

ARCHAEOLOGY

9. Cold War

1950–1990 AD

Let's travel back to the Cold War, when archaeologists uncovered treasures at a dizzying pace. Around 1949 Willard Libby developed radiocarbon (C-14) dating, which earned him a Nobel Prize. In 1961 the 17th-century warship Vasa, which sank on its maiden voyage, was raised from the bottom of Stockholm's harbor. In the 1960s Kazimierz Michałowski led rescue excavations at Faras because the Aswan Dam reservoir was about to flood it. For the same reason, the temples of Abu Simbel were cut into blocks and moved higher up. The Maya script was largely deciphered thanks to the work of Yuri Knorozov. In 1972 UNESCO adopted the World Heritage Convention to protect the most valuable monuments and natural sites. In 1974 Chinese farmers digging a well stumbled upon the Terracotta Army. In 1978 Mary Leakey discovered footprints 3.6 million years old at Laetoli, and in 1986 at Jiahu in China flutes made of crane bones, about 9,000 years old, were found. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 In 1986, at Jiahu in China, archaeologists discovered, from about 9,000 years ago...
 - a) water organs
 - b) bronze drums
 - c) flutes made of crane bones
 - d) wooden guitars
2. 👁 In 1974, Chinese farmers digging a well stumbled upon...
 - a) Stonehenge
 - b) the Terracotta Army
 - c) the ruins of Troy
 - d) Tutankhamun's tomb
3. 🗨 Maya writing was largely deciphered between the 1950s and 1980s thanks to the work of, among others...
 - a) Arthur Evans
 - b) Yuri Knorozov
 - c) Heinrich Schliemann
 - d) Howard Carter
4. 🚢 In 1961, a 17th-century warship was raised from the bottom of Stockholm harbor. It was the...
 - a) Bounty
 - b) Titanic
 - c) Vasa
 - d) Victoria
5. ⚡ In the 1960s, Kazimierz Michałowski led rescue excavations at Faras because...
 - a) a volcano had erupted there
 - b) the town was going to be demolished
 - c) the Aswan Dam reservoir was about to flood it
 - d) an airport was to be built there
6. 🏛 In the 1960s, the temples of Abu Simbel were...
 - a) cut into blocks and moved higher up
 - b) demolished
 - c) sunk underwater
 - d) sold to the USA
7. 💖 In 1978, at Laetoli in Tanzania, Mary Leakey discovered...
 - a) a dinosaur skeleton
 - b) footprints 3.6 million years old
 - c) a Roman mosaic
 - d) a pharaoh's golden crown
8. 🌿 The radiocarbon (C-14) dating method was developed around 1949 by...
 - a) Albert Einstein
 - b) Enrico Fermi
 - c) Carl Sagan
 - d) Willard Libby
9. ☆ UNESCO's World Heritage Convention was adopted in 1972 in order to...
 - a) sell off historical monuments
 - b) ban archaeology
 - c) build museums in outer space
 - d) protect the most valuable monuments and natural sites

PHILOSOPHY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when philosophers asked about truth, evil, and the meaning of life. In "The Myth of Sisyphus," Albert Camus wrote that one must imagine Sisyphus happy. Karl Popper held that a theory is scientific if we can try to refute it by experiment. In 1952 John Cage composed "4'33"," in which the pianist sits in silence at the piano. Describing the Eichmann trial in 1961, Hannah Arendt coined the phrase "the banality of evil." In 1962 Thomas Kuhn described how science changes through scientific revolutions and new paradigms. Martin Luther King fought for African Americans' rights through peaceful marches and protests. After 1968 Leszek Kołakowski had to leave Poland. Józef Tischner titled his book about Solidarity "The Ethics of Solidarity," and in the 1981 encyclical "Laborem exercens" John Paul II wrote about the dignity of human work. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In 1952, John Cage composed the piece "4'33"," in which the pianist...
 - a) plays as loudly as possible
 - b) sits in silence at the piano
 - c) sings an opera
 - d) dances
2. 👁 After 1968, Polish philosopher Leszek Kołakowski had to...
 - a) become a minister
 - b) leave Poland
 - c) move to the countryside
 - d) change his name
3. 🗞 Describing the Eichmann trial (1961), Hannah Arendt used the phrase...
 - a) the social contract
 - b) the beauty of goodness
 - c) the will to power
 - d) the banality of evil
4. ➡ Karl Popper believed that a theory is scientific if it is possible to...
 - a) believe in it
 - b) try to refute it by experiment
 - c) buy it
 - d) sing it
5. ⚔ Martin Luther King Jr. fought for the rights of African Americans through...
 - a) assassinations
 - b) fleeing the country
 - c) peaceful marches and protests
 - d) civil war
6. 🧑 Józef Tischner titled his book about the Solidarity movement...
 - a) "The Ethics of Solidarity"
 - b) "Confessions"
 - c) "Thus Spoke Zarathustra"
 - d) "The Republic"
7. ❤ In "The Myth of Sisyphus," Albert Camus wrote that "one must imagine Sisyphus..."
 - a) rich
 - b) lonely
 - c) happy
 - d) sad
8. 🌿 In his 1962 book, Thomas Kuhn described how science changes through...
 - a) votes
 - b) decisions of kings
 - c) chance
 - d) scientific revolutions and new paradigms
9. ☆ In the encyclical "Laborem exercens" (1981), John Paul II wrote about the dignity of...
 - a) machines
 - b) kings
 - c) human work
 - d) animals

HISTORY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when the world was split into two camps. In 1961 the Berlin Wall was built. A year later came the Cuban Missile Crisis – a standoff between the USA and the USSR over Soviet missiles in Cuba. In 1980, striking workers at the Gdańsk Shipyard sang "God Save Poland" and patriotic songs, and Jerzy Janiszewski designed the "Solidarność" logo. Solidarity's leader, Lech Wałęsa, was an electrician by trade. On December 13, 1981, martial law was imposed in Poland. In 1986 disaster struck a nuclear power plant at Chernobyl. In 1989 the Round Table talks took place, and on June 4, 1989, Poland held its first partly free elections. That same year, 1989, the Berlin Wall fell – so it had stood for 28 years. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏴 During the 1980 strikes at the Gdańsk Shipyard, workers sang, among other things...
 - a) "The Internationale" in praise of the regime
 - b) the anthem of the USSR
 - c) only Beatles songs
 - d) "God Save Poland" and patriotic songs
2. 👁 The Berlin Wall was built in 1961 and fell in...
 - a) 1999
 - b) 1965
 - c) 1971
 - d) 1989
3. 🗨 The "Solidarność" logo was designed in 1980 by...
 - a) Lech Wałęsa
 - b) Jerzy Janiszewski
 - c) Andrzej Wajda
 - d) Czesław Miłosz
4. 🇺🇸 The Berlin Wall stood from 1961 to 1989. For how many years?

5. ⚔ Martial law was imposed in Poland on...
 - a) August 31, 1980
 - b) December 13, 1981
 - c) June 4, 1989
 - d) September 1, 1939
6. 🗣 In what year did the Round Table talks take place in Poland?
 - a) 1991
 - b) 1981
 - c) 1989
 - d) 1980
7. 💖 Lech Wałęsa, the leader of Solidarity, was by trade...
 - a) a pilot
 - b) a teacher
 - c) a doctor
 - d) an electrician
8. 🍃 The Chernobyl disaster (1986) happened at...
 - a) a nuclear power plant
 - b) a coal mine
 - c) a chocolate factory
 - d) a port
9. ⭐ The first partly free elections in Poland were held on...
 - a) June 4, 1989
 - b) November 11, 1918
 - c) December 13, 1981
 - d) May 1, 2004

LINGUISTICS

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when words could be weapons. Noam Chomsky believed that people are born with an innate ability to learn language. Communist Poland had its "newspeak" – a propaganda language that blurred the truth with fine words. Censors on Mysia Street in Warsaw removed content inconvenient for the regime, while underground publishers printed on duplicators and screen printing. Radio Free Europe broadcast to Poland from Munich. In 1969 these words were spoken on the Moon: "That's one small step for man, one giant leap for mankind." In 1978 Jacek Kaczmarski's song "Walls" became an anthem of the democratic opposition. In 1979 John Paul II prayed: "Let your Spirit descend and renew the face of the earth. This land!" And Czesław Miłosz, the 1980 Nobel laureate, wrote his poems in Polish while living in the USA. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 Jacek Kaczmarski's song "Walls" (1978) became...
 - a) a radio commercial
 - b) an anthem of the democratic opposition
 - c) a song about sports
 - d) the anthem of communist Poland
2. 👁 Noam Chomsky believed that people are born with an innate ability to...
 - a) read minds
 - b) learn language
 - c) fly
 - d) count to a million
3. 🗨 "Newspeak" in communist Poland was a propaganda language that...
 - a) was a computer language
 - b) was a military code
 - c) blurred the truth with fine words
 - d) was a highland dialect
4. 🇵🇱 The censorship office in communist Poland was on Mysia Street in Warsaw, and it...
 - a) removed content inconvenient for the regime
 - b) taught children to read
 - c) translated books
 - d) checked spelling
5. ✂ Underground publishers in communist Poland printed books and newspapers using...
 - a) laser printers
 - b) tablets
 - c) duplicators and screen printing
 - d) papyrus
6. 📻 Radio Free Europe broadcast to Poland from...
 - a) Moscow
 - b) Munich
 - c) Beijing
 - d) Warsaw
7. ❤ Czesław Miłosz, the 1980 Nobel laureate, wrote his poems in Polish while living in...
 - a) Egypt
 - b) China
 - c) the USA
 - d) Poland
8. 🌱 The first words spoken on the Moon (1969) were: "That's one small step for man, one..."
 - a) huge step for America
 - b) hard walk in space
 - c) beautiful view from above
 - d) giant leap for mankind
9. ☆ John Paul II's words from 1979: "Let your Spirit descend and renew the face of..."
 - a) our hearts
 - b) the world today
 - c) all of Europe
 - d) the earth. This land!

