lavoisier overturned the theory, and in 1789 his table listed about 33 simple substances. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In 1749 George Frideric Handel composed music for a display of...
 - a) a royal hunt
 - b) horse races
 - c) a volcanic eruption
 - d) fireworks in London
2. 👁 Prussian blue, discovered by accident in Berlin around 1706, was...
 - a) one of the first synthetic pigments
 - b) the color of Venetian glass
 - c) a natural stone
 - d) a dye made from fruit
3. 🗨 Jan Baptist van Helmont coined the word "gas" from the Greek word...
 - a) chaos
 - b) fire
 - c) steam
 - d) star
4. ⚖ Lavoisier's table of elements (1789) listed...
 - a) over 1,000 elements
 - b) exactly 4 elements
 - c) metals only
 - d) about 33 simple substances
5. ⚙ With Robert Hooke's help, Robert Boyle built a pump that...
 - a) pumped water uphill
 - b) compressed air into balloons
 - c) produced steam
 - d) removed air from a vessel
6. 🧑‍🔬 Phosphorus was discovered in 1669 by Hennig Brand of Hamburg while he was...
 - a) boiling seawater for salt
 - b) seeking the philosopher's stone in urine
 - c) burning coal in a forge
 - d) melting gold coins
7. ❤ According to the phlogiston theory, disproved by Lavoisier, when something burns...
 - a) the world loses weight
 - b) the soul flies away
 - c) water is released
 - d) an invisible "phlogiston" escapes from it
8. 🌿 Boyle's law says that if we increase the pressure of a gas at constant temperature, its volume will...
 - a) increase
 - b) stay the same
 - c) decrease
 - d) change color
9. ⭐ In his will Robert Boyle funded a lecture series in defense of...
 - a) Christianity
 - b) atheism
 - c) absolute monarchy
 - d) alchemy

PHYSICS

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when physics became an experimental science. Galileo claimed that in a vacuum all bodies fall with the same acceleration, regardless of mass. In 1636 Marin Mersenne described how the pitch of a string depends on its length, tension and thickness. In 1648 the experiment on the Puy de Dôme, planned by Pascal, showed that air pressure decreases with altitude. In 1654 Otto von Guericke's Magdeburg hemispheres could not be pulled apart by teams of horses. In 1660 the Royal Society was founded in London, a society of scientists. Isaac Newton split white light with a prism into the colors of the rainbow, and in 1687 he stated 3 laws of motion. The unit of force, the newton, honors Isaac Newton. Newton also devoted much time to alchemy and theology, and he wrote that he saw further because he stood on the shoulders of giants. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Marin Mersenne (1636) described how the pitch of a string depends on...**
 - a) the material of the soundbox
 - b) its length, tension and thickness
 - c) the time of day
 - d) its color and smell
2. 👁 **Using a prism, Isaac Newton split white light into...**
 - a) the colors of the rainbow
 - b) two rays
 - c) sparks
 - d) black and white
3. 📖 **The unit of force, the newton, honors...**
 - a) Galileo
 - b) Isaac Newton
 - c) Christiaan Huygens
 - d) Blaise Pascal
4. ⚖ **Galileo argued that in a vacuum all bodies fall...**
 - a) not at all, since they float in place
 - b) with the same acceleration, regardless of mass
 - c) at a constant speed
 - d) faster the heavier they are
5. 🚀 **In Otto von Guericke's famous demonstration (1654), the Magdeburg hemispheres, with the air pumped out,...**
 - a) fell apart on their own
 - b) could not be pulled apart by teams of horses
 - c) could not even be lifted
 - d) rose into the air
6. 🏰 **The Royal Society, founded in London in 1660, is...**
 - a) the king's bodyguard
 - b) a society of scientists
 - c) a guild of spice merchants
 - d) a school for princes
7. 💎 **Besides physics and mathematics, Isaac Newton devoted much time to...**
 - a) opera music
 - b) alchemy and theology
 - c) oil painting
 - d) sailing
8. 🍃 **The experiment on the Puy de Dôme mountain (1648), planned by Pascal, showed that air pressure...**
 - a) is the same everywhere
 - b) increases with altitude
 - c) decreases with altitude
 - d) depends on the season
9. ⭐ **Newton wrote: "If I have seen further, it is by standing on..."**
 - a) the top of a mountain
 - b) the shoulders of giants
 - c) a church tower
 - d) the backs of friends

