

ARCHAEOLOGY

10. Digital Age

1990–2020 AD

Let's step into the digital age, when archaeology picked up new tools. In 1991 Ötzi, the "Iceman," was found in the Alps; he lived about 5,300 years ago. DNA from old bones lets archaeologists determine people's kinship and ancestry, and bioarchaeology uses the bones of ancient people to reconstruct their lives, illnesses, and diet. In 2012 the remains of King Richard III were found under a parking lot in Leicester. In 2013 the remains of "Homo naledi" were discovered in a cave in South Africa. In 2015 terrorists destroyed monuments in Palmyra, showing that cultural heritage is fragile and needs protection. In 2018 lidar revealed thousands of Maya structures in the jungle of Guatemala. Underwater archaeologists study wrecks with remotely operated robots. And Polish researchers, students of Kazimierz Michałowski, have long studied Deir el-Bahari in Egypt. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 Ötzi, the "Iceman" found in the Alps in 1991, lived about...
 - a) 53,000 years ago
 - b) 5,300 years ago
 - c) 53 years ago
 - d) 500 years ago
2. 👁 In 2018, lidar – laser scanning from an aircraft – revealed hidden in the jungles of Guatemala...
 - a) thousands of Maya structures
 - b) dinosaur skeletons
 - c) Teutonic Knights' castles
 - d) Egyptian pyramids
3. 🗨 In 2012, the remains of an English king were found under a parking lot in Leicester. He was...
 - a) Henry VIII
 - b) Richard III
 - c) King Arthur
 - d) William the Conqueror
4. 🧬 Analyzing DNA from old bones allows archaeologists to determine...
 - a) the person's job
 - b) their favorite color
 - c) people's kinship and ancestry
 - d) the dead person's first name
5. 🤖 Underwater archaeologists explore shipwrecks using...
 - a) remotely operated robots
 - b) hot-air balloons
 - c) shovels in the sand
 - d) camels
6. 🇵🇱 A Polish expedition led by Kazimierz Michałowski, and later by his students, has for years been studying...
 - a) Deir el-Bahari in Egypt
 - b) Machu Picchu
 - c) Stonehenge
 - d) Pompeii
7. ❤ What is the name of the science that uses the bones of ancient people to reconstruct their lives, diseases and diet?
 - a) numismatics
 - b) astrology
 - c) bioarchaeology
 - d) cartography
8. 🌿 The remains of Homo naledi were discovered in 2013 in a cave in...
 - a) China
 - b) Poland
 - c) Canada
 - d) South Africa
9. ☆ The destruction of Palmyra's monuments by terrorists (2015) showed that cultural heritage...
 - a) lasts forever on its own
 - b) does not matter at all
 - c) is fragile and needs protection
 - d) belongs to just one country

PHILOSOPHY

10. Digital Age

1990–2020 AD

Let's step into the digital age, when philosophy faced a brand-new world. In 1998, in the encyclical "Fides et ratio," John Paul II wrote that faith and reason are like two wings. Since the 1990s mindfulness – focusing on the present moment – has been popular. Whether artificial intelligence can be conscious is a problem for the philosophy of mind. The "trolley problem" returns in debates about decisions made by self-driving cars. A "filter bubble" means we mostly see what we already like. In 2015, in "Laudato si'," Pope Francis wrote about caring for our common home, the Earth. In 2016 Oxford Dictionaries chose "post-truth" as its word of the year. Minimalism encourages owning fewer things, and streaming services spark debate about fair pay for artists. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Music streaming services spark ethical debates about...**
 - a) the color of album covers
 - b) the length of songs
 - c) the number of notes
 - d) fair pay for artists
2. 👁️ **The "trolley problem" thought experiment appears today in debates about...**
 - a) cooking
 - b) sports
 - c) fashion trends
 - d) decisions made by self-driving cars
3. 🗨️ **"Post-truth" was chosen as the 2016 Word of the Year by...**
 - a) Merriam-Webster
 - b) Google
 - c) Wikipedia
 - d) Oxford Dictionaries
4. 🌐 **An online "filter bubble" means that...**
 - a) there is no information at all
 - b) everyone thinks the same way
 - c) we mostly see what we already like
 - d) the internet is breaking down
5. ✨ **Minimalism as a lifestyle encourages...**
 - a) collecting everything
 - b) owning fewer things
 - c) living in palaces
 - d) buying more
6. 🙏 **In the encyclical Fides et Ratio (1998), John Paul II wrote that faith and reason are like...**
 - a) two swords
 - b) two wars
 - c) two wings
 - d) two walls
7. 💖 **Mindfulness, popular since the 1990s, is about...**
 - a) remembering the past
 - b) planning the future
 - c) focusing on the present moment
 - d) being constantly busy
8. 🌿 **Pope Francis's encyclical Laudato si' (2015) is about...**
 - a) the space economy
 - b) sports
 - c) caring for our common home, the Earth
 - d) the history of Rome
9. ⭐ **The question of whether artificial intelligence can be conscious is a problem of...**
 - a) cooking
 - b) chemistry
 - c) philosophy of mind
 - d) geography

HISTORY

10. Digital Age

1990–2020 AD

Let's step into the digital age, when the post–Cold War world changed fast. In 1990 Germany reunified, and the Scorpions' song "Wind of Change" sang of the changes after the fall of communism. That same year Lech Wałęsa became Poland's first president chosen in a general election. In 1991 the USSR broke apart. Poland joined NATO in 1999 and the European Union in 2004 – that is, 5 years later. On September 11, 2001, attacks in the USA destroyed the World Trade Center towers. In December 2004 an undersea earthquake triggered a tsunami in the Indian Ocean. And in 2010 the Smolensk air disaster took the lives of 96 people, including Poland's president. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The Scorpions song "Wind of Change" (1990) is about...
 - a) a car race
 - b) changes after the fall of communism
 - c) outer space
 - d) a seaside vacation
 2. 👁 Germany was reunified in...

a) 1945	b) 1989
c) 1990	d) 2000
 3. 🇵🇱 Poland joined NATO in 1999 and the European Union in...

a) 1990	b) 2004
c) 2010	d) 1995
 4. ➡ Poland joined NATO in 1999 and the EU in 2004. How many years later was that?
-
5. 🚩 The USSR broke up in...

a) 1991	b) 1995
c) 1985	d) 1989
 6. 🌐 The September 11, 2001 attacks in the USA destroyed, among other things, ...

a) the White House	b) the Statue of Liberty
c) the World Trade Center towers	d) the Golden Gate Bridge
 7. ❤ The first president of Poland elected by popular vote (1990) was...

a) Lech Wałęsa	b) Tadeusz Mazowiecki
c) Wojciech Jaruzelski	d) Aleksander Kwaśniewski
 8. 🌿 The Indian Ocean tsunami of December 2004 was caused by...

a) an undersea earthquake	b) a hurricane
c) an explosion on the Moon	d) melting glaciers
 9. ⭐ The Smolensk air disaster (2010) took the lives of...
 - a) the president of the United States
 - b) 96 people, including Poland's president
 - c) only the two pilots of the plane
 - d) no one, as everyone survived

LINGUISTICS

10. Digital Age

1990–2020 AD

Let's step into the digital age, when language moved into phones and computers. Texting on a phone with buttons required pressing a key several times. In 1999 in Japan, Shigetaka Kurita invented emoji. The Unicode standard lets computers store characters from all the world's scripts. The word "hashtag" comes from the # sign. In 2011 Polish Sign Language was recognized by law. In 2013 Oxford Dictionaries chose "selfie" as its word of the year. Since 2016 Google Translate has used neural networks. Meanwhile languages are dying out – a language vanishes every few weeks somewhere in the world. And Olga Tokarczuk, Nobel laureate for 2018, also won the International Booker Prize for "Flights." Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Emoji, the little picture icons, were invented in Japan in 1999 by...**
 - a) Hideo Kojima
 - b) Bill Gates
 - c) Shigetaka Kurita
 - d) Steve Jobs
2. 👁️ **The Unicode standard allows computers to store...**
 - a) only digits
 - b) characters from all the world's scripts
 - c) musical notes
 - d) only the Latin alphabet
3. 🗨️ **The word "hashtag" comes from the symbol...**
 - a) &
 - b) #
 - c) @
 - d) %
4. 🗣️ **Since 2016, Google Translate has used...**
 - a) people in an office
 - b) neural networks
 - c) paper dictionaries
 - d) fortune tellers
5. ⌨️ **Typing text messages on a phone with a button keypad required...**
 - a) pressing a key several times
 - b) pressing with your feet
 - c) speaking out loud
 - d) writing with a stylus
6. 🗣️ **Polish Sign Language (PJM) was recognized by law in...**
 - a) 1991
 - b) 1911
 - c) 2011
 - d) 2021
7. 💖 **"Selfie" was chosen as Oxford Dictionaries' Word of the Year in...**
 - a) 2013
 - b) 2003
 - c) 1993
 - d) 2023
8. 🌿 **Language extinction is a phenomenon in which...**
 - a) languages double in number
 - b) languages freeze solid
 - c) a language vanishes every few weeks
 - d) everyone ends up speaking alike
9. ⭐ **Olga Tokarczuk received the Nobel Prize in Literature (for 2018). Her novel *Flights* also won...**
 - a) an Oscar
 - b) the Palme d'Or
 - c) a Grammy
 - d) the International Booker Prize