LITERARY STUDIES

9. Cold War

1950–1990 AD

Let's go back to the Cold War and step into the library. "Stones for the Rampart" by Aleksander Kamiński, a tale about scouts of the Grey Ranks, was long censored in communist Poland. From 1957 came Szklarski's series in which Tomek Wilkowski traveled to every continent. In 1961 Stanisław Lem published "Solaris," a novel about a planet covered by a living ocean. Bulgakov's "The Master and Margarita" appeared in the USSR only in the 1960s, because censorship would not allow it earlier. In "Silent Spring" (1962), Rachel Carson warned against pesticides killing birds. In 1967 Gabriel García Márquez described, in "One Hundred Years of Solitude," a family from the town of Macondo. In "The Gulag Archipelago," Aleksandr Solzhenitsyn described the system of labor camps in the USSR. Zbigniew Herbert, in "The Envoy of Mr. Cogito," urges: "Be faithful. Go." And Wisława Szymborska wrote poems such as "Nothing Twice" in communist Poland. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 Wisława Szymborska won the Nobel Prize in 1996, but many of her poems were written in communist times, for example...
 - a) "The Locomotive"
 - b) "Pan Tadeusz"
 - c) "Ferdydurke"
 - d) "Nothing Twice"
2. 🌊 Stanisław Lem wrote a novel about a mysterious planet covered by a living ocean, titled...
 - a) "Solaris"
 - b) "The Hobbit"
 - c) "Dune"
 - d) "Nineteen Eighty-Four"
3. 📖 In "The Gulag Archipelago," Aleksandr Solzhenitsyn described...
 - a) life in Paris
 - b) the system of labor camps in the USSR
 - c) the space race
 - d) a journey to the Pole
4. 📖 Bulgakov's "The Master and Margarita" was not published in the USSR until the 1960s because...
 - a) it was written in English
 - b) the author hid it in a forest
 - c) it was too short
 - d) censorship would not allow it
5. 🚀 Tomek Wilkowski, the hero of Szklarski's novels, traveled across...
 - a) Mars
 - b) the Moon
 - c) Poland only
 - d) every continent
6. 🧑 Aleksander Kamiński's "Stones for the Rampart" tells the story of...
 - a) astronauts
 - b) Jagiełło's knights
 - c) pirates
 - d) scouts of the Grey Ranks
7. ❤️ In "One Hundred Years of Solitude" (1967), Gabriel García Márquez described the fortunes of a family from the town of...
 - a) Sosnowiec
 - b) Macondo
 - c) Hogsmeade
 - d) Lipce
8. 🌿 In "Silent Spring" (1962), Rachel Carson warned against...
 - a) space flights
 - b) pesticides killing birds
 - c) smog in cities
 - d) nuclear war
9. ☆ In his poem "The Envoy of Mr. Cogito," Zbigniew Herbert urges: "Be..."
 - a) happy. Sleep
 - b) fast. Run
 - c) faithful. Go
 - d) rich. Buy

CULTURE AND RELIGION

9. Cold War

1950–1990 AD

Let's go back to the Cold War, full of music, art, and faith. In the 1950s Elvis Presley, called "the King," popularized rock and roll, and around 1960 the Beatles were formed in Liverpool. In 1961 Yuri Gagarin became the first human in space. Andy Warhol was famous for paintings of soup cans and portraits of stars, and Krzysztof Komeda was a star of Polish jazz. Since 1963 the city of Opole has hosted a festival of Polish song. From 1962 to 1965 – that is, 1962–1965 – the Second Vatican Council was in session. In 1966 Poland celebrated the Millennium of its Baptism. In 1978 Karol Wojtyła was elected pope, and in 1979 he made his first pilgrimage to Poland. Also in 1979 Mother Teresa of Calcutta received the Nobel Peace Prize for caring for the poorest of the poor. At his Masses for the Homeland, Father Jerzy Popiełuszko said: "Overcome evil with good." Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 Which city did the Beatles come from?
 - a) Liverpool
 - b) London
 - c) Manchester
 - d) Dublin
2. 👁️ Andy Warhol was famous for paintings of...
 - a) mountain landscapes
 - b) soup cans and portraits of stars
 - c) icons
 - d) medieval knights
3. 🗨️ John Paul II's first pilgrimage to Poland took place in...
 - a) 1989
 - b) 1969
 - c) 1979
 - d) 1999
4. 📖 The Opole Festival, held since 1963, is a festival of...
 - a) books
 - b) folk dance
 - c) Polish song
 - d) films
5. 🎸 Rock and roll was popularized in the 1950s by Elvis Presley, nicknamed...
 - a) "the Master"
 - b) "the King"
 - c) "the Emperor"
 - d) "the Prince"
6. 🙏 The Millennium of the Baptism of Poland was celebrated in...
 - a) 2000
 - b) 1966
 - c) 1918
 - d) 1000
7. ❤️ Father Jerzy Popiełuszko celebrated "Masses for the Homeland," at which he said: "Overcome evil..."
 - a) with force
 - b) with evil
 - c) by silence
 - d) with good
8. 🚀 The first man in space, Yuri Gagarin, flew in...
 - a) 1961
 - b) 1971
 - c) 1951
 - d) 1981
9. ⭐ In which years was the Second Vatican Council held?
 - a) 1978–1981
 - b) 1869–1870
 - c) 1545–1563
 - d) 1962–1965

ECONOMICS AND FINANCE

9. Cold War

1950–1990 AD

Let's go back to the Cold War and look into people's wallets. A centrally planned economy is a system in which the state decides what to produce and how much. In communist Poland you had to stand in long lines for many goods, and at the Pewex chain you paid with dollars and special vouchers. From 1973 Poland produced the "Maluch," the Fiat 126p. That same year the oil crisis caused gasoline prices to soar, and Pink Floyd's song "Money" opened with the sound of a cash register and coins. In the West, the EEC, the forerunner of the European Union, had existed since 1957. In the 1970s Muhammad Yunus began giving microloans to poor people in Bangladesh. And in 1990 the Balcerowicz Plan was meant to help Poland move to a market economy. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 Pink Floyd's song "Money" (1973) begins with the sound of...
 - a) church bells
 - b) a car engine
 - c) birdsong
 - d) a cash register and coins
2. 👁️ In communist Poland, many goods required standing in...
 - a) long lines
 - b) movie theaters
 - c) airplanes
 - d) online stores
3. 🗨️ Pewex was a chain of stores in communist Poland where you paid with...
 - a) Polish złoty only
 - b) grain
 - c) credit cards
 - d) dollars and special vouchers
4. 🏠 A centrally planned economy is a system in which...
 - a) everyone has their own store
 - b) the state decides what to produce and how much
 - c) the market sets prices
 - d) there are no factories
5. 🚗 The "Maluch," or Fiat 126p, was produced in Poland from...
 - a) 1993
 - b) 1953
 - c) 1973
 - d) 1963
6. 🌐 The EEC, or European Economic Community (1957), was the predecessor of the...
 - a) NATO
 - b) Warsaw Pact
 - c) European Union
 - d) UN
7. ❤️ The Balcerowicz Plan (1990) was meant to...
 - a) close the borders
 - b) move to a market economy
 - c) introduce ration cards
 - d) abolish money
8. 🌿 The 1973 oil crisis caused...
 - a) gasoline prices to soar
 - b) the invention of the bicycle
 - c) oil to become free
 - d) cars to disappear
9. ⭐ In the 1970s, Muhammad Yunus began giving poor people in Bangladesh...
 - a) microloans
 - b) free cars
 - c) plane tickets
 - d) stock shares

PSYCHOLOGY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when psychologists peered into the human mind. In 1951 Solomon Asch's line experiment showed that people often give in to the group's opinion. In 1961 Stanley Milgram studied obedience to authority. Research from the 1950s and 60s found that music in stores influences customer behavior. Abraham Maslow and Carl Rogers developed humanistic psychology. With his "marshmallow" test, Walter Mischel studied children's patience and delayed gratification. Harry Harlow showed that young monkeys need, above all, closeness and warmth. Aaron Beck created a therapy that teaches people to change negative ways of thinking. The Polish psychiatrist Kazimierz Dąbrowski described the theory of positive disintegration. And in 1969 Elisabeth Kübler-Ross described the stages people go through when facing loss and grief. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Research in the 1950s and 1960s showed that music in stores...**
 - a) influences customer behavior
 - b) scares everyone away
 - c) is illegal
 - d) makes no difference
2. 👁 **Solomon Asch's line experiment (1951) showed that people...**
 - a) often give in to the group's opinion
 - b) always tell the truth
 - c) cannot see colors
 - d) cannot count
3. 🗨 **Abraham Maslow and Carl Rogers created the...**
 - a) cosmic psychology
 - b) behavioral psychology
 - c) humanistic psychology
 - d) military psychology
4. 🧑🏫 **Stanley Milgram's experiment (1961) studied...**
 - a) animal memory
 - b) the taste of food
 - c) obedience to authority
 - d) children's sleep
5. 🧒 **Walter Mischel's "marshmallow test" from the 1960s studied children's...**
 - a) patience and delayed gratification
 - b) muscle strength
 - c) musical ear
 - d) running speed
6. 🧑🏫 **Kazimierz Dąbrowski, a Polish psychiatrist, described the theory of...**
 - a) multiple intelligences
 - b) the hierarchy of needs
 - c) positive disintegration
 - d) conditioned reflexes
7. 💖 **In the 1960s, Aaron Beck created a therapy that teaches people to change...**
 - a) their height
 - b) their eye color
 - c) their handwriting
 - d) negative ways of thinking
8. 🍌 **In his experiments with baby monkeys, Harry Harlow showed that the young need above all...**
 - a) noise
 - b) solitude
 - c) closeness and warmth
 - d) only food
9. ☆ **In 1969, Elisabeth Kübler-Ross described the stages people go through...**
 - a) at work
 - b) when facing loss and grief
 - c) at school
 - d) on vacation

EDUCATION

9. Cold War

1950–1990 AD

Let's go back to the Cold War and peek into the schools. Communist Poland ran the "A Thousand Schools for the Millennium" campaign, building schools to mark 1,000 years of the Polish state. In Japan, the Suzuki method taught children the violin from a very young age. Paulo Freire believed a student is not an empty vessel but an active participant in learning. From 1969 "Sesame Street" taught children letters and numbers with puppets. Polish children watched "Teleranek" on Sunday mornings. From 1977 to 1981 the Flying University offered independent lectures outside state control. In the 1980s the first school computers were used for learning programming in BASIC and Logo. In 1983 Howard Gardner described the theory of multiple intelligences. And in 1989 the UN Convention on the Rights of the Child was adopted – it was initiated by Poland. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **The Suzuki method (Japan) is used to teach...**
 - a) church organ
 - b) drums for adults
 - c) electric guitar
 - d) violin from a very young age
2. 👁️ **"Teleranek," a children's program on Polish Television, was broadcast on...**
 - a) Friday nights
 - b) Monday afternoons
 - c) holidays only
 - d) Sunday mornings
3. 🗣️ **"Sesame Street" (1969) taught children...**
 - a) programming
 - b) cooking
 - c) driving
 - d) letters and numbers with puppets
4. 🧮 **In 1983, Howard Gardner described the theory of...**
 - a) evolution
 - b) the Big Bang
 - c) relativity
 - d) multiple intelligences
5. 🚦 **Paulo Freire believed that a student should not be an "empty vessel" but...**
 - a) a memorizing machine
 - b) a spectator
 - c) an active participant in learning
 - d) a passive listener
6. 🏫 **"A Thousand Schools for the Millennium" was a school-building campaign in communist Poland marking...**
 - a) the end of the war
 - b) 1,000 years of the Polish state
 - c) the Olympic Games
 - d) Gagarin's flight
7. ❤️ **The UN Convention on the Rights of the Child (1989) was created on the initiative of...**
 - a) Poland
 - b) China
 - c) Brazil
 - d) the USA
8. 🍃 **The first computers in schools, e.g. in the 1980s, were used to teach...**
 - a) online gaming
 - b) programming in BASIC and Logo
 - c) emailing
 - d) using the internet
9. 🌟 **The Flying University of 1977–1981 was...**
 - a) a university on an airplane
 - b) a military academy
 - c) a flight school
 - d) independent lectures outside state control