ENVIRONMENT

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when humans changed nature more and more. Horses brought by the Spanish changed the lives of the Plains Indians. The dodo of Mauritius died out in the late seventeenth century because humans introduced animals destroyed it. During the Little Ice Age, frost fairs were held on the frozen Thames. People tried to stop the Great Fire of London in 1666 by pulling down houses to create firebreaks. In 1713 Hans Carl von Carlowitz brought the idea of sustainability into forestry: never cut more than grows back. Antonio Vivaldi composed "The Four Seasons." In the eighteenth century the English-style garden was in fashion, meant to look natural, like a picturesque landscape. In "Reveries of the Solitary Walker," Rousseau described solitary walks and reflections. And the eruption of the Laki volcano in 1783 caused a toxic haze over Europe and famine in Iceland. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Who composed the set of violin concertos "The Four Seasons"?**
 - a) Joseph Haydn
 - b) Johann Sebastian Bach
 - c) Antonio Vivaldi
 - d) Wolfgang Amadeus Mozart
2. 👁 **During the "Little Ice Age" London's Thames froze over, and on it people held...**
 - a) frost fairs
 - b) sailing regattas
 - c) boat races
 - d) hot-spring baths
3. 📖 **In 1713 Hans Carl von Carlowitz introduced into forestry the idea of...**
 - a) hunting with large teams of beaters
 - b) clearing entire forests for fields
 - c) sustainability: never cut more than grows back
 - d) the English-style garden
4. 🦋 **The dodo of Mauritius died out in the late 17th century because...**
 - a) humans and introduced animals destroyed it
 - b) sharks in the lagoon ate it
 - c) the island ran out of water for it
 - d) it flew away to Africa for good
5. ⚔ **People tried to stop the Great Fire of London (1666) by, among other things,...**
 - a) digging a canal around the city
 - b) pulling down houses to create firebreaks
 - c) shutting the city gates
 - d) pouring wine over the city
6. 🐎 **Horses brought to America by the Spanish transformed the lives of...**
 - a) the Plains Indians
 - b) the peoples of Siberia
 - c) the Inuit in Greenland
 - d) the Aztecs on the islands
7. 💖 **In "Reveries of the Solitary Walker" Jean-Jacques Rousseau describes...**
 - a) life at the court of Louis XV
 - b) a journey to imperial China
 - c) solitary walks and reflections
 - d) Napoleon's military campaigns
8. 🌿 **The eruption of the Laki volcano in Iceland (1783) caused...**
 - a) the formation of a new continent
 - b) the freezing of the Mediterranean Sea
 - c) the disappearance of the Moon
 - d) a toxic haze over Europe and famine in Iceland
9. ☆ **The English-style garden, fashionable in the 18th century, was meant to look...**
 - a) like a chessboard of clipped shrubs
 - b) like a desert
 - c) natural, like a picturesque landscape
 - d) like a fruit orchard