LITERARY STUDIES

10. Digital Age

1990–2020 AD

Let's step into the digital age, when literature changed its form. In 1996 Wisława Szymborska received the Nobel Prize. In 1997 the first "Harry Potter" book came out. Andrzej Sapkowski's "The Witcher" was adapted as a video game and a TV series. In 2008 Suzanne Collins published "The Hunger Games," an example of a dystopian novel. More and more people read e-books – an electronic version of a book – and listen to audiobooks while running, driving or cleaning. In her Nobel lecture Olga Tokarczuk spoke of the "tender narrator," and her novel "Drive Your Plow Over the Bones of the Dead" is, among other things, about defending animals. And "The Little Prince" is available in over 500 languages. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏆 Andrzej Sapkowski's *The Witcher* has been adapted as...
 - a) a ballet
 - b) a video game and a TV series
 - c) only a comic book
 - d) an opera
2. 👁 The first *Harry Potter* book was published in...
 - a) 1977
 - b) 2007
 - c) 1997
 - d) 1987
3. 📖 An e-book is...
 - a) a picture book
 - b) a dictionary
 - c) a newspaper
 - d) an electronic version of a book
4. 📖 Suzanne Collins's *The Hunger Games* series (2008) is an example of a...
 - a) dystopian novel
 - b) historical novel
 - c) romance novel
 - d) nature book
5. 🎧 Audiobooks let you "read" books while...
 - a) swimming underwater
 - b) sleeping
 - c) running, driving or cleaning
 - d) scuba diving
6. 🏆 Wisława Szymborska received the Nobel Prize in...
 - a) 2006
 - b) 1986
 - c) 1976
 - d) 1996
7. ❤ In her Nobel lecture, Olga Tokarczuk spoke about the "tender..."
 - a) king
 - b) neighbor
 - c) robot
 - d) narrator
8. 🌿 Olga Tokarczuk's novel *Drive Your Plow Over the Bones of the Dead* is, among other things, about...
 - a) defending animals
 - b) the Trojan War
 - c) space travel
 - d) the kings of Poland
9. ⭐ The *Little Prince* is the most translated book after the Bible, available in...
 - a) 5,000 languages
 - b) over 500 languages
 - c) 5 languages
 - d) 50 languages

CULTURE AND RELIGION

10. Digital Age

1990–2020 AD

Let's step into the digital age, when culture and faith met the screen. In 1995 "Toy Story" (1995) became the first feature film made entirely by computer. In 2012 "Gangnam Style," and later the "Fortnite" dances, became examples of internet dance trends. In 2013 Benedict XVI resigned from the papacy, and his successor, Francis, became the first pope from South America. In 2014 John Paul II was declared a saint. In 2015 Paweł Pawlikowski's "Ida" won an Oscar. In 2016 Kraków hosted World Youth Day. In 2017 "Loving Vincent" was made, in which every frame was painted in oils. And in 2019 fire broke out in Notre-Dame Cathedral in Paris. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏳️ **World Youth Day in Kraków took place in...**
 - a) 2020
 - b) 1996
 - c) 2016
 - d) 2006
2. 🎥 **The first feature-length animated film made entirely by computer was...**
 - a) The Lion King
 - b) Shrek 2
 - c) Snow White
 - d) Toy Story (1995)
3. 📖 **John Paul II was declared a saint in...**
 - a) 2014
 - b) 2005
 - c) 2020
 - d) 2011
4. 🎨 **The film Loving Vincent (2017) was unique because...**
 - a) it lasted 10 hours
 - b) every frame was painted in oils
 - c) it was a silent film
 - d) it was shot on a phone
5. 🕺 **Fortnite dances and "Gangnam Style" (2012) are examples of...**
 - a) internet dance trends
 - b) court dances
 - c) classical ballet
 - d) religious rites
6. 🙋 **Pope Francis (from 2013) was the first pope to come from...**
 - a) Australia
 - b) Asia
 - c) South America
 - d) Africa
7. 💖 **Paweł Pawlikowski's film Ida won an Oscar in...**
 - a) 1995
 - b) 2015
 - c) 2020
 - d) 2005
8. 🌿 **The fire at Notre-Dame Cathedral in Paris broke out in...**
 - a) 2009
 - b) 2019
 - c) 2015
 - d) 1999
9. ⭐ **In 2013, Benedict XVI...**
 - a) moved the Vatican
 - b) announced a new council
 - c) resigned from the papacy
 - d) became a cardinal

ANSWERS

ECONOMICS AND FINANCE

10. Digital Age

1990–2020 AD

Let's step into the digital age, when money went virtual. In 1995 Poland redenominated its currency: 10,000 old zlotys became 1 new zloty. In 2002 euro cash entered circulation. In 2008 Spotify launched, and the financial crisis began with the collapse of the US mortgage market. A year later bitcoin appeared – a cryptocurrency. In 2015 BLIK was introduced, a Polish system for paying with a code from your phone. Contactless payment means holding your card near the terminal. Crowdfunding means raising money online. And a circular economy is about reusing raw materials. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 Spotify was launched in...
 - a) 1988
 - b) 1998
 - c) 2008
 - d) 2018
2. 👁 Euro banknotes and coins went into circulation in...
 - a) 2012
 - b) 2002
 - c) 1992
 - d) 1995
3. 🗨 Bitcoin is...
 - a) a gold coin
 - b) a cryptocurrency
 - c) a credit card
 - d) a bank
4. ➡ In the 1995 redenomination of the Polish zloty, 10,000 old zloty were exchanged for...
 - a) 10 new zloty
 - b) 100 new zloty
 - c) 1 new zloty
 - d) 1,000 new zloty
5. ⚡ Contactless payment means...
 - a) holding your card near the terminal
 - b) bartering goods
 - c) sending a letter
 - d) signing a paper slip
6. 🌋 The 2008 financial crisis began with...
 - a) a volcanic eruption
 - b) a pandemic
 - c) the collapse of the US mortgage market
 - d) a war in Europe
7. 💖 BLIK is a Polish payment system that uses...
 - a) a code from your phone
 - b) checks
 - c) a chip card
 - d) cash
8. 🍃 A "circular economy" is based on...
 - a) reusing raw materials
 - b) trading only at home
 - c) throwing everything away
 - d) closing factories
9. ☆ Crowdfunding is...
 - a) a state lottery
 - b) a tax on purchases
 - c) a bank loan
 - d) raising money online