SOCIOLOGY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when people began to demand freedom out loud. In 1955 Rosa Parks refused to give up her seat to a white passenger on a bus. South Africa lived under apartheid – separating people by skin color. The symbol of the 1960s peace movement was the peace sign, and the Woodstock festival in 1969 drew about 400,000 people. In communist Poland many young people quietly listened to Radio Free Europe. In the 1980s the slogan "There is no freedom without Solidarity" rang out. Wrocław's Orange Alternative mocked the authorities with happenings featuring dwarves. In 1989 the "Baltic Way" formed a human chain across three countries, and Czechoslovakia went through its "Velvet Revolution." Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎸 **The Woodstock Festival (1969) drew about...**
 - a) 40 million people
 - b) 4,000 people
 - c) 400,000 people
 - d) 400 people
2. 🕊 **The symbol of the peace movement in the 1960s was the...**
 - a) crown
 - b) anchor
 - c) hammer and sickle
 - d) peace sign
3. 🗣 **The slogan "There is no freedom without Solidarity" dates from the...**
 - a) 1980s
 - b) 1850s
 - c) 1920s
 - d) 2000s
4. 🚫 **In 1955, Rosa Parks refused to...**
 - a) give up her seat to a white passenger
 - b) work in a factory
 - c) leave her home
 - d) pay for her ticket
5. 🇿🇦 **Apartheid in South Africa meant...**
 - a) separating people by skin color
 - b) shared schools for all
 - c) equal pay
 - d) free and equal elections
6. 🚢 **The "Baltic Way" (1989) was...**
 - a) a ship cruise on the Baltic
 - b) a human chain across three countries
 - c) a grocery store chain
 - d) a cycling race
7. ❤ **In communist Poland, many young people secretly listened to...**
 - a) podcasts
 - b) Spotify
 - c) Radio Free Europe
 - d) only state radio
8. 🍂 **The "Orange Alternative" in Wrocław protested against the regime through...**
 - a) bombs
 - b) hunger strikes
 - c) fleeing abroad
 - d) happenings featuring dwarves
9. 🌟 **The "Velvet Revolution" (1989), a peaceful fall of communism, took place in...**
 - a) North Korea
 - b) Czechoslovakia
 - c) China
 - d) Cuba

LAW

9. Cold War

1950–1990 AD

Let's go back to the Cold War and take a look at the law. In 1950 the European Convention on Human Rights established the European Court of Human Rights. The 1959 Antarctic Treaty states that this continent is for peace and science only. In 1973 the Washington Convention, CITES, began protecting endangered species from trade. The 1975 Helsinki Final Act committed states to respect human rights. In 1976 KOR was founded to help persecuted workers. The August Agreements of 1980 were signed with a pen bearing the Pope's image. In 1987 Ewa Łętowska became Poland's first Ombudsman. The death penalty was suspended in 1988 and abolished in 1997. And ZAiKS protects the rights of authors, e.g. composers. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **ZAIKS is an association that...**
 - a) protects the rights of authors, e.g. composers
 - b) makes musical instruments
 - c) organizes parliamentary elections
 - d) teaches children to sing
2. 👁️ **The August Agreements of 1980 were signed with a pen...**
 - a) made of gold
 - b) made of bone
 - c) with no ink
 - d) bearing the Pope's image
3. 🗨️ **The Helsinki Final Act of the CSCE (1975) committed states, among other things, to respect...**
 - a) copyright
 - b) the rules of soccer
 - c) the law of the sea
 - d) human rights
4. 🏳️ **The European Convention on Human Rights (1950) established the...**
 - a) European Union
 - b) NATO alliance
 - c) European Court of Human Rights
 - d) UEFA
5. 🌐 **The Antarctic Treaty (1959) states that this continent...**
 - a) is a military testing ground
 - b) is for peace and science only
 - c) is closed to people
 - d) belongs to one country
6. 🧑 **The Workers' Defense Committee (KOR) was founded in 1976 to...**
 - a) build factories
 - b) run the army
 - c) organize the Olympics
 - d) help persecuted workers
7. ❤️ **Poland's Ombudsman (Commissioner for Human Rights) office was created in 1987. The first Ombudsman was...**
 - a) Irena Sendler
 - b) Ewa Łętowska
 - c) Wisława Szymborska
 - d) Hanna Suchocka
8. 🌿 **The Washington Convention, CITES (1973), protects...**
 - a) copyright
 - b) national borders
 - c) endangered species from trade
 - d) workers' rights
9. ⭐ **The death penalty in Poland was suspended in 1988 and abolished in...**
 - a) 1918
 - b) 1997
 - c) 1950
 - d) 2020

OTHER (HUMANITIES)

9. Cold War

1950–1990 AD

Let's go back to the Cold War and look at everyday life in communist Poland. In 1955 Warsaw's Palace of Culture and Science opened – a "gift" from the USSR. Irena Santor, Czesław Niemen, and Anna German were stars of Polish pop music of the communist era. From 1962 the cartoon about Bolek and Lolek was made, and "Four Tank-Men and a Dog" told of a tank crew and their dog Szarik. Gagarin flew into space in 1961 and Armstrong stood on the Moon in 1969 – 8 years apart. In 1968, during the Apollo 8 mission, the "Earthrise" photo was taken. In 1980 Stanisław Bareja made "Teddy Bear," a comedy mocking the absurdities of communist Poland. In 1981 John Paul II survived an assassination attempt and later forgave his attacker. In the 1980s Krzysztof Kieślowski filmed "Dekalog," a series about the Ten Commandments. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏆 Irena Santor, Czesław Niemen, Anna German – these were stars of...
 - a) prewar cabaret
 - b) silent film
 - c) Italian opera
 - d) Polish pop music of the communist era
2. 👁 The Palace of Culture and Science in Warsaw was a "gift" from...
 - a) the Vatican
 - b) France
 - c) the USA
 - d) the USSR
3. 🐻 Stanisław Bareja's "Teddy Bear" ("Miś," 1980) is a comedy mocking...
 - a) outer space
 - b) the absurdities of communist Poland
 - c) the Wild West
 - d) the Middle Ages
4. 🚀 Neil Armstrong stood on the Moon in 1969, and Gagarin flew into space in 1961. How many years apart were these events?

5. ⚡ The cult children's animated series about Bolek and...
 - a) Tolek
 - b) Jacek
 - c) Lolek
 - d) Placek
6. 🐶 "Four Tank-Men and a Dog" is a TV series about...
 - a) a tank crew and their dog Szarik
 - b) knights
 - c) pirates
 - d) cosmonauts
7. ❤ In the 1980s, Krzysztof Kieślowski made "The Decalogue," a series of films about...
 - a) the Ten Commandments
 - b) ten wars
 - c) ten kings of Poland
 - d) ten planets
8. 🌿 The photo "Earthrise" was taken in 1968 during the mission...
 - a) Gemini 1
 - b) Sputnik
 - c) Vostok 1
 - d) Apollo 8
9. ☆ John Paul II survived an assassination attempt in St. Peter's Square in 1981. Later he...
 - a) forgave his attacker
 - b) moved to Poland
 - c) left Rome
 - d) resigned

1. d 2. d 3. b 4. 8 5. c 6. a 7. a 8. d 9. a

A N S W E R S

ARCHITECTURE AND URBAN PLANNING

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when architects designed whole new cities. After the war homes were scarce, so blocks built from large panels – prefabricated concrete elements – went up en masse because they quickly provided homes for many families. Nowa Huta in Kraków was meant to be a model town for the steelworks' workers, and in 1977, after years of effort, its residents built the Ark of the Lord church. In 1960 Brasília was built, planned in the shape of an airplane or a bird. After the 1963 earthquake, Skopje was rebuilt according to a plan by Japanese architect Kenzō Tange. In 1973 the Sydney Opera House opened, with a roof resembling sails or shells. In 1976 Toronto's CN Tower rose – for over 30 years the world's tallest freestanding structure. And in 1977 the Centre Pompidou in Paris put its pipes and utilities on the outside of the building. Remember these details – I'll ask you about them in a moment.

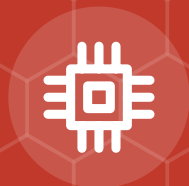

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **The Sydney Opera House (opened in 1973) has a roof that resembles...**
 - a) a cube
 - b) a mosque dome
 - c) sails or shells
 - d) a pyramid
2. 🗺️ **Brasília, the new capital of Brazil built in 1960, was planned in the shape of...**
 - a) an airplane or a bird
 - b) a square
 - c) a snail
 - d) a star
3. 🏠 **Large-panel construction is a technology for building apartment blocks from...**
 - a) glass
 - b) sun-dried bricks
 - c) prefabricated concrete elements
 - d) wooden logs
4. 🏠 **Large-panel apartment blocks were built en masse because they...**
 - a) were the most beautiful
 - b) quickly provided homes for many families
 - c) followed tradition
 - d) were the cheapest to heat
5. 🏙️ **For more than 30 years, Toronto's CN Tower (1976) was...**
 - a) the world's tallest freestanding structure
 - b) the world's lowest building
 - c) a bridge
 - d) a stadium
6. 🏭 **Nowa Huta, a district of Kraków, was meant to be a model town for...**
 - a) farmers
 - b) students
 - c) the steelworks' workers
 - d) artists
7. ❤️ **In 1977, after years of effort, the residents of Nowa Huta built a church called the...**
 - a) St. Mary's Basilica
 - b) Ark of the Lord
 - c) Wawel Cathedral
 - d) St. Anne's Church
8. 🌿 **The Centre Pompidou in Paris (1977) has its pipes and utilities placed...**
 - a) inside the walls
 - b) in the basement
 - c) underground
 - d) on the outside of the building
9. ⭐ **After the 1963 earthquake in Skopje, the city was rebuilt according to a plan by...**
 - a) a Roman emperor
 - b) NASA
 - c) Japanese architect Kenzō Tange
 - d) Le Corbusier in 1900