HEALTH

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when people sought new ways to stay healthy. In "The Life of an Honest Man," Mikołaj Rej recommended a calm and moderate life in the countryside. In southern Italy people believed the tarantella cured the effects of a spider bite (tarantism). The name "influenza" means in Italian the influence of the stars. In the seventeenth century plague doctors' long-beaked masks were filled with herbs and perfumes, and in Vienna in 1693 a plague column was raised as a thank-offering for the end of an epidemic. Quinine from the bark of the cinchona tree was a remedy for malaria. Variolation meant deliberate infection with mild smallpox; in 1721 Lady Mary Wortley Montagu popularized in England variolation, which she had seen in Turkey. And in the eighteenth century English doctors began recommending sea bathing. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏹 According to folk belief, the fast tarantella dance could cure...
 - a) broken legs
 - b) the effects of a spider bite (tarantism)
 - c) a runny nose
 - d) toothache
2. 👁 The distinctive long-"beaked" masks of 17th-century plague doctors were filled with...
 - a) herbs and perfumes
 - b) sand
 - c) ice
 - d) holy water
3. 🗨 The name of the disease "influenza" comes from Italian and means...
 - a) fever
 - b) influence (of the stars)
 - c) cold
 - d) cough
4. 🔄 Variolation, used in the 18th century before the vaccine, consisted of...
 - a) bleeding from a vein
 - b) daily bathing in the sea
 - c) drinking milk from cows
 - d) deliberate infection with mild smallpox
5. 🌊 In the 18th century doctors in England began recommending as a health cure...
 - a) sea bathing
 - b) tightrope dancing
 - c) long fasts
 - d) sleeping standing up
6. 👩 In 1721 Lady Mary Wortley Montagu popularized in England...
 - a) the fashion for afternoon tea
 - b) variolation, which she had seen in Turkey
 - c) the habit of drinking coffee
 - d) wearing powdered wigs
7. ❤ In "The Life of an Honest Man" Mikołaj Rej recommended...
 - a) life at the royal court in Kraków
 - b) studies at the university in Paris
 - c) soldiering and distant travels
 - d) a calm and moderate life in the countryside
8. 🌿 In the 17th–18th centuries quinine from the bark of the cinchona tree (South America) was a remedy for...
 - a) influenza
 - b) leprosy
 - c) malaria
 - d) plague
9. ☆ Plague columns, such as the one in Vienna (1693), were erected as...
 - a) a monument to a victorious battle
 - b) a boundary post
 - c) a sundial
 - d) a thank-offering for the end of an epidemic

PHYSICAL CULTURE AND SPORT

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to court pastimes and the first sports. In sixteenth-century Florence, in calcio fiorentino, each team had 27 players. In the French game jeu de paume, the ball was first struck with the palm of the hand, and the name "tennis" probably comes from the cry "tenez!" – "take this!" Young Louis XIV danced the role of the Sun in a court ballet. A Polish nobleman wore with his kontusz a ceremonial saber called the karabela. In seventeenth-century Dutch paintings, people on frozen canals are ice skating. English Puritans opposed holding sports and games on Sunday. In 1693 John Locke advised toughening children with cold water and exercise in fresh air. And in 1780 the first Derby was run at Epsom. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏆 As a young man, King Louis XIV of France danced in a court ballet in the role of...
 - a) the Sun
 - b) the Moon
 - c) Mars
 - d) Neptune
2. 🗡️ The ceremonial saber worn by Polish nobles with the kontusz robe is the...
 - a) karabela
 - b) rapier
 - c) koncerz
 - d) katana
3. 🗨️ The name "tennis" probably comes from the French cry "tenez!", meaning...
 - a) "take this!"
 - b) "stop!"
 - c) "point!"
 - d) "victory!"
4. ⚽ In the 16th-century Florentine game of calcio fiorentino, each team had...
 - a) 27 players
 - b) 5 players
 - c) 100 players
 - d) 11 players
5. 🎾 In "jeu de paume," the ancestor of tennis, the ball was originally struck with...
 - a) the palm of the hand
 - b) the head
 - c) a stick
 - d) the foot
6. 🏇 In which year was the first Derby run at Epsom?
 - a) 1880
 - b) 1830
 - c) 1580
 - d) 1780
7. ❤️ In "Some Thoughts Concerning Education" (1693) John Locke advised toughening children with, among other things,...
 - a) long sleep
 - b) sweets
 - c) warm fur clothing
 - d) cold water and exercise in fresh air
8. 🍃 In 17th-century Dutch paintings (e.g., by Avercamp), people on frozen canals are...
 - a) growing tulips
 - b) rowing boats
 - c) ice skating
 - d) whaling
9. ⭐ In 17th-century England, the Puritans objected to holding on Sundays...
 - a) church services
 - b) Bible reading
 - c) rest
 - d) sports and games