PSYCHOLOGY

10. Digital Age

1990–2020 AD

Let's step into the digital age and look into the modern mind. In 1993 the "Mozart effect" was announced – the claim that listening to Mozart improves test scores, though newer research did not confirm it. In 1995 Daniel Goleman popularized emotional intelligence, the ability to understand your own and others' emotions. Daniel Kahneman described two systems of thought: a fast one and a slow one. Carol Dweck described the "growth mindset" – the belief that abilities can be developed through effort. FOMO is the fear of missing out on something, and cyberbullying means harassing others online. Using a smartphone before bed makes it harder to fall asleep, because blue light disrupts sleep. Exercise and sport improve mood and concentration, and forest bathing helps reduce stress. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The "Mozart effect" (1993) is the claim that listening to Mozart...
 - a) changes your eye color
 - b) teaches you to fly
 - c) improves test scores
 - d) cures a runny nose
2. 👁 In Thinking, Fast and Slow, Daniel Kahneman described two systems of...
 - a) thought: a fast one and a slow one
 - b) vision
 - c) counting
 - d) hearing
3. 🗞 FOMO is the fear of...
 - a) missing out on something
 - b) water
 - c) the dark
 - d) spiders
4. ➡ Carol Dweck described the "growth mindset": the belief that abilities...
 - a) depend on your zodiac sign
 - b) are fixed from birth
 - c) can be developed through effort
 - d) belong only to geniuses
5. 🏃 Research shows that exercise and sports improve...
 - a) hair color
 - b) only muscle strength
 - c) the height of adults
 - d) mood and concentration
6. 🧠 Emotional intelligence, popularized by Daniel Goleman (1995), is the ability to...
 - a) count quickly
 - b) understand your own and others' emotions
 - c) memorize dates
 - d) run fast
7. 💖 Using a smartphone for too long before bed makes it harder to fall asleep because...
 - a) it is too quiet then
 - b) the phone is too heavy
 - c) blue light disrupts sleep
 - d) the vibrations hurt
8. 🌿 Contact with nature, such as "forest bathing" (shinrin-yoku), helps...
 - a) reduce stress
 - b) change your skin color
 - c) learn languages
 - d) you grow taller
9. ☆ Cyberbullying is...
 - a) a computer game
 - b) an antivirus program
 - c) harassing others online
 - d) a kind of sport

EDUCATION

10. Digital Age

1990–2020 AD

Let's step into the digital age and visit a school. In 1998 LEGO Mindstorms appeared – robotics teaches programming through play. That same year Poland joined the Erasmus program, which lets students study abroad in Europe. In 1999 an education reform introduced gimnazja (lower secondary schools) in Poland. Khan Academy began with videos Sal Khan recorded for his cousin. In a "flipped classroom," students learn the topic at home. In 2014 Malala Yousafzai received the Nobel Prize for fighting for girls' right to education. In 2020–2021, during the pandemic, Poland ran remote schooling on a massive scale. Music-learning apps listen to students play and correct mistakes in real time, and environmental education teaches sorting waste and saving water. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎸 Apps for learning instruments such as the guitar listen to the student play and...
 - a) play for them
 - b) send a letter
 - c) turn off the sound
 - d) correct mistakes in real time
2. 👁 Khan Academy, a free online school, began with videos Sal Khan recorded for his...
 - a) neighbor
 - b) president
 - c) cousin
 - d) dog
3. 📖 Large-scale remote learning in Poland took place in...
 - a) 2015
 - b) 1995
 - c) 2005
 - d) 2020–2021, during the pandemic
4. 🔄 The "flipped classroom" method means that...
 - a) the class studies at night
 - b) students learn the topic at home
 - c) the teacher stands backward
 - d) there are no lessons at school
5. 🤖 Robotics in schools, e.g. LEGO Mindstorms kits (1998), teaches...
 - a) singing
 - b) programming through play
 - c) horseback riding
 - d) cooking
6. 🌍 The Erasmus program allows students to...
 - a) skip classes
 - b) live in space
 - c) get a free car
 - d) study abroad in Europe
7. ❤ In 2014, Malala Yousafzai received the Nobel Prize for her fight for...
 - a) girls' right to education
 - b) clean seas
 - c) animal rights
 - d) a free internet
8. 🌿 Environmental education teaches, among other things, ...
 - a) lighting campfires in the forest
 - b) sorting waste and saving water
 - c) collecting birds' eggs
 - d) feeding bread to wild animals
9. ☆ The 1999 education reform in Poland introduced...
 - a) preschools
 - b) gimnazja (lower secondary schools)
 - c) universities
 - d) high schools

SOCIOLOGY

10. Digital Age

1990–2020 AD

Let's step into the digital age, when society began to live online. In 1993 the Great Orchestra of Christmas Charity played for the first time. In 2001 Wikipedia launched, as did the Noble Gift (Szlachetna Paczka), in which donors help specific families. In 2004 Mark Zuckerberg founded Facebook. Since about 2007 more people live in cities than in the countryside. In 2011 the world's population passed 7 billion. The 2015 migration crisis in Europe was linked mainly to the war in Syria. In 2018 Greta Thunberg began protesting about the climate. Influencers appeared – people who shape opinions on the internet – and a flash mob is a sudden group performance in public. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The Great Orchestra of Christmas Charity (WOŚP) held its first fundraiser in...
a) 2013
b) 2003
c) 1993
d) 1983
2. 👁 Facebook was founded in 2004 by...
a) Mark Zuckerberg
b) Jeff Bezos
c) Bill Gates
d) Elon Musk
3. 🗨 An "influencer" is a person who...
a) designs houses
b) writes dictionaries
c) repairs computers
d) shapes opinions on the internet
4. 🌐 The world's population passed 7 billion in...
a) 2011
b) 1991
c) 2001
d) 2021
5. 🚶 A flash mob is...
a) a disease
b) a sudden group performance in public
c) a board game
d) an online store
6. 🗣 In which year was Wikipedia, the encyclopedia written by volunteers, launched?
a) 1989
b) 2001
c) 2008
d) 1995
7. 💚 In 2018, Greta Thunberg began protesting outside the Swedish parliament about...
a) schools
b) the climate
c) sports
d) taxes
8. 🌿 Because of urbanization, since about 2007...
a) people have been living on ships
b) everyone lives in the countryside
c) cities have been disappearing
d) more people live in cities than in the countryside
9. ⭐ The 2015 migration crisis in Europe was linked mainly to...
a) a volcanic eruption in Iceland
b) the war in Syria
c) a hurricane in the USA
d) a war in Poland

LAW

10. Digital Age

1990–2020 AD

Let's step into the digital age and take a look at the law. In 1992 the Maastricht Treaty created the European Union, and the Schengen Agreement abolishes checks at internal borders. Poland's current Constitution has been in force since 1997, and it confirms that the national anthem is "Mazurek Dąbrowskiego" (Dąbrowski's Mazurka). Also in 1997 the Kyoto Protocol committed countries to reduce greenhouse gas emissions. In 2002 the International Criminal Court in The Hague was set up to try war crimes and genocide. In 2006 the UN Convention on the Rights of Persons with Disabilities obliged states to ensure equal opportunities. The right to be forgotten lets us demand the removal of some data about us, and the GDPR (RODO) protects personal data. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏳️ **The 1997 Constitution of Poland confirms that the Polish national anthem is...**
 - a) "Warszawianka" (Song of Warsaw)
 - b) "Bogurodzica" (Mother of God)
 - c) "Mazurek Dąbrowskiego" (Dąbrowski's Mazurka)
 - d) "Rota" (The Oath)
2. 👁️ **The current Constitution of the Republic of Poland has been in force since...**
 - a) 1921
 - b) 1989
 - c) 1997
 - d) 2004
3. 🗨️ **The GDPR (RODO in Polish) is a set of rules protecting...**
 - a) personal data
 - b) animals
 - c) music copyrights
 - d) forests
4. 🇪🇺 **The Maastricht Treaty (1992) created...**
 - a) the UN
 - b) the Warsaw Pact
 - c) the European Union
 - d) NATO
5. ✈️ **The Schengen Agreement abolishes...**
 - a) passports altogether
 - b) driver's licenses
 - c) taxes
 - d) checks at internal borders
6. 🏛️ **The International Criminal Court in The Hague, established in 2002, tries...**
 - a) traffic accidents
 - b) divorce cases
 - c) war crimes and genocide
 - d) election disputes
7. 💖 **The "right to be forgotten" online means we can demand...**
 - a) the removal of some data about us
 - b) free internet access
 - c) that our password be forgotten
 - d) a new surname
8. 🌿 **The Kyoto Protocol (1997) obliged countries to...**
 - a) reduce greenhouse gas emissions
 - b) ban airplanes
 - c) cut down forests
 - d) build coal power plants
9. ⭐ **The UN Convention on the Rights of Persons with Disabilities (2006) obliges countries to...**
 - a) restrict rights
 - b) change nothing at all
 - c) ensure equal opportunities
 - d) close schools

OTHER (HUMANITIES)