1. c 2. a 3. c 4. b 5. a 6. c 7. b 8. d 9. c

A N S W E R S

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when electronics changed the world. In 1958 Jack Kilby built the first integrated circuit. In that same year, 1958, the first electronic pacemaker was implanted, and solar panels powered the Vanguard 1 satellite. In 1960 the first laser was built – its name is an acronym of English words about amplifying light. In 1964 the Moog synthesizer produced sounds using electronic circuits. In 1965 Moore's law was stated: the number of transistors on integrated circuits doubles about every two years. In 1973 Martin Cooper of Motorola unveiled the first mobile phone. In the 1970s Jacek Karpiński built the K-202 minicomputer. And in 1979 the Sony Walkman let people listen to cassettes on the go. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The Moog synthesizer (1964) produced sounds using...
 - a) water
 - b) strings
 - c) electronic circuits
 - d) organ pipes
2. 👁 The first integrated circuit (1958) was built by...
 - a) Jack Kilby
 - b) Thomas Edison
 - c) Nikola Tesla
 - d) Steve Jobs
3. 🗨 The word "laser" is an acronym of English words about...
 - a) mirrored glass
 - b) fast light
 - c) a colored beam
 - d) amplifying light
4. ➡ Moore's law (1965) says that the number of transistors on integrated circuits...
 - a) stays constant
 - b) doubles about every two years
 - c) shrinks every year
 - d) grows by one
5. 🎧 The Sony Walkman (1979) let you...
 - a) make phone calls
 - b) watch movies
 - c) play games
 - d) listen to cassettes on the go
6. 📞 The first mobile phone (1973) was presented by...
 - a) Bill Gates
 - b) Steve Jobs
 - c) Martin Cooper of Motorola
 - d) Alexander Bell
7. ❤ In the 1970s, Jacek Karpiński built the minicomputer...
 - a) Commodore 64
 - b) Apple II
 - c) K-202
 - d) ZX Spectrum
8. 🌿 In 1958, the first solar panels powered the satellite...
 - a) Sputnik 1
 - b) Hubble
 - c) ISS
 - d) Vanguard 1
9. ⭐ An electronic pacemaker was first implanted in...
 - a) 1958
 - b) 1908
 - c) 1938
 - d) 1998

COMPUTER SCIENCE AND TELECOMMUNICATIONS

**9. Cold War**

1950–1990 AD

Let's go back to the Cold War, when computing was being born. Computers calculate in the binary system, which uses only the digits 0 and 1. In 1960 the weather satellite TIROS-1 made it possible to photograph clouds from space. In 1962 the Telstar satellite first carried a live television picture across the Atlantic. In 1968 Douglas Engelbart demonstrated the computer mouse. In 1969 ARPANET was created, the ancestor of the internet. In 1971 Ray Tomlinson sent the first e-mail. In 1972 the video game Pong conquered the world. In 1982 the first virus to spread beyond the lab, "Elk Cloner," was written by a 15-year-old student. And in 1984, in the USSR, Alexey Pajitnov invented Tetris. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The first email was sent in 1971 by...
 - a) Bill Gates
 - b) Tim Berners-Lee
 - c) Ray Tomlinson
 - d) Alan Turing
2. 👁 The computer mouse was presented in 1968 by...
 - a) Konrad Zuse
 - b) Steve Jobs
 - c) Douglas Engelbart
 - d) Mark Zuckerberg
3. 📠 The ARPANET network (1969) was the ancestor of...
 - a) radio
 - b) the telephone
 - c) television
 - d) the internet
4. ➡ The binary system uses only the digits...
 - a) 0–9
 - b) 0 and 1
 - c) 1 and 2
 - d) A and B
5. 🎮 The first video game to conquer the world (1972) was...
 - a) Pong
 - b) Minecraft
 - c) Tetris
 - d) Fortnite
6. 📡 The Telstar satellite (1962) made it possible for the first time to transmit live across the Atlantic...
 - a) a package
 - b) energy
 - c) a letter
 - d) a television picture
7. ❤ Tetris (1984) was invented in the USSR by...
 - a) Alexey Pajitnov
 - b) Mikhail Gorbachev
 - c) Sergei Korolev
 - d) Yuri Gagarin
8. 🌿 Weather satellites such as TIROS-1 (1960) made it possible to...
 - a) make rain
 - b) catch storms
 - c) photograph clouds from space
 - d) control the weather
9. ⭐ The first computer virus to spread outside a lab ("Elk Cloner," 1982) was written by...
 - a) the US president
 - b) a 15-year-old student
 - c) a robot
 - d) a famous criminal

BIOMEDICAL ENGINEERING

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when engineers and doctors saved lives together. In 1954 the first successful kidney transplant was performed – between identical twins. In 1967 Christiaan Barnard carried out the first successful heart transplant, and in 1985 in Zabrze, Zbigniew Religa successfully transplanted a heart. In 1971 the CT scanner appeared, which shows cross-sections of the body's interior. Ultrasound, or USG, uses high-frequency sound waves, and MRI, unlike an X-ray, does not use X-ray radiation. Since the 1970s cochlear implants have let deaf people hear sounds. In 1978 Louise Brown, the first "test-tube baby," was born. And in 1982 the Jarvik-7 artificial heart was implanted. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎧 The cochlear implant (since the 1970s) allows deaf people to...
 - a) stay awake
 - b) run faster
 - c) see at night
 - d) hear sounds
2. 👁 The CT scanner (1971) makes it possible to see...
 - a) thoughts
 - b) dreams
 - c) cross-sections of the body's interior
 - d) the colors of an aura
3. 🗨 An ultrasound scan (USG) examines the body using...
 - a) a magnet
 - b) X-rays
 - c) high-frequency sound waves
 - d) a laser
4. ⚡ Unlike an ordinary X-ray, magnetic resonance imaging (MRI) does not use...
 - a) a computer
 - b) X-ray radiation
 - c) electricity
 - d) magnets
5. 🗨 The first Jarvik-7 artificial heart was implanted in...
 - a) 1932
 - b) 1982
 - c) 2012
 - d) 1952
6. 👤 The first successful heart transplant was performed in 1967 by...
 - a) Christiaan Barnard
 - b) Alexander Fleming
 - c) Jonas Salk
 - d) Zbigniew Religa
7. ❤ In 1985 in Zabrze, Zbigniew Religa...
 - a) successfully transplanted a heart
 - b) discovered the structure of DNA
 - c) flew into space
 - d) invented penicillin
8. 🌱 The first "test-tube baby," Louise Brown, was born in...
 - a) 2008
 - b) 1958
 - c) 1928
 - d) 1978
9. ☆ The first successful kidney transplant (1954) was between...
 - a) neighbors
 - b) a father and son
 - c) identical twins
 - d) a human and a pig

CHEMICAL ENGINEERING

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when chemistry reached every home. After World War II, plastic wrap, PET bottles, and other plastics began to be mass-produced. In 1955 George de Mestral patented Velcro, invented after observing burrs stuck to his dog's fur. In the 1950s–60s fluoride toothpaste spread, because fluoride protects teeth from decay. People listened to vinyl records, where sound is stored in a spiral groove. In 1965 Stephanie Kwolek invented Kevlar. Apollo rockets burned, among other things, liquid hydrogen and oxygen. In the Vietnam War, Agent Orange was used to destroy forests. In 1984 Bhopal suffered a leak of toxic gas from a chemical plant. And in 1985 the ozone hole was discovered, caused by CFCs from refrigerators and aerosols. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Vinyl records, popular in this period, store sound in the form of...**
 - a) a spiral groove
 - b) magnetic tape
 - c) a barcode
 - d) holes
2. 👁️ **Polyethylene film, PET bottles and other plastics began to be mass-produced...**
 - a) in ancient times
 - b) in the Middle Ages
 - c) in the 21st century
 - d) after World War II
3. 📄 **Kevlar, an extremely strong fiber (1965), was invented by...**
 - a) Marie Curie
 - b) Stephanie Kwolek
 - c) Ada Lovelace
 - d) Rosalind Franklin
4. 🌫️ **The ozone hole over Antarctica, discovered in 1985, was caused by...**
 - a) CFCs from refrigerators and aerosols
 - b) volcanoes on Mars
 - c) paper airplanes
 - d) smoke from campfires
5. 🦋 **Velcro was invented by George de Mestral after he observed...**
 - a) birds
 - b) spiders
 - c) burrs stuck to his dog's fur
 - d) glues
6. 🧪 **Agent Orange, used in the Vietnam War, served to...**
 - a) purify water
 - b) destroy forests
 - c) put out fires
 - d) treat the wounded
7. 💖 **Fluoride toothpastes became common in the 1950s–60s because fluoride...**
 - a) protects teeth from decay
 - b) changes the color of your tongue
 - c) whitens them forever
 - d) removes baby teeth
8. 🌿 **The Bhopal disaster (1984) was a leak of...**
 - a) oil into the sea
 - b) smoke from a volcano
 - c) water from a dam
 - d) toxic gas from a chemical plant
9. ⭐ **The rocket fuel for the Apollo missions included...**
 - a) coal
 - b) car gasoline
 - c) liquid hydrogen and oxygen
 - d) wood

CIVIL ENGINEERING AND TRANSPORT

**9. Cold War**

1950–1990 AD

Let's go back to the Cold War, when transportation sped up. In 1956 Malcolm McLean invented the shipping container, which revolutionized the shipping of goods. In 1964 Japan's Shinkansen, called the "bullet train," began running. The Polish TS-11 Iskra aircraft was used for training pilots. In 1971 the lunar rover let astronauts drive around on the Moon. From 1976 the Concorde flew, and when breaking the sound barrier it caused a loud bang (sonic boom). In 1978 Mirosław Hermaszewski became the first Pole in space. In 1981 the first space shuttle, Columbia, launched, and the Challenger disaster in 1986 showed that space travel is very risky. In 1988 construction began on the Channel Tunnel, which links England with France. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 When breaking the sound barrier, the Concorde, a supersonic passenger jet (from 1976), produced...
 - a) music
 - b) singing
 - c) a loud bang (sonic boom)
 - d) silence
2. 👁 Japan's Shinkansen train (1964) was nicknamed the...
 - a) "dragon"
 - b) "turtle"
 - c) "bullet train"
 - d) "boat"
3. 🗨 Construction of the Channel Tunnel began in 1988. It connects...
 - a) Denmark with Sweden
 - b) Spain with Morocco
 - c) Italy with Switzerland
 - d) England with France
4. 🚚 The shipping container, invented in 1956 by Malcolm McLean, revolutionized...
 - a) the postal service
 - b) aviation
 - c) the shipping of goods
 - d) narrow-gauge railways
5. 🚀 The lunar rover (1971) allowed astronauts to...
 - a) fly above the Moon
 - b) swim
 - c) dig tunnels
 - d) drive around on the Moon
6. 🇵🇱 The Polish TS-11 Iskra aircraft was used for...
 - a) space flights
 - b) carrying passengers
 - c) fighting fires
 - d) training pilots
7. ❤️ Mirosław Hermaszewski was the first...
 - a) F1 driver
 - b) captain of the Titanic
 - c) Pole in space (1978)
 - d) Concorde pilot
8. 🍀 The first space shuttle, Columbia, launched in...
 - a) 1981
 - b) 1961
 - c) 2001
 - d) 1951
9. ☆ The Challenger shuttle disaster (1986) showed that...
 - a) space is safe
 - b) shuttles need no inspection
 - c) the flight was too long
 - d) space travel is very risky