MEDICINE

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when medicine began to rely on observation. Paracelsus wrote that everything is poison, and it is the dose that decides. Ambroise Paré, instead of searing wounds with boiling oil, began to tie off blood vessels and use gentle dressings. In 1555 the Poznań doctor Józef Struś became famous for his studies of the pulse. In the sixteenth century St. John of God founded the Brothers Hospitallers. In 1628 William Harvey proved the circulation of blood by calculating that in an hour the heart pumps more blood than the body could produce. In 1632 Rembrandt painted "The Anatomy Lesson of Dr. Tulp." Thomas Sydenham urged careful observation of the patient at the bedside. In 1763 Edward Stone described treating fever with powdered willow bark. And the singer Farinelli sang for King Philip V to ease his melancholy. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 For years the famous singer Farinelli sang every evening for King Philip V of Spain in order to...
 - a) teach him Italian
 - b) ease his melancholy
 - c) entertain guests
 - d) keep the army from getting bored
2. 👁 Who painted "The Anatomy Lesson of Dr. Nicolaes Tulp" (1632)?
 - a) Rembrandt
 - b) Caravaggio
 - c) Rubens
 - d) Vermeer
3. 📖 Paracelsus wrote: "All things are poison and nothing is without poison; what decides is..."
 - a) the dose
 - b) the color
 - c) the time of day
 - d) the taste
4. ⚖ William Harvey proved blood circulation by calculating that in an hour the heart pumps...
 - a) exactly one liter of water
 - b) as much blood as the brain weighs
 - c) more blood than the body could produce
 - d) only a teaspoon of blood
5. ✂ Instead of cauterizing wounds with boiling oil, the surgeon Ambroise Paré (16th century) began to...
 - a) burn them with a hot iron
 - b) smear them with honey and vinegar
 - c) tie off blood vessels and use gentle dressings
 - d) leave them untreated
6. 👤 Józef Struś (16th century), a physician from Poznań, became famous in Europe for studying...
 - a) eyes
 - b) bones
 - c) the pulse
 - d) teeth
7. ❤ Thomas Sydenham, called "the English Hippocrates," urged doctors above all to practice...
 - a) reading the patient's horoscope
 - b) treating patients only by letter
 - c) careful observation of the patient at the bedside
 - d) bloodletting for every patient
8. 🌿 In 1763 Edward Stone described treating fever with powdered bark of...
 - a) birch
 - b) oak
 - c) willow
 - d) pine
9. ⭐ The Brothers Hospitallers, an order running hospitals, was founded in the 16th century by...
 - a) St. Francis of Assisi
 - b) St. John of God
 - c) St. Benedict
 - d) St. Dominic