10. Digital Age

1990–2020 AD

Let's step into the digital age, full of remarkable events. In 1997 the Nike, Poland's top literary award, was first given. Facebook was founded in 2004 and YouTube in 2005 – so YouTube is 1 year younger. In that same year, 2004, the Warsaw Rising Museum opened on the 60th anniversary of the Uprising. In 2012 the Nobel Peace Prize went to the European Union. In 2013 the POLIN Museum of the History of Polish Jews opened. In 2014 Conchita Wurst won Eurovision. In 2015 Robert Lewandowski scored 5 goals in 9 minutes. In 2019 the first image of a black hole was published, and the 2019/2020 bushfires in Australia destroyed the habitats of koalas and kangaroos. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 The 2014 Eurovision Song Contest was won by the Austrian singer...
 - a) Adele
 - b) Conchita Wurst
 - c) Madonna
 - d) Beyoncé
 2. 👁 The first image of a black hole was published in...
 - a) 2019
 - b) 1999
 - c) 2009
 - d) 1989
 3. 🏆 The Nike Award, Poland's most important literary prize, has been awarded since...
 - a) 1997
 - b) 2017
 - c) 1897
 - d) 1957
 4. 📺 YouTube was founded in 2005 and Facebook in 2004. How many years younger is YouTube?
-
5. ⚡ In 2015, Robert Lewandowski scored 5 goals for Bayern in a single match within...
 - a) 1 minute
 - b) 45 minutes
 - c) 9 minutes
 - d) 90 minutes
 6. 🏆 The 2012 Nobel Peace Prize was awarded to...
 - a) the European Union
 - b) NATO
 - c) FIFA
 - d) Google
 7. ❤ POLIN Museum of the History of Polish Jews opened in Warsaw in...
 - a) 1993
 - b) 2013
 - c) 2003
 - d) 2020
 8. 🌿 The 2019/2020 bushfire season in Australia destroyed the habitats of...
 - a) European bison
 - b) polar bears
 - c) koalas and kangaroos
 - d) emperor penguins
 9. ⭐ The Warsaw Rising Museum opened in 2004 on...
 - a) its 100th anniversary
 - b) the 60th anniversary of the Uprising
 - c) its 10th anniversary
 - d) the day the war ended

ARCHITECTURE AND URBAN PLANNING

10. Digital Age

1990–2020 AD

Let's step into the digital age, when architects designed with computers. In 1997 Frank Gehry designed the Guggenheim Museum in Bilbao. In 2000 the Øresund Bridge linked Denmark and Sweden. In 2004 Zaha Hadid became the first woman to receive the Pritzker Prize. In 2010 the Burj Khalifa, the world's tallest building, rose in Dubai. Warsaw's National Stadium was built for Euro 2012. Vertical gardens, like Bosco Verticale from 2014, help clean the air and cool the city. Passive buildings use very little energy because they are superbly insulated and airtight. After the 2011 earthquake and tsunami in Japan, designers tightened building safety standards. And in Hamburg's Elbphilharmonie, opened in 2017, the audience sits around the orchestra. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **The Elbphilharmonie in Hamburg (2017) is famous for a hall in which...**
 - a) the audience sits around the orchestra
 - b) music is played underwater
 - c) there is no roof
 - d) people sit on the grass
2. 🌐 **The world's tallest building, the Burj Khalifa (2010), stands in...**
 - a) Warsaw
 - b) New York
 - c) Shanghai
 - d) Dubai
3. 🏠 **The Guggenheim Museum in Bilbao (1997) was designed by...**
 - a) Le Corbusier
 - b) Zaha Hadid
 - c) Frank Gehry
 - d) Antoni Gaudí
4. ⚡ **Passive houses use very little energy because...**
 - a) they are made of paper
 - b) they have no windows
 - c) they are underground
 - d) they are superbly insulated and airtight
5. 🏆 **The National Stadium in Warsaw was built for...**
 - a) Euro 2020
 - b) Euro 2012
 - c) the 2000 Olympics
 - d) the 1974 World Cup
6. 🌉 **The Øresund Bridge (2000) connects...**
 - a) Denmark and Sweden
 - b) Poland and Germany
 - c) England and France
 - d) Italy and Sicily
7. 💎 **In 2004, Zaha Hadid became the first woman to receive the...**
 - a) Nobel Prize
 - b) Grammy
 - c) Oscar
 - d) Pritzker Prize
8. 🌿 **Vertical gardens on building walls (e.g. Bosco Verticale in Milan, 2014) help...**
 - a) clean the air and cool the city
 - b) reduce the number of windows
 - c) raise fish
 - d) block the sun forever
9. ⭐ **After the 2011 earthquake and tsunami in Japan, designers...**
 - a) stopped building altogether
 - b) moved cities to the Moon
 - c) tightened building safety standards
 - d) built a wall around the island

10. Digital Age

1990–2020 AD

Let's step into the digital age, when electronics fit in the palm of your hand. LED stands for light-emitting diode, and the blue LED, which made white LEDs possible, was developed in the 1990s in Japan. In 2006 the Wii controller, and in 2010 Kinect, let players control games with body movements. In 2007 the iPhone made touchscreens widespread. In 2012 the Tesla Model S appeared, driven by an electric motor running on a battery. Noise-canceling headphones produce sound opposite to the noise. A smartwatch measures heart rate and step count, and a smart home lets you control lights and heating from your phone. And worn-out devices, or e-waste, should be taken to special collection points. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Active noise-canceling headphones work because they...**
 - a) produce sound opposite to the noise
 - b) are made of lead
 - c) switch off your ears
 - d) have thick cushions
2. 👁️ **Touchscreens in smartphones were popularized by the iPhone, unveiled in...**
 - a) 2007
 - b) 2017
 - c) 1997
 - d) 1987
3. 🗨️ **The abbreviation LED stands for...**
 - a) light-emitting diode
 - b) wire bulb
 - c) gas lamp
 - d) electric candle
4. 🇧🇷 **The blue LED, which made white LEDs possible, was developed in the 1990s in...**
 - a) Brazil
 - b) Egypt
 - c) Poland
 - d) Japan
5. 🎮 **The Wii controller (2006) and Kinect (2010) let players control games with...**
 - a) body movements
 - b) their eyes closed
 - c) their voice only
 - d) their thoughts
6. 🏠 **A smart home lets you...**
 - a) build a house in a day
 - b) change wall colors by themselves
 - c) live without electricity
 - d) control lights and heating from your phone
7. ❤️ **A smartwatch sensor can measure...**
 - a) eye color
 - b) heart rate and step count
 - c) thoughts
 - d) age
8. 🌿 **Electric cars, such as the Tesla Model S (2012), are powered by...**
 - a) an electric motor running on a battery
 - b) gasoline
 - c) steam
 - d) wind
9. ☆ **E-waste, i.e. worn-out electronic devices, should be...**
 - a) burned in a stove
 - b) taken to special collection points
 - c) buried in the garden
 - d) thrown into the forest

COMPUTER SCIENCE AND TELECOMMUNICATIONS

**10. Digital Age**

1990–2020 AD

Let's step into the digital age, when the internet wrapped around the whole world. Tim Berners-Lee created the World Wide Web and released it without patent fees because he wanted it to be open to everyone. In 1991 Linus Torvalds created Linux. The MP3 format is used for lossy audio compression, and in computing one byte has 8 bits. In 1997 the computer Deep Blue defeated Garry Kasparov. In 1998 Larry Page and Sergey Brin founded Google. In 2003 Skype made free video calls over the internet possible. In 2005 YouTube was founded. In 2016 the AlphaGo program beat a champion at the game of go. Since 2019 we have had 5G – the fifth generation of mobile networks. And an account password should be long and hard to guess. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **The MP3 format is used mainly for...**
 - a) lossy audio compression
 - b) storing vector images
 - c) lossless text compression
 - d) encrypting email messages
2. 👁️ **The Linux operating system was created in 1991 by...**
 - a) Linus Torvalds
 - b) Bill Gates
 - c) Larry Page
 - d) Steve Jobs
3. 📖 **What does the abbreviation WWW stand for?**
 - a) World Web Wireless
 - b) Wide Web Window
 - c) World Wide Web
 - d) Web Writer Workshop
4. ➡️ **How many bits are there in one byte?**