MATERIALS ENGINEERING

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when new materials changed everyday life. In 1954 the Fender Stratocaster guitar made its sound using magnetic pickups. In 1958 LEGO bricks were patented in Denmark. Silicon became the basis of integrated circuits because it is a semiconductor. Carbon fiber appeared, very light and strong. Apollo spacesuits had many layers because they protected against vacuum, temperature and micrometeorites, while heat shields protected spacecraft from the intense heat of reentry to Earth. In the 1970s optical fibers arrived, sending information using light in thin glass fibers. In 1974 Ernő Rubik invented his cube to help students understand movement in three-dimensional space. And asbestos, once prized, turned out to be harmful to the lungs. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎸 The Fender Stratocaster electric guitar (1954) produces sound thanks to...
 - a) a spring
 - b) only a hollow body
 - c) water
 - d) magnetic pickups
2. 👁 Carbon fiber is very...
 - a) light and strong
 - b) transparent
 - c) heavy and brittle
 - d) soft like cotton wool
3. 🗉 Optical fibers transmit information using...
 - a) water
 - b) light in thin glass fibers
 - c) sound
 - d) electricity in copper
4. ⚡ Silicon is the basis of integrated circuits because it is...
 - a) a liquid
 - b) a semiconductor
 - c) an insulator like rubber
 - d) a precious metal
5. 🚀 Apollo astronauts' spacesuits had many layers because they had to protect against...
 - a) rain
 - b) vacuum, temperature and micrometeorites
 - c) earthly dust
 - d) wind
6. 🧩 The Rubik's Cube (1974), invented by Ernő Rubik, was meant to help students understand...
 - a) music
 - b) cooking
 - c) movement in three-dimensional space
 - d) history
7. ❤️ LEGO bricks with studs were patented in 1958. They were invented in...
 - a) the USA
 - b) China
 - c) Poland
 - d) Denmark
8. 🌿 Asbestos, once prized for being fireproof, turned out to be...
 - a) edible
 - b) harmful to the lungs
 - c) magnetic
 - d) sweet
9. ☆ Spacecraft heat shields protect them from...
 - a) the intense heat of reentry to Earth
 - b) meteor showers
 - c) the cold of the Moon
 - d) radio waves

ANSWERS

MECHANICAL ENGINEERING

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when machines set off into space. In 1957 Sputnik 1 became the first artificial satellite of the Earth, and Laika the dog became the first animal to orbit the Earth. Sergei Korolev, the creator of Soviet rockets, was for years a secret – his name was hidden. In 1959 a hovercraft crossed the English Channel, riding on a cushion of compressed air. In 1961 the Unimate robot began working in a factory making cars. The Apollo program employed about 400,000 people, and the Saturn V engines could be heard many kilometers away. In 1970 Lunokhod 1 became the first remote-controlled vehicle on the Moon, and the Lunokhods and Venera probes studied the surfaces of the Moon and Venus. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **During launch, the Saturn V rocket engines were so loud that...**
 - a) they could be heard many kilometers away
 - b) they could be heard on the Moon
 - c) nothing could be heard
 - d) they played a tune
2. 👁 **The Lunokhod 1 rover (1970) was the first remote-controlled vehicle on...**
 - a) Mars
 - b) Venus
 - c) the Moon
 - d) the Sun
3. 🗨 **The Unimate industrial robot (1961) worked in a factory making...**
 - a) chocolate
 - b) cars
 - c) clothes
 - d) books
4. 🚀 **Sputnik 1 (1957) was the first...**
 - a) airplane
 - b) artificial satellite of the Earth
 - c) man in space
 - d) rover
5. 🚤 **A hovercraft rises above the water on...**
 - a) magnets
 - b) a cushion of compressed air
 - c) wheels
 - d) wings
6. 👤 **The Apollo program employed about...**
 - a) 40 million people
 - b) 4,000 people
 - c) 400,000 people
 - d) 400 people
7. 💜 **For years, Sergei Korolev, the creator of Soviet rockets, was...**
 - a) a soccer player
 - b) a secret – his name was hidden
 - c) a TV celebrity
 - d) an actor
8. 🌿 **Lunokhod and the Venera probes studied the surface of...**
 - a) the Moon and Venus
 - b) Jupiter
 - c) comets
 - d) the Sun
9. ☆ **The first animal to orbit the Earth in space was...**
 - a) a tortoise named Joe
 - b) Laika the dog
 - c) Ham the chimpanzee
 - d) Félicette the cat

9. Cold War

1950–1990 AD

Let's go back to the Cold War, to the world of energy. In 1954 the first nuclear power plant connected to the grid opened in Obninsk (USSR). In 1968 the Solina Dam was completed, creating Poland's largest artificial lake in the Bieszczady Mountains. In 1970 the Aswan High Dam on the Nile was finished. Silesian miners often worked on Saturdays and Sundays too. Acid rain from coal plants destroyed forests, including in the Sudetes. After the Chernobyl accident, Polish children were given Lugol's iodine solution. In 1989 the Exxon Valdez tanker disaster polluted the coast of Alaska. In 1990 construction of the Żarnowiec nuclear plant was halted. And in the 1980s the first modern wind farms appeared – turbines make electricity when the wind turns their blades. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 Wind turbines generate electricity because...
 - a) the wind turns their blades
 - b) they burn coal
 - c) of the Earth's magnetism
 - d) the sun heats them
2. 👁 The first nuclear power plant connected to the grid opened in 1954 in...
 - a) London
 - b) Warsaw
 - c) Obninsk (USSR)
 - d) Paris
3. 🗨 Construction of the nuclear power plant at Żarnowiec was halted in...
 - a) 1990
 - b) 1950
 - c) 1970
 - d) 2010
4. 🏰 The dam on the Nile, completed in 1970, which stopped the river's annual floods, is called the...
 - a) Aswan High Dam
 - b) Hoover Dam
 - c) Solina Dam
 - d) Itaipu Dam
5. ⚔ In communist Poland, miners in Silesia often worked...
 - a) only at night
 - b) two hours a day
 - c) on Saturdays and Sundays too
 - d) without tools
6. 🧑 The dam at Solina forms Poland's largest artificial lake, located in the...
 - a) Bieszczady Mountains
 - b) Masurian Lakes
 - c) Pomeranian lowlands
 - d) Tatra Mountains
7. ❤ In the 1970s and 1980s, acid rain destroyed forests in places such as the...
 - a) Sahara
 - b) Antarctic
 - c) Sudetes
 - d) Bieszczady only
8. 🌿 Major coastal oil spills, such as the Exxon Valdez tanker disaster (1989), polluted the coast of...
 - a) Brazil
 - b) Poland
 - c) Alaska
 - d) Egypt
9. ☆ After the Chernobyl accident, children in Poland were given...
 - a) aspirin
 - b) vitamin C
 - c) raspberry juice
 - d) Lugol's iodine solution

ASTRONOMY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when people reached for the stars. In 1963 Valentina Tereshkova became the first woman in space. In 1965 Alexei Leonov made the first spacewalk, and scientists discovered the cosmic background radiation – an echo of the Big Bang. In 1967 Jocelyn Bell Burnell discovered pulsars, which are rapidly spinning neutron stars. From 1969 to 1972 a total of 12 astronauts walked on the Moon. In 1975 the Apollo–Soyuz mission linked American and Soviet spacecraft. In 1977 Voyager carried a golden record with the sounds and music of Earth, and in 1990 Carl Sagan called Earth, in a Voyager photo, a "pale blue dot." In 1986 Halley's Comet was visible. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **The Voyager probe (1977) carried into space a golden record with...**
 - a) a treasure map
 - b) movies
 - c) sounds and music of Earth
 - d) a list of people
2. 👁 **The first person to walk in open space (1965) was...**
 - a) Alexei Leonov
 - b) Mirosław Hermaszewski
 - c) Yuri Gagarin
 - d) Neil Armstrong
3. 🗨 **The first woman in space (1963) was...**
 - a) Valentina Tereshkova
 - b) Mae Jemison
 - c) Svetlana Savitskaya
 - d) Sally Ride
4. ⚡ **Pulsars, discovered in 1967 by Jocelyn Bell Burnell, are...**
 - a) rapidly spinning neutron stars
 - b) black holes
 - c) comets
 - d) planets
5. 🚀 **Between 1969 and 1972, the total number of astronauts who walked on the Moon was...**
 - a) 100
 - b) zero
 - c) 2
 - d) 12
6. 🧑‍🚀 **The first joint docking of US and Soviet spacecraft was the mission...**
 - a) Vostok–Voyager
 - b) Sputnik–Hubble
 - c) Mir–Columbia
 - d) Apollo–Soyuz (1975)
7. ❤ **In a photo taken by the Voyager probe (1990), Carl Sagan called the Earth...**
 - a) a "green planet"
 - b) a "ball of fire"
 - c) a "pale blue dot"
 - d) a "small sun"
8. 🌿 **Halley's Comet, which returns about every 76 years, was visible in...**
 - a) 1986
 - b) 1996
 - c) 1976
 - d) 1956
9. ⭐ **The cosmic microwave background, discovered in 1965, is...**
 - a) an alien signal
 - b) radio static
 - c) an echo of the Big Bang
 - d) moonlight