PHARMACY

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when pharmacies filled with new remedies. Paracelsus combined knowledge of medicines with alchemy and natural philosophy. In sixteenth-century Germany some of the first pharmacopoeias appeared – a pharmacopoeia is an official list of medicines. In 1560 Jean Nicot brought tobacco to France as a medicinal plant. In 1595 Marcin of Urzędów published his "Polish Herbal" on medicinal plants. The name "quinine" comes from the bark of the cinchona tree (quina). In the seventeenth century tea was first sold in pharmacies as a medicine. Doctors applied leeches to let blood. Around 1734 Bach composed a cantata about a daughter who cannot live without coffee. And in 1785 William Withering described using foxglove to treat swelling caused by heart failure. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏹 **Johann Sebastian Bach composed a humorous cantata about a daughter who cannot do without...**
 - a) tea
 - b) chocolate
 - c) coffee
 - d) wine
2. 🇵🇱 **The "Polish Herbal" by Marcin of Urzędów (1595) is an illustrated work about...**
 - a) stars
 - b) medicinal plants
 - c) noble coats of arms
 - d) songbirds
3. 📖 **A pharmacopoeia is...**
 - a) an herb stall in the market
 - b) a kind of coated pill
 - c) a skin disease of the hands
 - d) an official list of medicines
4. 🌿 **The name of the drug "quinine" comes from...**
 - a) the name of China
 - b) the word for "cold"
 - c) the bark of the cinchona tree (quina)
 - d) a doctor's name
5. 🩺 **Doctors in the 17th–18th centuries applied leeches to patients in order to...**
 - a) improve hearing
 - b) heal fractures
 - c) let blood
 - d) measure temperature
6. 🇫🇷 **In 1560 Jean Nicot, a French diplomat, brought tobacco to France as...**
 - a) a medicinal plant
 - b) a dye
 - c) a spice for meat
 - d) fodder for horses
7. 🍵 **Tea, imported to Europe in the 17th century, was at first sold in pharmacies as...**
 - a) a fabric dye
 - b) a spice
 - c) a medicine
 - d) a cleaning agent
8. 🌿 **In 1785 William Withering described using foxglove to treat...**
 - a) swelling caused by heart failure
 - b) smallpox
 - c) plague
 - d) malaria
9. ⭐ **In his medicine, Paracelsus combined knowledge of drugs with...**
 - a) fortune-telling with cards
 - b) military astrology
 - c) canon law
 - d) alchemy and natural philosophy

AGRICULTURE

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to the fields and farms. In his "St. John's Eve Song," Jan Kochanowski gave voice to maidens singing at a village festival on St. John's Eve. After harvest, grain was threshed by hand with flails. In 1675 Jakub Kazimierz Haur wrote the farming handbook "General Landowner's Economics." In 1701 Jethro Tull's horse-drawn seed drill sowed grain in even rows at a fixed depth. In the Norfolk crop rotation, clover and turnips replaced fallow because fodder crops fed cattle and improved the soil. In 1747 Andreas Marggraf discovered sugar in beets. In 1756 Frederick the Great ordered peasants to grow potatoes, and the Polish word "kartofel" was borrowed from German. On the Feast of Our Lady of Herbs, August 15, bouquets of herbs and ears of grain are blessed. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 Jan Kochanowski's "Midsummer Eve Song" (Pieśń świętojańska o Sobótce) is a cycle of songs sung by maidens...
 - a) at the royal court at Wawel
 - b) at a village festival on St. John's Eve
 - c) in a military camp
 - d) in a convent of Poor Clares
2. 🐎 Jethro Tull's horse-drawn seed drill (1701) sowed seed...
 - a) in even rows at a fixed depth
 - b) by scattering it by the handful
 - c) from a boat
 - d) into flowerpots
3. 🗣️ The Polish word "kartofel" (potato) was borrowed from...
 - a) Latin
 - b) Turkish
 - c) Spanish
 - d) German
4. 🔄 In the Norfolk four-course rotation (18th century), crops such as clover and turnips were sown instead of leaving fields fallow, because...
 - a) they were prettier
 - b) they grew only in winter
 - c) fodder crops fed cattle and improved the soil
 - d) they did not need harvesting
5. ✂️ After the harvest, grain was threshed by hand using...
 - a) flails
 - b) blacksmith's hammers
 - c) sieves
 - d) oars
6. 🌾 In 1756 Frederick the Great ordered peasants in Prussia to grow...
 - a) potatoes
 - b) tobacco
 - c) rice
 - d) grapevines
7. 💖 The farming guide "General Landowner's Economy" (1675) was written by...
 - a) Jakub Kazimierz Haur
 - b) Ignacy Krasicki
 - c) Mikołaj Rej
 - d) Jan Kochanowski
8. 🌱 In 1747 Andreas Marggraf discovered that beets contain...
 - a) sugar
 - b) oil
 - c) gold
 - d) salt
9. 🌟 On the feast of Our Lady of Herbs (the Assumption, August 15), people in Poland bless...
 - a) bouquets of herbs and ears of grain
 - b) palms
 - c) Christmas wafers
 - d) Easter eggs