5. 🏆 **In 2016, the AlphaGo program defeated a champion at the game of...**
 - a) chess
 - b) checkers
 - c) go
 - d) poker
6. 🗣️ **Skype (2003) made it possible to have free...**
 - a) faxes
 - b) paper letters
 - c) video calls over the internet
 - d) telegrams
7. 💖 **An account password should be...**
 - a) your dog's name
 - b) "123456"
 - c) the same everywhere
 - d) long and hard to guess
8. 🌿 **A 5G network is...**
 - a) five gigabytes
 - b) the fifth satellite
 - c) the fifth generation of mobile networks
 - d) five games
9. 🌟 **Tim Berners-Lee made the World Wide Web available without patent fees because he wanted the web to be...**
 - a) for the military only
 - b) secret
 - c) open to everyone
 - d) paid

BIOMEDICAL ENGINEERING

10. Digital Age

1990–2020 AD

Let's step into the digital age, when technology entered the operating room. Cochlear implants let deaf children hear and learn to speak. In 2003 the Human Genome Project was completed. In 2012 CRISPR gene editing was developed; it raises ethical questions because it lets us change DNA, including that of human embryos. In 2013 Poland's first face transplant was performed in Gliwice. The da Vinci robot lets surgeons operate precisely through small incisions, and 3D printers make prostheses and organ models. Bionic prostheses are controlled by signals from the muscles, and an exoskeleton helps people with paralysis walk. Glucose-monitoring apps help people with diabetes. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎧 **Cochlear implants allow deaf children to...**
 - a) run fast
 - b) hear and learn to speak
 - c) see
 - d) fly
2. 👁️ **In medicine, 3D printers are used, among other things, to make...**
 - a) plastic theater costumes
 - b) banknotes
 - c) prostheses and organ models
 - d) books
3. 🗨️ **The da Vinci surgical robot allows a doctor to...**
 - a) stay home instead of going to work
 - b) operate without any training
 - c) operate precisely through small incisions
 - d) see through walls
4. ⚙️ **An exoskeleton is a device that...**
 - a) helps people with paralysis walk
 - b) protects you from rain
 - c) replaces the heart
 - d) measures temperature
5. ⚡ **Bionic prostheses are controlled by...**
 - a) signals from the muscles
 - b) the wind
 - c) the voice
 - d) a remote control
6. 🇵🇱 **Poland's first face transplant was performed in 2013 in...**
 - a) Gliwice
 - b) Poznań
 - c) Gdańsk
 - d) Kraków
7. ❤️ **Glucose-monitoring apps help people with...**
 - a) tooth decay
 - b) a cold
 - c) diabetes
 - d) broken bones
8. 🌿 **The Human Genome Project was completed in...**
 - a) 2023
 - b) 2003
 - c) 1953
 - d) 1983
9. ⭐ **CRISPR gene editing (2012) raises ethical questions because it makes it possible to...**
 - a) only count the genes in a cell
 - b) cure the common cold
 - c) change DNA, including that of human embryos
 - d) dye hair in any color

CHEMICAL ENGINEERING

10. Digital Age

1990–2020 AD

Let's step into the digital age, into the world of chemistry and materials. A CD stores music as tiny pits read by a laser. Lithium-ion batteries power smartphones and laptops. In 2004 graphene was discovered – a layer of carbon just a single atom thick. A car's catalytic converter reduces toxic exhaust emissions. Recycled PET bottles can be turned into fleece and fibers, and biodegradable plastics break down in nature. Sadly, microplastics – tiny bits of plastic in nature – are now everywhere. In 2010 the Deepwater Horizon disaster caused an oil spill into the sea. And since 2021 the EU has banned the sale of single-use plastic straws and cutlery. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 A CD stores music in the form of...
 - a) tiny pits read by a laser
 - b) magnets
 - c) grooves like on vinyl
 - d) holes punched in paper
2. 👁️ Graphene, discovered in 2004, is a layer of carbon as thick as...
 - a) a single atom
 - b) a single hair
 - c) a few centimeters
 - d) one meter
3. 🔋 Lithium-ion batteries power...
 - a) smartphones and laptops
 - b) water mills
 - c) sundials
 - d) candles
4. 🐟 Microplastics are...
 - a) a species of fish
 - b) a new type of steel
 - c) a medicine
 - d) tiny bits of plastic in nature
5. ♻️ Recycled PET bottles can be turned into, among other things, ...
 - a) jet fuel
 - b) paper
 - c) fleece and fibers
 - d) glass
6. 🚗 A catalytic converter in a car...
 - a) increases speed
 - b) cools the engine
 - c) reduces toxic exhaust emissions
 - d) plays music
7. ❤️ Biodegradable materials are ones that...
 - a) are indestructible
 - b) taste like fruit
 - c) break down in nature
 - d) glow in the dark
8. 🌿 The Deepwater Horizon disaster (2010) caused...
 - a) an earthquake
 - b) a tsunami in the Baltic
 - c) a forest fire
 - d) an oil spill into the sea
9. ⭐ The EU ban on selling single-use plastic straws and cutlery has applied since...
 - a) 2021
 - b) 2001
 - c) 1981
 - d) 1991

CIVIL ENGINEERING AND TRANSPORT

**10. Digital Age**

1990–2020 AD

Let's step into the digital age, when travel became fast and smart. GPS navigation guides drivers using signals from satellites. In 2004 the Shanghai Maglev began running; it floats above the track thanks to magnets. The Airbus A380, the largest passenger plane, has two full-length decks. Euro 2012 spurred projects such as the A2 highway from Warsaw to Berlin, and in 2012 Warsaw got its Veturilo city bikes. SpaceX's Falcon 9 rocket is famous because its first stage flies back and lands. In 2016 the Gotthard Tunnel opened – the world's longest railway tunnel. Electric scooters are an example of micromobility, and self-driving cars run on sensors and artificial intelligence. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚦 **GPS navigation in a car tells the driver where to turn based on signals from...**
 - a) the stars
 - b) lighthouses
 - c) satellites
 - d) local radio stations
2. 🚆 **The Shanghai Maglev train (2004) floats above its track thanks to...**
 - a) wheels
 - b) wings
 - c) magnets
 - d) an air cushion
3. ✈️ **The Airbus A380, the largest passenger airplane, has...**
 - a) one small deck
 - b) paddle wheels
 - c) sails
 - d) two full-length decks
4. 🚗 **Self-driving cars operate without a driver thanks to...**
 - a) sensors and artificial intelligence
 - b) strings
 - c) horses
 - d) magnets in the asphalt
5. 🚲 **Pay-by-the-minute city bikes appeared in Warsaw as Veturilo in...**
 - a) 2022
 - b) 1992
 - c) 2002
 - d) 2012
6. 🚇 **The Gotthard Base Tunnel in Switzerland (2016) is...**
 - a) the world's longest railway tunnel
 - b) a canal
 - c) a bridge
 - d) an airport
7. 🚀 **SpaceX's Falcon 9 rocket is famous because...**
 - a) it travels underwater
 - b) its first stage flies back and lands
 - c) it needs no fuel
 - d) it is made of wood
8. 🛴 **Electric scooters in cities are an example of...**
 - a) micromobility
 - b) shipping
 - c) railways
 - d) space transport
9. 🌟 **The A2 motorway from Warsaw toward Berlin was built partly in connection with...**
 - a) the 1980 Olympics
 - b) a war
 - c) Euro 2012
 - d) the 1900 World's Fair