MATHEMATICS

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when mathematics intertwined with politics, art, and computers. In the 1950s Stanisław Ulam and Edward Teller worked on the hydrogen bomb. John Nash developed game theory, which studies decisions in competition and cooperation. Iannis Xenakis composed music using probability theory. In 1963 Edward Lorenz founded chaos theory – small changes can have huge effects, as in the "butterfly effect." In the 1970s the pocket calculator appeared. In 1976 it was proven that any map can be colored with four colors. In 1977 RSA made it possible to encrypt messages securely online. In 1980 Benoît Mandelbrot saw a famous fractal – the Mandelbrot set. And a Rubik's Cube can be solved from any position in at most 20 moves. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Iannis Xenakis composed music using...**
 - a) horoscopes
 - b) stars
 - c) probability theory
 - d) colors
2. 👁️ **In 1980, Benoît Mandelbrot saw on a computer screen the famous...**
 - a) square
 - b) fractal – the Mandelbrot set
 - c) triangle
 - d) circle
3. 🗨️ **Game theory, developed by John Nash, studies...**
 - a) decisions in competition and cooperation
 - b) video games
 - c) soccer
 - d) board games only
4. 🎨 **The four color problem was solved in 1976 by proving that any map can be colored with...**
 - a) two colors
 - b) ten colors
 - c) four colors
 - d) one color
5. 🧩 **A Rubik's Cube can be solved from any position in at most...**
 - a) 20 moves
 - b) 200 moves
 - c) 2,000 moves
 - d) 2 moves
6. 🧑🏫 **In the 1950s, Stanisław Ulam and Edward Teller worked on...**
 - a) the television set
 - b) the hydrogen bomb
 - c) the bicycle
 - d) the calculator
7. 💖 **The pocket calculator appeared on the market in the...**
 - a) 1920s
 - b) Middle Ages
 - c) 1970s
 - d) 19th century
8. 🌿 **Chaos theory (Edward Lorenz, 1963) says that small changes can have big consequences, as in the "... effect"**
 - a) turtle
 - b) cat
 - c) elephant
 - d) butterfly
9. ⭐ **Public-key cryptography (RSA, 1977) makes it possible to...**
 - a) lock doors
 - b) measure time
 - c) encrypt messages securely online
 - d) count stars

OTHER (TECHNOLOGY)

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when inventions changed everyday life. In 1950 the Diners Club card was created because, as legend has it, its founder forgot his wallet at a restaurant. In 1956 Tefal introduced a pan coated with Teflon. In the 1960s skateboarding was popularized by California surfers. The cassette tape of 1963 and the CD of 1982 are both media for sound. In 1967 the first ATM opened in London. In 1968 the glue for Post-it notes was invented – it sticks weakly and leaves no trace. In the 1970s microwave ovens reached homes – microwaves make water molecules move. In 1974 the first barcode was scanned in a store, on a pack of chewing gum. And inventions from space programs later found their way into everyday life. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎧 The audio cassette (1963) and the CD (1982) are media for storing...
 - a) smell
 - b) heat
 - c) taste
 - d) sound
2. 📊 The first barcode was scanned in a store in 1974 on a pack of...
 - a) chewing gum
 - b) eggs
 - c) milk
 - d) bread
3. 💳 The Diners Club credit card (1950) was created because its founder...
 - a) disliked coins
 - b) wanted to buy a car
 - c) forgot his wallet at a restaurant
 - d) lost his keys
4. 📶 A microwave oven heats food because microwaves...
 - a) freeze it
 - b) make water molecules move
 - c) light a fire
 - d) glow
5. 🛹 In the 1960s, the skateboard was popularized by...
 - a) California surfers
 - b) Roman soldiers
 - c) astronauts
 - d) Polish miners
6. 🏦 The first ATM was put into service in 1967 in...
 - a) Warsaw
 - b) London
 - c) Tokyo
 - d) Paris
7. 💖 Post-it notes were made possible by an adhesive that...
 - a) smells nice
 - b) glows
 - c) sticks weakly and leaves no trace
 - d) sticks forever
8. 🍳 In 1956, Tefal introduced a frying pan made with...
 - a) paper
 - b) Teflon
 - c) wood
 - d) glass
9. 🌟 Inventions from space programs, such as better insulation materials, later found their way into...
 - a) everyday life
 - b) the trash
 - c) the military only
 - d) museums only

ANSWERS

BIOLOGY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when biology was uncovering the secrets of life. In 1953 Watson and Crick described the structure of DNA as a double helix. The genetic code is written in DNA with four "letters": A, T, C and G. In 1960 Jane Goodall observed that chimpanzees use tools. In 1962 John Gurdon's experiments with frogs showed that an adult cell contains all the genes. A 1970 record featuring the songs of humpback whales became a hit and helped protect whales. In 1973 Boyer and Cohen created the first genetically modified organism – a bacterium. In 1977 hydrothermal vents teeming with life were discovered on the ocean floor. For years Dian Fossey studied mountain gorillas in Rwanda. And Barbara McClintock, who discovered "jumping genes," received her Nobel Prize only in 1983. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 A 1970 album that became a hit and helped protect whales featured...
 - a) roaring circus elephants
 - b) the voices of zoo parrots
 - c) the songs of humpback whales
 - d) barking dogs
2. 👁 The double-helix structure of DNA was described in 1953 by...
 - a) Curie and Curie
 - b) Pasteur and Koch
 - c) Darwin and Wallace
 - d) Watson and Crick
3. 📖 The genetic code is written in DNA using four "letters":
 - a) A, B, C and D
 - b) A, T, C and G
 - c) X, Y, Z and W
 - d) 1, 2, 3 and 4
4. 🐼 In 1960, Jane Goodall observed that chimpanzees...
 - a) write
 - b) cook
 - c) build houses
 - d) use tools
5. 🧬 The first genetically modified organism – a bacterium – was created in 1973 by...
 - a) Watson and Crick
 - b) Boyer and Cohen
 - c) Pasteur and Koch
 - d) Darwin and Mendel
6. 🐼 For years in Rwanda, Dian Fossey studied...
 - a) penguins
 - b) lions
 - c) elephants
 - d) mountain gorillas
7. 💖 Barbara McClintock discovered "jumping genes," but she did not receive the Nobel Prize until...
 - a) 1953
 - b) 1963
 - c) 1943
 - d) 1983
8. 🌿 Hydrothermal vents teeming with life on the ocean floor were discovered in...
 - a) 1947
 - b) 1877
 - c) 2007
 - d) 1977
9. ⭐ The first animals cloned from cells were frogs. John Gurdon's research in 1962 showed that...
 - a) genes don't matter
 - b) an adult cell contains all the genes
 - c) cloning is impossible
 - d) frogs can fly

CHEMISTRY

9. Cold War

1950–1990 AD

Let's go back to the Cold War, into the chemists' laboratories. In 1953 Stanley Miller passed sparks through gases and obtained amino acids, the building blocks of life. Rosalind Franklin took "Photo 51," which showed that DNA has the shape of a helix. In the 1950s Glenn Seaborg's team produced elements heavier than uranium. Dorothy Hodgkin, the 1964 Nobel laureate, determined the structure of penicillin and vitamin B12. To get gasoline, crude oil is distilled in a refinery. Colorful fireworks owe their hues to metal salts, e.g. strontium and copper. CFCs were used in refrigerators and aerosols, and in 1974 Sherwood Rowland and Mario Molina warned that CFCs destroy the ozone layer. In 1985 fullerenes were discovered – carbon molecules shaped like a soccer ball. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏆 **Dorothy Hodgkin, a 1964 Nobel laureate, determined the structure of...**
 - a) penicillin and vitamin B12
 - b) DNA
 - c) sound
 - d) caffeine
2. 👁 **Colorful fireworks get their colors from...**
 - a) light bulbs
 - b) paints
 - c) metal salts, e.g. strontium and copper
 - d) lasers
3. 🗉 **Fullerenes, discovered in 1985, are carbon molecules shaped like...**
 - a) a rope
 - b) a cube
 - c) a soccer ball
 - d) a pyramid
4. ⚖ **Rosalind Franklin took the famous "Photo 51," which showed that DNA is shaped like...**
 - a) a sphere
 - b) a cube
 - c) a flat ribbon
 - d) a helix
5. ⚡ **To get gasoline and other fuels from crude oil, the oil is...**
 - a) filtered through sand
 - b) boiled with sugar
 - c) distilled in a refinery
 - d) frozen
6. 🧑 **In the 1950s, elements heavier than uranium were produced by, among others, the team of...**
 - a) Marie Curie
 - b) Glenn Seaborg
 - c) Dmitri Mendeleev
 - d) Alfred Nobel
7. 💖 **In 1953, in an experiment with sparks in gases, Stanley Miller obtained...**
 - a) clean air
 - b) diamond
 - c) gold
 - d) amino acids, the building blocks of life
8. 🍃 **CFCs, responsible for the ozone hole, were used in...**
 - a) clothing
 - b) drinking water
 - c) bread
 - d) refrigerators and aerosols
9. ⭐ **As early as 1974, Sherwood Rowland and Mario Molina warned that...**
 - a) the Earth is cooling
 - b) CFCs destroy the ozone layer
 - c) the ocean is drying up
 - d) the Sun is going out

PHYSICS

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when physics raced ahead. In 1947 Chuck Yeager was the first to break the sound barrier. In 1954 CERN was founded near Geneva. In 1964 Murray Gell-Mann named the particles inside the proton "quarks" – a word taken from a novel by James Joyce. A hologram is a three-dimensional image made with a laser. Astronauts on the Moon jumped higher because gravity there is about 6 times weaker. In 1974 Stephen Hawking predicted that black holes can slowly "evaporate." Auroras form in the upper atmosphere. In 1986 high-temperature superconductors were discovered, which conduct electricity without any losses. And Richard Feynman, investigating the Challenger disaster, showed that the seals lose elasticity in the cold. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **The first person to break the sound barrier in an airplane (1947) was...**
 - a) Chuck Yeager
 - b) Amelia Earhart
 - c) Yuri Gagarin
 - d) Neil Armstrong
2. 👁 **A hologram is...**
 - a) a detailed pencil drawing
 - b) an oil painting on canvas
 - c) a three-dimensional image made with a laser
 - d) an ordinary flat photograph
3. 🗨 **The word "quark," the name for particles inside the proton, comes from...**
 - a) a novel by James Joyce
 - b) Latin
 - c) a physicist's surname
 - d) the Maya language
4. 🏠 **CERN, the famous particle physics laboratory, was founded in 1954 near...**
 - a) Warsaw
 - b) Chicago
 - c) Geneva
 - d) Moscow
5. 🚀 **An astronaut on the Moon can jump higher because gravity there is...**
 - a) zero
 - b) 2 times stronger
 - c) the same
 - d) about 6 times weaker
6. 🧑 **Richard Feynman, the famous physicist, investigated the Challenger disaster and showed that...**
 - a) the seals lose elasticity in the cold
 - b) everything was fine
 - c) the software failed
 - d) an alien was to blame
7. ❤ **In 1974, Stephen Hawking predicted that black holes...**
 - a) can slowly "evaporate"
 - b) do not exist
 - c) are holes in the ground
 - d) shine the brightest
8. 🍃 **Auroras form in...**
 - a) the upper atmosphere
 - b) volcanoes
 - c) the oceans
 - d) rain clouds
9. ☆ **High-temperature superconductors (1986) conduct electricity...**
 - a) backwards
 - b) without any losses
 - c) only in sunlight
 - d) with sparks