VETERINARY SCIENCE

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to stud farms, kennels and the first veterinary schools. An old name for treating horses is hippiatry. Since the sixteenth century, Vienna has had the Spanish Riding School, where Lipizzaner horses perform a "ballet" to music. Arabian horses were brought to Polish studs because they were fast, agile and hardy. The patron saint of hunters is St. Hubert. Frederick the Great wished to be buried next to his beloved dogs (greyhounds). In the eighteenth century rinderpest epidemics decimated cattle. That is why in 1761 the world's first veterinary school opened in Lyon, and its founder was Claude Bourgelat. In 1766 George Stubbs published in "The Anatomy of the Horse" precise engravings of the horse's anatomy. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏇 **Lipizzaner horses perform a "ballet" to music at the famous Spanish Riding School in...**
 - a) Madrid
 - b) Paris
 - c) Kraków
 - d) Vienna
2. 👁️ **In "The Anatomy of the Horse" (1766) George Stubbs included...**
 - a) designs for carriages
 - b) maps of stud farms
 - c) precise engravings of the horse's anatomy
 - d) portraits of kings on horseback
3. 🗨️ **Hippiatry is an old name for...**
 - a) treating horses
 - b) dog breeding
 - c) horseback riding lessons
 - d) the blacksmith's craft
4. 🏛️ **The world's first veterinary school was founded in 1761 in...**
 - a) Lyon
 - b) Warsaw
 - c) Vienna
 - d) London
5. 🐾 **In the 16th–18th centuries Arabian horses were brought to Polish stud farms because they were...**
 - a) fast, agile and hardy
 - b) the calmest for plowing
 - c) the largest in the world
 - d) resistant to Siberian frost
6. 🦺 **The founder of the first veterinary school was...**
 - a) Claude Bourgelat
 - b) Carl Linnaeus
 - c) Edward Jenner
 - d) Louis Pasteur
7. ❤️ **Frederick the Great wished to be buried...**
 - a) on a battlefield
 - b) in a cathedral in Rome
 - c) next to his beloved dogs (greyhounds)
 - d) at sea
8. 🌿 **Epidemics of rinderpest in 18th-century Europe decimated...**
 - a) bees
 - b) racehorses
 - c) cattle
 - d) fish
9. ⭐ **Which saint is the patron of hunters?**
 - a) St. Hubert
 - b) St. Joseph
 - c) St. Florian
 - d) St. Christopher

ANSWERS

ANIMAL SCIENCE AND FISHERIES

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, to shepherds, fishermen and whalers. Alpine herders communicated by playing the alphorn. Merino sheep are famous for their fine, dense and soft wool, and for centuries Spain banned exporting merino sheep abroad. In the eighteenth century Robert Bakewell improved breeds by selecting the best animals for breeding. From the sixteenth century, huge catches of cod were taken on the Grand Banks off Newfoundland. Whalers hunted from rowboats, throwing harpoons, and train oil is oil rendered from whale and fish fat. In 1653 Izaak Walton wrote in "The Compleat Angler" about the peace and pleasure of fishing. And legend says that when people would not listen to St. Anthony of Padua, he preached to the fish. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏹 **Herders in the Alps called their cattle and communicated by playing...**
 - a) bagpipes
 - b) the alphorn
 - c) the organ
 - d) the lute
2. 🐏 **Merino sheep are famous for their...**
 - a) fine, dense and soft wool
 - b) lack of wool
 - c) long, coarse hair
 - d) black skin
3. 🐟 **Train oil (Polish: tran) is...**
 - a) a fishing net
 - b) oil rendered from whale and fish fat
 - c) a type of boat
 - d) a salt for preserving food
4. 🐑 **In the 18th century Robert Bakewell improved breeds of sheep and cattle by...**
 - a) crossing them with wild animals
 - b) selecting the best animals for breeding
 - c) feeding them only oats
 - d) keeping them in the dark
5. 🐳 **In the 17th–18th centuries whalers hunted whales...**
 - a) firing cannons from land
 - b) from rowboats, throwing harpoons
 - c) luring them with music
 - d) from the shore using nets
6. 🐑 **For centuries Spain prohibited...**
 - a) selling wool
 - b) breeding horses
 - c) catching fish
 - d) exporting merino sheep abroad
7. ❤️ **In "The Compleat Angler" (1653) Izaak Walton wrote about...**
 - a) the peace and pleasure of fishing
 - b) whaling
 - c) naval warfare
 - d) the salt trade
8. 🐟 **From the 16th century, on the Grand Banks off Newfoundland, Europeans caught huge numbers of...**
 - a) tuna
 - b) cod
 - c) salmon
 - d) eels
9. ⭐ **According to legend, when people would not listen to him, St. Anthony of Padua preached a sermon to...**
 - a) the horses
 - b) the fish
 - c) the birds
 - d) the wolves