MATERIALS ENGINEERING

10. Digital Age

1990–2020 AD

Let's step into the digital age, into the world of new materials. Modern guitar strings are made of nylon and steel. Smartphone screen glass is toughened and scratch-resistant. Shape-memory materials such as nitinol return to their original shape when heated. Aerogel is about 99% air. In 2004 graphene was discovered by peeling layers of graphite with sticky tape. Carbon-fiber composites replaced metal in racing bicycle frames, among other things, and in the 2011 Boeing 787 Dreamliner half of it is made of composites. Kevlar in vests protects people because the fiber is extremely resistant to tearing. And packaging made from mycelium or algae is an example of eco-friendly and biodegradable materials. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎸 **Modern guitar strings are made of...**
 - a) nylon and steel
 - b) animal gut only
 - c) wool
 - d) bamboo
2. 📱 **Smartphone screen glass, such as Gorilla Glass, is...**
 - a) soft like rubber
 - b) made of wood
 - c) toughened and scratch-resistant
 - d) made of paper
3. 🗨️ **When heated, shape-memory materials such as nitinol...**
 - a) disappear
 - b) change color
 - c) return to their original shape
 - d) melt
4. 📏 **Aerogel is one of the lightest materials because it is about 99%...**
 - a) plastic
 - b) air
 - c) water
 - d) iron
5. 📖 **Carbon-fiber composites have replaced metal in, among other things, ...**
 - a) books
 - b) racing bicycle frames
 - c) spoons
 - d) quilts
6. ✈️ **The Boeing 787 Dreamliner (2011) is unique because...**
 - a) half of it is made of composites
 - b) it has no wings
 - c) it is powered by a sail
 - d) it is made of wood
7. 💖 **Graphene was discovered in 2004 by scientists who peeled layers off graphite using...**
 - a) fire
 - b) sticky tape
 - c) a hammer
 - d) a knife
8. 🌱 **Packaging made from mycelium or algae is an example of materials that are...**
 - a) eco-friendly and biodegradable
 - b) metallic
 - c) radioactive
 - d) explosive
9. ⭐ **Kevlar bulletproof vests protect people because the fiber is...**
 - a) soft like cotton wool
 - b) transparent
 - c) magnetic
 - d) extremely resistant to tearing

1. a 2. c 3. c 4. b 5. b 6. a 7. b 8. a 9. d

ANSWERS

MECHANICAL ENGINEERING

10. Digital Age

1990–2020 AD

Let's step into the digital age, when robots left the labs. In 1997 Sojourner became the first rover on Mars, and in 2012 Curiosity landed there. Mars rovers are powered by sunlight or by the radioactive decay of plutonium. Polish students have won the University Rover Challenge many times. In 2000 Honda unveiled ASIMO, a robot that could walk and conduct an orchestra. In 2002 the Roomba robot vacuum moved around using bump sensors and mapping. In 2017 the robot Sophia received Saudi Arabian citizenship. "Drone" is the everyday name for an unmanned aerial vehicle. And robots in car factories mostly do welding and painting. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎌 **Honda's humanoid robot ASIMO (2000) could, among other things, ...**
 - a) walk and conduct an orchestra
 - b) fly
 - c) swim
 - d) cook dinner
2. 🦿 **The Curiosity rover landed on Mars in...**
 - a) 2022
 - b) 2002
 - c) 2012
 - d) 1992
3. 🗨️ **"Drone" is the everyday name for...**
 - a) a submarine
 - b) a kitchen robot
 - c) a race car
 - d) an unmanned aerial vehicle
4. 🚀 **The Sojourner rover (1997) was the first rover on...**
 - a) the Moon
 - b) Mars
 - c) Venus
 - d) Jupiter
5. 🧹 **The Roomba robot vacuum (2002) finds its way around the house thanks to...**
 - a) bump sensors and mapping
 - b) ropes
 - c) a wired remote
 - d) magnets in the floor
6. 🇵🇱 **Polish students have repeatedly won the Mars rover competition called...**
 - a) Tour de France
 - b) Formula 1
 - c) Wimbledon
 - d) University Rover Challenge
7. 💖 **In 2017, the robot Sophia became the first robot to receive...**
 - a) a Nobel Prize
 - b) an Olympic medal
 - c) Saudi Arabian citizenship
 - d) a driver's license
8. 🌿 **Mars rovers are powered by solar energy or by...**
 - a) wind
 - b) gasoline
 - c) coal
 - d) the radioactive decay of plutonium
9. ⭐ **Robots in car factories mainly do...**
 - a) car sales
 - b) welding and painting
 - c) road repairs
 - d) ad design

10. Digital Age

1990–2020 AD

Let's step into the digital age, when the world sought cleaner energy. In 2006 China's Three Gorges Dam was completed – the world's largest hydroelectric plant. In 2011 the Fukushima nuclear accident was caused by an earthquake and tsunami. The energy transition means moving from coal to renewable energy sources. Photovoltaics makes electricity from sunlight, and the blades of offshore wind turbines are over 100 m long. A heat pump warms a home with energy from the air or the ground. Shale gas fracking raises fears of groundwater pollution. Anti-smog laws ban burning poor-quality coal. And waste sorting uses bins for paper, glass, metal, plastic and bio waste. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Offshore wind turbines keep getting bigger; their blades are...**
 - a) 1 m long
 - b) over 100 m long
 - c) 1 km long
 - d) 10 cm long
2. 👁 **The Fukushima nuclear accident (2011) was caused by...**
 - a) a meteorite impact
 - b) an earthquake and tsunami
 - c) a forest fire
 - d) a missile attack
3. 🗨 **Photovoltaics means generating electricity from...**
 - a) burning coal
 - b) moving water
 - c) wind
 - d) sunlight
4. 🇨🇳 **The Three Gorges Dam in China (2006) is...**
 - a) an airport
 - b) the smallest dam
 - c) the world's largest hydroelectric plant
 - d) a gold mine
5. 🇵🇱 **To reduce smog in Polish cities, anti-smog resolutions were introduced that...**
 - a) ban burning poor-quality coal
 - b) ban driving cars
 - c) ban breathing
 - d) close schools
6. 🇵🇱 **Waste sorting in Poland includes, among others, bins for...**
 - a) only old clothes
 - b) paper, glass, metal, plastic and bio waste
 - c) only stones and rubble
 - d) just one kind of trash for everything
7. ❤ **A heat pump heats a house by drawing energy from...**
 - a) gas only
 - b) the air or the ground
 - c) candles
 - d) coal
8. 🌿 **Extracting shale gas by fracking raises concerns about...**
 - a) the sky changing color
 - b) mountains growing
 - c) groundwater pollution
 - d) the Moon's motion
9. ☆ **The energy transition means moving from coal to...**
 - a) renewable energy sources
 - b) horses
 - c) firewood
 - d) candles

ASTRONOMY

10. Digital Age

1990–2020 AD

Let's step into the digital age, when telescopes and probes unveiled the cosmos. In 1990 the Hubble Space Telescope was launched into orbit. In 1992 Aleksander Wolszczan discovered the first planets outside the Solar System. The International Space Station was built jointly by more than a dozen countries, and it circles the Earth in about 90 minutes. In 2006 Pluto became a dwarf planet, and in 2015 the New Horizons probe sent back the first detailed images of Pluto. In 2012 Voyager 1 became the first to leave the heliosphere. In 2013 Chris Hadfield recorded a music video for "Space Oddity" aboard the station. And in 2015 gravitational waves were detected for the first time. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 In 2013, astronaut Chris Hadfield recorded on the International Space Station...
 - a) a music video for "Space Oddity"
 - b) Canada's anthem on trumpet
 - c) an opera
 - d) an audiobook
2. 👁 The Hubble Space Telescope was launched into orbit in...
 - a) 2010
 - b) 1990
 - c) 1970
 - d) 1960
3. 🗨 In 2006, Pluto stopped being a planet and became...
 - a) a dwarf planet
 - b) a comet
 - c) a star
 - d) a moon
4. 🌌 In 1992, Aleksander Wolszczan discovered the first...
 - a) neutron stars
 - b) black holes
 - c) comets
 - d) planets outside the Solar System
5. ⚡ The International Space Station orbits the Earth in about...
 - a) 9 hours
 - b) 9 minutes
 - c) 90 minutes
 - d) 90 days
6. 🌍 The International Space Station was built jointly by...
 - a) the USA alone
 - b) China alone
 - c) more than a dozen countries
 - d) Russia alone
7. ❤ In 2015, the New Horizons probe sent back the first detailed images of...
 - a) Venus
 - b) Pluto
 - c) the Sun
 - d) Mars
8. 🌿 Gravitational waves, predicted by Einstein, were first detected in...
 - a) 1915
 - b) 1995
 - c) 1965
 - d) 2015
9. ☆ In 2012, the Voyager 1 probe became the first to...
 - a) leave the heliosphere
 - b) hit the Sun
 - c) land on Mars
 - d) return to Earth