ENVIRONMENT

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when people began to care for the planet. In 1961 WWF was founded; its symbol is the giant panda. Rachel Carson devoted "Silent Spring" to the dangers of pesticides. Since 1970 we have celebrated Earth Day on April 22. In 1971 Greenpeace was founded to protest against nuclear tests. In 1972 the Club of Rome's report "The Limits to Growth" warned that the Earth's resources are limited. From the 1960s the Aral Sea shrank because river water was diverted for irrigation. In the Black Triangle, air pollution destroyed forests in the Sudetes. In 1980 the eruption of Mount St. Helens blew away an entire side of the mountain. And in 1987 the UN report "Our Common Future" defined the concept of sustainable development. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Greenpeace was founded in 1971 to protest against...**
 - a) sports
 - b) nuclear tests
 - c) schools
 - d) taxes
2. 🐼 **The symbol of the WWF (1961) is...**
 - a) the giant panda
 - b) the eagle
 - c) the lion
 - d) the whale
3. 🗓️ **Since 1970, Earth Day has been celebrated on...**
 - a) December 24
 - b) November 11
 - c) June 1
 - d) April 22
4. 🌊 **In the 1960s–80s, the Aral Sea began to dry up because...**
 - a) river water was diverted for irrigation
 - b) it froze forever
 - c) animals drank it
 - d) a meteorite struck
5. 🌫️ **Air pollution in the Black Triangle (Poland, Czechoslovakia, East Germany) destroyed...**
 - a) deserts
 - b) forests in the Sudetes
 - c) fish in the Pacific
 - d) glaciers
6. 🌐 **The Club of Rome's report "The Limits to Growth" (1972) warned that...**
 - a) the Earth's resources are limited
 - b) an ice age would start tomorrow
 - c) people would stop being born
 - d) the Sun would go out
7. 💚 **Rachel Carson devoted "Silent Spring" to...**
 - a) war
 - b) the dangers of pesticides
 - c) life in cities
 - d) space flights
8. 🌋 **The 1980 eruption of Mount St. Helens blew away...**
 - a) only the snow
 - b) an entire side of the mountain
 - c) a nearby lake to the Moon
 - d) all the clouds
9. ⭐ **The UN report "Our Common Future" (1987) defined the concept of...**
 - a) sustainable development
 - b) the Cold War
 - c) the free market
 - d) the global village

HEALTH

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when humanity fought for health. In 1955 Jonas Salk developed a polio vaccine, and the Polish physician Hilary Koprowski developed an oral polio vaccine. In 1966 the first warnings appeared on cigarette packs in the USA. In 1978, in Almaty, WHO adopted the slogan "Health for All." In 1980 smallpox was declared completely eradicated. In 1983 HIV was identified. In 1985 the Live Aid concert raised money to fight famine in Ethiopia. In the 1980s aerobics became fashionable thanks to workout videotapes. And Jerzy Kukuczka, the second person to climb the Crown of the Himalayas, showed that the human body can adapt to extremes. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎸 **The Live Aid concert (1985) raised money to fight...**
 - a) smog
 - b) war
 - c) famine in Ethiopia
 - d) smallpox
2. 👁️ **The polio vaccine was developed in 1955 by...**
 - a) Jonas Salk
 - b) Alexander Fleming
 - c) Edward Jenner
 - d) Louis Pasteur
3. 🗨️ **Hilary Koprowski, a Polish-born physician, developed...**
 - a) aspirin
 - b) an oral polio vaccine
 - c) an antibiotic
 - d) insulin
4. 🚫 **Smallpox was declared completely eradicated in...**
 - a) 2000
 - b) 1950
 - c) 1880
 - d) 1980
5. 🏃 **Aerobics became fashionable in the 1980s thanks to...**
 - a) computer games
 - b) cookbooks
 - c) workout videotapes
 - d) the radio
6. 🧑 **In 1978 in Almaty (Alma-Ata), the WHO adopted the slogan...**
 - a) "A Hospital in Every Home"
 - b) "Sport for the Elite"
 - c) "Health for All"
 - d) "Medicine Only for the Rich"
7. 💖 **The first warnings on cigarette packs in the US appeared in...**
 - a) 1946
 - b) 2006
 - c) 1966
 - d) 1916
8. 🍀 **HIV was identified in...**
 - a) 1933
 - b) 1953
 - c) 1983
 - d) 2003
9. ⭐ **Jerzy Kukuczka was the second person to climb all fourteen 8,000-meter peaks. This shows that the human body...**
 - a) does not need oxygen
 - b) cannot tolerate cold
 - c) is weak and fragile
 - d) can adapt to extremes

PHYSICAL CULTURE AND SPORT

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when sport became an arena of rivalry. In 1954 Roger Bannister was the first to run a mile in under 4 minutes. The European soccer championship is held every 4 years: the first was in 1960, so the third took place in 1968. That year the Olympics in Mexico were held at high altitude, so records fell in jumps and sprints. In 1972 the attack in Munich showed that politics and violence can invade sport. Irena Szewińska, a seven-time Olympic medalist, competed in track and field. In 1974 Poland finished the World Cup in third place. In 1976 Nadia Comăneci was the first ever to receive a perfect score of 10.0. In 1978 Wanda Rutkiewicz became the first European woman to stand on the summit of Mount Everest. In Moscow in 1980 Władysław Kozakiewicz made the famous "Kozakiewicz gesture," a rude arm gesture, and the Moscow and Los Angeles Games were boycotted by some countries. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **At the 1974 FIFA World Cup, Poland finished in...**
 - a) third place
 - b) last place
 - c) fourth place
 - d) first place
2. 🏊 **After winning the pole vault (Moscow 1980), Władysław Kozakiewicz made the famous...**
 - a) deep bow to the judges
 - b) "Kozakiewicz gesture" (a rude arm gesture)
 - c) victory dance on the mat
 - d) military salute to the crowd
3. 🏃 **The first person to run a mile in under 4 minutes (1954) was...**
 - a) Jesse Owens
 - b) Usain Bolt
 - c) Carl Lewis
 - d) Roger Bannister
4. ⚽ **The European Football Championship is held every 4 years. The first one was in 1960. In what year was the third one held?**

5. 🏊 **In which sport did Irena Szewińska, a seven-time Olympic medalist, compete?**
 - a) Swimming
 - b) Track and field
 - c) Gymnastics
 - d) Fencing
6. 🌍 **The Moscow (1980) and Los Angeles (1984) Olympics were...**
 - a) canceled
 - b) held jointly
 - c) held in winter
 - d) boycotted by some countries
7. ❤️ **In 1978, Wanda Rutkiewicz became the first European woman to...**
 - a) fly into space
 - b) win Wimbledon
 - c) swim across the Atlantic
 - d) stand on the summit of Mount Everest
8. 🌿 **The 1968 Olympics in Mexico City took place at high altitude, so...**
 - a) they were held in winter
 - b) records fell in jumps and sprints
 - c) they were held at night
 - d) nobody finished a race
9. ⭐ **The attack on Israeli athletes at the Munich Olympics (1972) showed that...**
 - a) sport does not matter
 - b) politics and violence can invade sport
 - c) terrorism does not exist
 - d) the Olympics are always safe

MEDICINE

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when medicine worked wonders. In 1958 the first permanent pacemaker, the size of a hockey puck, was implanted. In 1963 a smallpox outbreak in Wrocław was contained through mass vaccination and isolating the sick. The word "transplantation" means transferring an organ, and drugs such as cyclosporine prevented transplant rejection. In 1967 Cicely Saunders founded the first modern hospice in London. In 1977 the last natural case of smallpox was recorded in Somalia. In 1984 Fr. Eugeniusz Dutkiewicz founded the Pallotinum Hospice in Gdańsk. In the 1980s MRI scanners entered hospitals, and laser eye surgery began to correct vision problems. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏏 The first permanently implanted pacemaker (1958) was the size of...
 - a) a hockey puck
 - b) a television
 - c) a grain of rice
 - d) a soccer ball
2. 👁 The MRI scanner came into hospitals in the...
 - a) 1920s
 - b) 19th century
 - c) 1980s
 - d) 21st century
3. 🗨 The word "transplantation" means...
 - a) transporting a patient
 - b) transferring an organ
 - c) eye surgery
 - d) treatment with herbs
4. ⚖ Immunosuppressive drugs such as cyclosporine (1983) were a breakthrough because they...
 - a) prevented transplant rejection
 - b) cured the common cold
 - c) whitened teeth
 - d) replaced food
5. 🔦 Laser eye surgery developed from the 1980s in order to...
 - a) correct vision problems
 - b) measure blood pressure
 - c) remove bones
 - d) treat teeth
6. 👤 In 1967 in London, Cicely Saunders founded the first modern...
 - a) laboratory
 - b) hospice
 - c) military hospital
 - d) kindergarten
7. ❤ The Pallottinum Hospice in Gdańsk (1984) was founded by...
 - a) Zbigniew Religa
 - b) John Paul II
 - c) Lech Wałęsa
 - d) Fr. Eugeniusz Dutkiewicz
8. 🍀 The last naturally occurring case of smallpox was recorded in 1977 in...
 - a) Japan
 - b) Brazil
 - c) Poland
 - d) Somalia
9. ☆ The smallpox epidemic in Wrocław (1963) was brought under control thanks to...
 - a) people fleeing
 - b) prayer alone
 - c) mass vaccination and isolating the sick
 - d) antibiotics

PHARMACY

9. Cold War

1950–1990 AD

Let's go back to the Cold War and step into the pharmacy. In the 1950s–70s scientists began studying drugs from marine organisms, such as sponges. In 1956 inhalers appeared that deliver asthma medicine directly to the lungs. The thalidomide tragedy of 1957–1961 led to stricter drug testing. In 1960 the birth control pill appeared in the USA. In the 1960s benzodiazepines helped people calm down, and in 1962 James Black invented beta blockers, which help the heart work more calmly. In the 1970s the Chinese researcher Tu Youyou discovered artemisinin, a malaria drug. In 1982 human insulin made by genetically modified bacteria was introduced. And generic drugs are cheaper copies of brand-name drugs. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Anti-anxiety drugs such as benzodiazepines (1960s) helped people...**
 - a) calm down
 - b) run better
 - c) grow
 - d) see at night
2. 👁 **The contraceptive pill appeared in the US in...**
 - a) 1910
 - b) 2000
 - c) 1850
 - d) 1960
3. 🗨 **The thalidomide tragedy (1957–1961) led to...**
 - a) a ban on antibiotics
 - b) stricter drug testing
 - c) the end of pharmacy
 - d) pharmacies closing
4. ⚖ **Generic drugs are...**
 - a) cheaper copies of brand-name drugs
 - b) made of sugar
 - c) without an active ingredient
 - d) for animals
5. ✨ **Asthma inhalers (1956) deliver medicine...**
 - a) to the stomach
 - b) through the skin
 - c) to the eyes
 - d) directly to the lungs
6. 🧑 **Artemisinin, a malaria drug, was discovered in the 1970s by Chinese researcher...**
 - a) Marie Curie
 - b) Rosalind Franklin
 - c) Dorothy Hodgkin
 - d) Tu Youyou
7. 💖 **Beta-blockers (1962), invented by James Black, help...**
 - a) you grow
 - b) you see better
 - c) the heart work more calmly
 - d) you run faster
8. 🌿 **Medicines from marine organisms, such as sponges, began to be studied in...**
 - a) the 1950s–70s
 - b) ancient times
 - c) the Middle Ages
 - d) the 19th century
9. ⭐ **Human insulin, the first drug made by genetically modified bacteria, was introduced in...**
 - a) 2002
 - b) 1922
 - c) 1982
 - d) 1952