OTHER (NATURE)

6. Renaissance – Age of Discovery

1500–1800 AD

Let's travel back to the age of the Renaissance and discovery, when plants and animals crossed the oceans. In the Columbian exchange, Europeans brought horses, cattle and wheat to America. Tulips reached Europe from the Ottoman Empire (Turkey). Coffee originally comes from Ethiopia, and it reached Europe via Yemen. The dahlia is named after the Swedish botanist Anders Dahl. In 1650 Archbishop James Ussher calculated from the Bible that the world was created in 4004 BC. In 1742 Anders Celsius, in his original scale, marked the boiling point of water as 0 degrees. In 1786 Jacques Balmat and Michel Paccard were the first to climb Mont Blanc. In 1789 Gilbert White described observations of nature in his parish of Selborne. And in 1798 Haydn told in his oratorio "The Creation" of the biblical creation of the world and nature. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Joseph Haydn's oratorio "The Creation" (1798) tells of...**
 - a) Columbus's voyage to the New World
 - b) the biblical creation of the world and nature
 - c) the Trojan War
 - d) the life of Mozart
2. 🌷 **The tulips that caused "tulip mania" in Holland came to Europe from...**
 - a) the Ottoman Empire (Turkey)
 - b) Japan
 - c) Australia
 - d) America
3. 📖 **The name of the dahlia flower comes from the surname of...**
 - a) an Aztec god
 - b) a Spanish king
 - c) a Greek philosopher
 - d) the Swedish botanist Anders Dahl
4. 🌡️ **In the original version of his scale (1742), Anders Celsius marked 0 degrees as...**
 - a) body temperature
 - b) the coldest day in Uppsala
 - c) the boiling point of water
 - d) the freezing point of water
5. 🏔️ **Mont Blanc was first climbed in 1786 by...**
 - a) Cook and Banks
 - b) Newton and Halley
 - c) Jacques Balmat and Michel Paccard
 - d) Humboldt and Bonpland
6. 🌎 **In the Columbian Exchange, Europeans brought to America, among other things,...**
 - a) corn and potatoes
 - b) horses, cattle and wheat
 - c) turkeys and tomatoes
 - d) cocoa and tobacco
7. 💖 **In "The Natural History of Selborne" (1789) Gilbert White described...**
 - a) the building of steam engines
 - b) an expedition to Greenland's glaciers
 - c) observations of nature in his parish
 - d) life at King George's court
8. ☕ **Coffee, which conquered Europe in the 17th century, originally comes from...**
 - a) China
 - b) Ethiopia (via Yemen)
 - c) Brazil
 - d) India
9. ⭐ **In 1650 Archbishop James Ussher calculated from the Bible that the world was created in...**
 - a) AD 1
 - b) 13.8 billion years ago
 - c) 4004 BC
 - d) 1000 BC