1. a 2. b 3. a 4. d 5. c 6. c 7. b 8. d 9. a

ANSWERS

MATHEMATICS

10. Digital Age

1990–2020 AD

Let's step into the digital age, when mathematics became the world's invisible engine. In 1994 in Japan the QR code was invented to track car parts. In 1995 Andrew Wiles proved Fermat's Last Theorem, and in 2003 Grigori Perelman proved the Poincaré conjecture. In 2005 sudoku became a worldwide hit. In 2014 Maryam Mirzakhani became the first woman to receive the Fields Medal. Computers have calculated π to trillions of digits. Music-streaming algorithms recommend songs based on what we listened to before. Mathematical epidemic models help predict the spread of diseases. And cryptocurrencies and digital signatures are secure thanks to cryptography. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Music service algorithms recommend songs based on...**
 - a) a random draw
 - b) the color of the cover
 - c) what we listened to before
 - d) the weather only
2. 👁️ **Fermat's Last Theorem was proved in 1995 by...**
 - a) Andrew Wiles
 - b) Pierre de Fermat
 - c) Albert Einstein
 - d) Stefan Banach
3. 🗉 **The Poincaré conjecture was proved in 2003 by...**
 - a) John Nash
 - b) Andrew Wiles
 - c) Grigori Perelman
 - d) Terence Tao
4. 📱 **The QR code (1994) was invented in Japan to...**
 - a) play games
 - b) pay in stores
 - c) track car parts
 - d) print books
5. ➦ **Sudoku became a worldwide hit in...**
 - a) 1905
 - b) 2020
 - c) 2005
 - d) 1955
6. 👩 **In 2014, Maryam Mirzakhani became the first woman to receive...**
 - a) the Fields Medal
 - b) an Oscar
 - c) a Nobel Prize in mathematics
 - d) the Pulitzer Prize
7. 💖 **With the help of computers, the number π has been calculated to...**
 - a) 10 digits
 - b) 1,000 digits
 - c) trillions of digits
 - d) 100 digits
8. 🌿 **Mathematical models of epidemics help...**
 - a) discover planets
 - b) cure people without medicine
 - c) predict the spread of diseases
 - d) change the weather
9. ⭐ **Cryptocurrencies and digital signatures are secure thanks to...**
 - a) cryptography
 - b) icon colors
 - c) usernames
 - d) luck

OTHER (TECHNOLOGY)

10. Digital Age

1990–2020 AD

Let's step into the digital age, when technology filled everyday life. In the 1990s the first digital camera for ordinary people appeared. Autotune corrects the pitch of sung notes. In many places the barcode has been replaced by the QR code. A fingerprint reader works because everyone has unique fingerprints. In 2011 Siri arrived – voice assistants respond to spoken commands. In 2015 CD Projekt Red released The Witcher 3, a video game acclaimed around the world. Virtual reality requires wearing a headset over your eyes. Citizen-science apps let anyone report bird and plant sightings. And a "digital detox" is a deliberate break from screens. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Auto-Tune is a program that...**
 - a) dances
 - b) corrects the pitch of sung notes
 - c) plays the drums
 - d) writes lyrics
2. 👁️ **The first digital cameras for ordinary people appeared in...**
 - a) the 1870s
 - b) the 1950s
 - c) the 2020s
 - d) the 1990s
3. 🗉 **In many places, the barcode has been replaced by...**
 - a) Morse code
 - b) hieroglyphs
 - c) cuneiform
 - d) the QR code
4. 🖨️ **A fingerprint reader in a phone works because...**
 - a) fingers are warm
 - b) fingers have a smell
 - c) everyone has unique fingerprints
 - d) fingers glow
5. 🎮 **Virtual reality (VR) requires wearing...**
 - a) rubber boots
 - b) woolen gloves
 - c) a firefighter's helmet
 - d) a headset over your eyes
6. 🧑 **The Witcher 3 (2015) by CD Projekt Red is...**
 - a) an opera
 - b) a video game acclaimed around the world
 - c) an animated film
 - d) a radio drama
7. 💖 **Voice assistants such as Siri (2011) respond to...**
 - a) dreams
 - b) spoken commands
 - c) paper letters
 - d) hand gestures only
8. 🌿 **Citizen science apps let anyone...**
 - a) build rockets
 - b) report bird and plant sightings
 - c) control satellites
 - d) dig mines
9. ⭐ **A "digital detox" is...**
 - a) a new game
 - b) an antivirus program
 - c) a deliberate break from screens
 - d) a diet for computers

BIOLOGY

10. Digital Age

1990–2020 AD

Let's step into the digital age, when biology read life like code. In the 1990s mirror neurons were discovered in Italy – they fire when we watch someone else's actions. In 1996 Dolly the sheep was born, the first mammal cloned from an adult cell. The human genome was read – it contains about 20,000 genes. DNA barcoding identifies species by a short fragment of DNA, and every year scientists describe over ten thousand species. In 2007 tardigrades survived a flight in the vacuum of space. Gut bacteria, the microbiome, affect digestion and immunity. Researchers also found that humpback whale songs change from year to year, like hit songs. And since Sudan's death in 2018, the northern white rhino is being saved with the help of IVF. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🏆 **Researchers have discovered that humpback whale songs...**
 - a) are sung only by females
 - b) change from year to year, like hit songs
 - c) can be heard only at night
 - d) are always exactly the same
2. 👁 **Dolly the sheep, the first mammal cloned from an adult cell, was born in...**
 - a) 1996
 - b) 1976
 - c) 2006
 - d) 1986
3. 🗉 **DNA barcoding is a method of identifying species...**
 - a) by a short fragment of DNA
 - b) by their color
 - c) by their smell
 - d) by their voice
4. ➡ **The human genome contains about...**
 - a) 2 million genes
 - b) 200 genes
 - c) 20,000 genes
 - d) 2 genes
5. 🐻 **Tardigrades (water bears) survived exposure to the vacuum of space in...**
 - a) 1907
 - b) 1957
 - c) 2007
 - d) 2027
6. 🦠 **Gut bacteria (the microbiome) affect...**
 - a) hair growth only
 - b) eye color
 - c) handwriting
 - d) digestion and immunity
7. 💖 **Mirror neurons, discovered in Italy in the 1990s, become active when we...**
 - a) eat
 - b) count
 - c) watch someone else's actions
 - d) sleep
8. 🌿 **New species are still being discovered – every year scientists describe about...**
 - a) over ten thousand species
 - b) a million species
 - c) none at all
 - d) two species
9. 🌟 **Sudan, the last male northern white rhino, died in 2018. Today the subspecies...**
 - a) never existed
 - b) is doing wonderfully
 - c) lives in Poland
 - d) is being saved with the help of IVF

CHEMISTRY

10. Digital Age

1990–2020 AD

Let's step into the digital age, into the chemists' laboratories. In 2015–2016 new elements 113–118 were confirmed, so the periodic table now has 118 elements. Element 114 was named flerovium and 116 livermorium, in honor of the labs where they were discovered. In 2018 Frances Arnold won the Nobel Prize for the directed evolution of enzymes, and in 2020 two women were honored for the gene editing method called CRISPR. Ozone in the stratosphere protects us from ultraviolet radiation, and the Montreal agreement is considered a success because the ozone layer is recovering. Ocean acidification comes from the water absorbing carbon dioxide. And clean water is made from seawater by desalination. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 The new elements 113–118 were officially confirmed in...
 - a) 1990
 - b) 1965
 - c) 1915
 - d) 2015–2016
2. 👁 Element 114 was named flerovium and element 116 livermorium in honor of...
 - a) the labs where they were discovered
 - b) famous singers
 - c) cats
 - d) planets
3. 🗉 How many elements does the periodic table contain today?
 - a) 118
 - b) 200
 - c) 50
 - d) 92
4. 🌊 Ocean acidification is caused by...
 - a) strong waves
 - b) explosions on the Sun
 - c) the water absorbing carbon dioxide
 - d) adding lemon juice to the sea
5. 💧 To get fresh water from seawater, people use...
 - a) boiling it with sugar
 - b) filtering through sand only
 - c) desalination
 - d) freezing fish
6. 🧪 Chemist Frances Arnold received the 2018 Nobel Prize for...
 - a) the periodic table
 - b) inventing plastic
 - c) the directed evolution of enzymes
 - d) discovering oxygen
7. 💖 The 2020 Nobel Prize in Chemistry went to two women for a method of...
 - a) gene editing called CRISPR
 - b) making plastic
 - c) dyeing fabrics
 - d) producing glass
8. 🍃 Ozone in the stratosphere protects us from...
 - a) rain
 - b) sound
 - c) ultraviolet radiation
 - d) wind
9. ☆ The Montreal Protocol is considered a success because...
 - a) the ozone layer is recovering
 - b) it got rid of rain
 - c) it banned cars
 - d) it stopped volcanoes