AGRICULTURE

9. Cold War

1950–1990 AD

Let's go back to the Cold War and head out to the fields. In 1959–1961 China suffered a great famine caused by the "Great Leap Forward" policy. In the 1960s India's "Green Revolution" meant growing new high-yield grain varieties, and in 1970 Norman Borlaug received the Nobel Peace Prize for new high-yield wheat varieties. Communist Poland had PGRs – each one a state-owned farm – yet private farmers kept their farms. The Ursus tractor, made in Poland, rolled across the fields. Harvest festivals were staged as a big state celebration, and propaganda portrayed the Colorado potato beetle as an "American bug" dropped by enemies. At the end of the 20th century GM crops appeared – supporters say they increase crop yields. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏆 In communist Poland, the dożynki (harvest festival) was often organized as...
 - a) a sports competition
 - b) a big state celebration
 - c) a secret holiday
 - d) a rock concert
2. 🚗 The Ursus tractor was manufactured in...
 - a) Poland
 - b) Brazil
 - c) Japan
 - d) Canada
3. 📖 In communist Poland, the abbreviation PGR referred to...
 - a) a type of densely sown field
 - b) a group of Polish knights
 - c) a state-owned farm
 - d) a farmers' political party
4. 🌱 The "Green Revolution" in India in the 1960s consisted of...
 - a) banning fertilizers
 - b) growing new high-yield grain varieties
 - c) going back to hoes
 - d) planting trees
5. ⚔️ In communist Poland, unlike in other Eastern Bloc countries, private farmers...
 - a) moved to the cities
 - b) did not exist
 - c) kept their farms
 - d) had to give up their land
6. 🌾 In 1970, Norman Borlaug received the Nobel Peace Prize for...
 - a) protecting forests
 - b) building tractors
 - c) inventing a fertilizer
 - d) new high-yield wheat varieties
7. ❤️ The Great Chinese Famine (1959–1961) was the result of the policy called the...
 - a) "Great Leap Forward"
 - b) "Green Revolution"
 - c) "Golden Age"
 - d) "Free Market"
8. 🌿 In communist propaganda, the Colorado potato beetle in Polish fields was presented as...
 - a) a gift from heaven for farmers
 - b) a protected animal
 - c) an "American bug" dropped by enemies
 - d) a symbol of peace
9. ⭐ Genetically modified crops appeared at the end of the 20th century. Supporters say that they...
 - a) grow in ice
 - b) are magical
 - c) don't need sunlight
 - d) increase crop yields

1. b 2. a 3. c 4. b 5. c 6. d 7. a 8. c 9. d

ANSWERS

VETERINARY SCIENCE

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when animals flew into space. In 1957 the dog Laika took off. In 1960 the dogs Belka and Strelka were the first to return alive from orbit. In 1961 the chimpanzee Ham flew for the USA, and in 1963 the cat Félicette was sent up by France. Back on Earth, veterinarian James Herriot described his work in books that became bestsellers and a TV series. On Polish farms horses kept working in the fields for a long time. In the 1980s mad cow disease broke out in Great Britain, and in Europe foxes were vaccinated against rabies by dropping vaccine baits. In 1997 a Polish law recognized that an animal is not a thing and feels pain. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

1. 🏆 **Veterinarian James Herriot described his work in books that...**
 - a) became bestsellers and a TV series
 - b) were known only in Scotland
 - c) were surgery textbooks
 - d) were banned
2. 🐕 **Laika the dog flew into space in...**
 - a) 1957
 - b) 1967
 - c) 1977
 - d) 1947
3. 🐶 **Belka and Strelka were dogs that in 1960...**
 - a) starred in a popular Soviet film
 - b) were the first to return alive from orbit
 - c) won an international dog show
 - d) guarded the gates of the Kremlin
4. 🦊 **Since the 1980s, foxes in Europe have been vaccinated against rabies by dropping...**
 - a) doctors by parachute
 - b) nets
 - c) vaccine baits
 - d) leaflets
5. 🐎 **On Polish farms in the communist era, horses...**
 - a) were banned by the government
 - b) disappeared completely by 1950
 - c) were used to pull airplanes
 - d) kept working in the fields for a long time
6. 🐼 **In 1961, Ham the chimpanzee flew into space for...**
 - a) the USA
 - b) Poland
 - c) the USSR
 - d) China
7. 🐱 **In 1963, Félicette became the first cat in space, sent by...**
 - a) France
 - b) the USSR
 - c) the USA
 - d) Great Britain
8. 🌿 **Mad cow disease (BSE) broke out in the 1980s in...**
 - a) Brazil
 - b) Great Britain
 - c) Japan
 - d) Australia
9. 🌟 **Animal protection laws in many countries, e.g. Poland (1997), recognize that an animal...**
 - a) is a machine
 - b) has no feelings
 - c) is state property
 - d) is not a thing and feels pain

ANIMAL SCIENCE AND FISHERIES

9. Cold War

1950–1990 AD

Let's go back to the Cold War, to the seas and the farms. From 1958 to 1976 Iceland and Britain fought the Cod Wars over fishing rights. Polish trawlers fished as far away as the coasts of Africa and South America. On chicken farms, raising poultry became industrial and large-scale. Aquaculture – the farming of fish and seafood – was growing. In the 1970s there were very few wolves in Poland because bounties were paid for killing them. In the 1980s the zebra mussel in the Great Lakes became an example of an invasive species. In 1986 a moratorium on commercial whaling was introduced. Scientists found that dolphins communicate with whistles and clicks. And the bison of Białowieża, released into the wild in the 1950s, today number over 2,500 in Poland. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🦬 **Dolphins communicate using...**
 - a) whistles and clicks
 - b) writing
 - c) hand gestures
 - d) colors
2. 👁️ **The moratorium on commercial whaling was introduced in...**
 - a) 2016
 - b) 1936
 - c) 1886
 - d) 1986
3. 🖼️ **Aquaculture is...**
 - a) the science of water
 - b) a water sport
 - c) painting with watercolors
 - d) the farming of fish and seafood
4. 🚢 **The Cod Wars (1958–1976) between Iceland and Britain were about...**
 - a) gold
 - b) fishing rights
 - c) land borders
 - d) oil
5. 🚩 **In the communist era, Polish trawlers fished even off the coasts of...**
 - a) Switzerland
 - b) Mongolia
 - c) Africa and South America
 - d) Poland only
6. 🐔 **In the 1960s–80s, chicken farming became...**
 - a) unprofitable
 - b) industrial and large-scale
 - c) organic only
 - d) banned
7. ❤️ **In the 1970s there were very few wolves in Poland because...**
 - a) they froze during winters
 - b) bounties were paid for killing them
 - c) bison ate them
 - d) they migrated to Africa
8. 🐚 **The zebra mussel plague in the Great Lakes (1980s) is an example of...**
 - a) a new species from space
 - b) extinction
 - c) an invasive species
 - d) animal farming
9. ⭐ **In the 1950s, the bison at Białowieża were released from their enclosures into the wild. Today, the number living in Poland is...**
 - a) zero
 - b) a dozen or so
 - c) over 2,500
 - d) several million

OTHER (NATURE)

9. Cold War

1950–1990 AD

Let's go back to the Cold War, when explorers reached the highest peaks and the deepest depths. In 1953 Mount Everest was climbed by Edmund Hillary and Tenzing Norgay. In 1956 Jacques Cousteau's film "The Silent World" won the Palme d'Or at Cannes. In 1960 Jacques Piccard and Don Walsh explored the Mariana Trench in the bathyscaphe "Trieste." In the 1960s plate tectonics was accepted, confirming the ideas of Alfred Wegener. In 1972 the "Blue Marble" photo from Apollo 17 became a symbol of the environmental movement. In 1976 the Tangshan earthquake was one of the most tragic of the 20th century. In 1977 Poland's Antarctic station named after Henryk Arctowski was founded. In 1978 Reinhold Messner climbed Everest without bottled oxygen. And Jerzy Kukuczka climbed all 14 eight-thousanders in less than 8 years. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 Jacques Cousteau showed the underwater world in the film "The Silent World" (1956), which...
 - a) was banned
 - b) lasted 24 hours
 - c) won the Palme d'Or at Cannes
 - d) was silent
2. 👁 The first climbers to reach the summit of Mount Everest in 1953 were...
 - a) Amundsen and Scott
 - b) Mallory and Irvine
 - c) Edmund Hillary and Tenzing Norgay
 - d) Kukuczka and Messner
3. 🗨 The theory of plate tectonics was accepted in the 1960s, confirming the earlier ideas of...
 - a) Charles Darwin
 - b) Isaac Newton
 - c) Marie Curie
 - d) Alfred Wegener
4. 🚢 In 1960, the Mariana Trench was explored in the bathyscaphe "Trieste" by...
 - a) Jacques Piccard and Don Walsh
 - b) Cousteau and his son
 - c) Neil Armstrong and Buzz Aldrin
 - d) Hillary and Norgay
5. 🧗 In 1978, Reinhold Messner (with Peter Habeler) became the first to climb Everest...
 - a) with a dog
 - b) without bottled oxygen
 - c) on skis
 - d) at night
6. 🧑 The Polish research station in Antarctica, founded in 1977, is named after...
 - a) Frédéric Chopin
 - b) Nicolaus Copernicus
 - c) Henryk Arctowski
 - d) Marie Curie
7. ❤ Jerzy Kukuczka climbed all fourteen 8,000-meter peaks in...
 - a) one week
 - b) a single year
 - c) 30 years
 - d) less than 8 years
8. 🌿 The Tangshan earthquake (1976) in China was...
 - a) recorded only on the Moon
 - b) hidden under the polar ice
 - c) too weak for anyone to feel
 - d) one of the most tragic of the 20th century
9. ☆ The "Blue Marble" photo of Earth (1972) from Apollo 17 became a symbol of...
 - a) war
 - b) the Olympics
 - c) the environmental movement
 - d) the arms race