PHYSICS

10. Digital Age

1990–2020 AD

Let's step into the digital age, when physics moved into our pockets. A smartphone microphone turns sound into an electrical signal, and a touchscreen responds to your finger because the body conducts electric charge. In 1995 the Bose–Einstein condensate was created, a state of matter at a temperature close to absolute zero. In 2012 the Higgs boson was discovered at the LHC at CERN – the Large Hadron Collider is about 27 km around. In 2017 the Nobel Prize went to the detection of gravitational waves, and in 2018 Donna Strickland received it for her work on lasers. Quantum computers use qubits that can be 0 and 1 at once. And a rainbow forms when sunlight is refracted in raindrops. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Smartphone microphones convert sound into...**
 - a) light
 - b) an electrical signal
 - c) smell
 - d) heat
2. 👁️ **In 2012, the Higgs boson was discovered...**
 - a) in the Hubble telescope
 - b) on the Moon
 - c) at the LHC at CERN
 - d) in Warsaw
3. 🗨️ **The Large Hadron Collider (LHC) has a circumference of about...**
 - a) 2.7 km
 - b) 27 m
 - c) 27 km
 - d) 270 km
4. ⚡ **A Bose-Einstein condensate, first created in 1995, is a state of matter at a temperature close to...**
 - a) the Sun's core
 - b) room temperature
 - c) absolute zero
 - d) the boiling point of water
5. ⚡ **A smartphone touchscreen responds to a finger because the body...**
 - a) glows
 - b) conducts electric charge
 - c) is warm
 - d) is moist
6. 🏆 **The 2017 Nobel Prize in Physics was awarded for detecting...**
 - a) the Higgs boson
 - b) the electron
 - c) rainbows
 - d) gravitational waves
7. ❤️ **In 2018, Donna Strickland became the third woman ever to win the Nobel Prize in Physics, for her work on...**
 - a) dinosaurs
 - b) volcanoes
 - c) rockets
 - d) lasers
8. 🌈 **A rainbow forms when sunlight...**
 - a) passes through ice
 - b) goes out
 - c) bounces off clouds
 - d) is refracted in raindrops
9. ⭐ **Quantum computers use...**
 - a) gears
 - b) steam
 - c) ordinary bits
 - d) qubits that can be 0 and 1 at once

ENVIRONMENT

10. Digital Age

1990–2020 AD

Let's step into the digital age, when caring for the planet became the whole world's concern. The Białowieża Forest has been on the UNESCO list since 1979. In 1992 the Earth Summit in Rio adopted a convention on biological diversity. In 2015 the Paris Agreement addressed limiting climate change. The greenhouse effect grows stronger as carbon dioxide and methane build up in the atmosphere, and a carbon footprint is the amount of greenhouse gases we cause. The Great Barrier Reef is bleaching because the ocean water is warming, and deforestation of the Amazon is dangerous because the forest absorbs CO₂ and protects species. The Great Pacific Garbage Patch is a mass of plastic in the ocean, and ship noise disturbs whales because they communicate using sound. Luckily, on World Cleanup Day volunteers collect litter. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚢 **Ship noise in the ocean disturbs whales because they...**
 - a) sleep during the day
 - b) don't like music
 - c) have no ears
 - d) communicate using sound
2. 👁️ **The Great Pacific Garbage Patch is...**
 - a) a mass of plastic in the ocean
 - b) an island of sand
 - c) a coral reef
 - d) a glacier
3. 🗨️ **The Earth Summit in Rio de Janeiro (1992) adopted, among other things, a convention on...**
 - a) copyright
 - b) protecting gold
 - c) biological diversity
 - d) soccer
4. ⚖️ **The greenhouse effect intensifies when the atmosphere gains more...**
 - a) oxygen
 - b) helium
 - c) carbon dioxide and methane
 - d) nitrogen
5. 🐠 **The Great Barrier Reef is bleaching because...**
 - a) divers are painting it
 - b) the sun is shining
 - c) fish are eating it
 - d) the ocean water is warming
6. 🧑‍🌾 **World Cleanup Day is a campaign in which...**
 - a) the sky is cleaned
 - b) schools are cleaned
 - c) cars are washed
 - d) volunteers collect litter
7. 💚 **A carbon footprint is...**
 - a) a shoe print in coal
 - b) a mark left by a campfire
 - c) the amount of greenhouse gases we cause
 - d) a black stain
8. 🌿 **What is the 2015 Paris Agreement about?**
 - a) Limiting climate change
 - b) Protecting Paris monuments
 - c) Nuclear disarmament
 - d) The grain trade
9. ⭐ **Deforestation in the Amazon is dangerous because the forest...**
 - a) is small
 - b) grows too fast
 - c) absorbs CO₂ and protects species
 - d) doesn't matter

HEALTH

10. Digital Age

1990–2020 AD

Let's step into the digital age and take care of our health. WHO recommends that children and teens be active for at least 60 minutes every day, and teenagers should sleep about 8–10 hours. The healthy-eating plate shows that half of each meal should be vegetables and fruit. Listening to loud music through headphones for too long can damage your hearing. Smog harms us mainly through fine particulate matter PM2.5 and PM10. Bacterial resistance grows when we overuse antibiotics. The 2014–2016 Ebola epidemic was brought under control through international medical cooperation. The COVID-19 pandemic began at the end of 2019, and mRNA vaccines teach the body to recognize the virus's spike protein. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎧 **Listening to loud music through headphones for too long can...**
 - a) damage your hearing
 - b) extend your life
 - c) improve your eyesight
 - d) strengthen your bones
2. 🍽️ **The food pyramid was replaced by a "plate" chart, which shows that half of a meal should be...**
 - a) bread
 - b) vegetables and fruit
 - c) meat
 - d) sweets
3. 📅 **The COVID-19 pandemic began at the end of...**
 - a) 2019
 - b) 2017
 - c) 2009
 - d) 1999
4. 🧬 **mRNA vaccines against COVID-19 teach the body to recognize...**
 - a) the virus's spike protein
 - b) the color of blood
 - c) gut bacteria
 - d) a smell
5. 🏃 **The WHO recommends that children and teenagers be physically active every day for at least...**
 - a) 5 minutes
 - b) 10 minutes
 - c) 5 hours
 - d) 60 minutes
6. 🦠 **The Ebola epidemic in West Africa (2014–2016) was brought under control thanks to...**
 - a) international medical cooperation
 - b) closing off Africa
 - c) prayer alone
 - d) people fleeing
7. 💤 **Teenagers should sleep for...**
 - a) 2 hours
 - b) 4 hours
 - c) about 8–10 hours
 - d) 15 hours
8. 🌫️ **Smog harms health mainly through...**
 - a) water vapor
 - b) the scent of flowers
 - c) oxygen
 - d) fine particulate matter PM2.5 and PM10
9. ⭐ **Bacterial resistance to antibiotics grows when...**
 - a) we eat fruit
 - b) we drink water
 - c) we overuse antibiotics
 - d) we sleep

PHYSICAL CULTURE AND SPORT

10. Digital Age

1990–2020 AD

Let's step into the digital age, when millions watched sports on screens. In the 2000/2001 season "Małysz-mania" broke out. Robert Korzeniowski won four Olympic gold medals in race walking. In 2009 Usain Bolt set the 100 m world record of 9.58 s. In 2014 Justyna Kowalczyk won Olympic gold in cross-country skiing, and Kamil Stoch won his three Olympic golds in ski jumping. Poland's volleyball players became world champions in 2014 and 2018. Anita Włodarczyk won three golds in the hammer throw. The Paralympic Games are competitions for athletes with disabilities. And the Russian doping scandal of 2015–2016 showed that cheating destroys fair competition. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 "Małysz-mania," when whole families cheered for ski jumping, broke out in the season...
 - a) 1980/1981
 - b) 2000/2001
 - c) 2010/2011
 - d) 1990/1991
2. 👁 In 2009, Usain Bolt set a 100 m world record of...
 - a) 12.5 s
 - b) 9.58 s
 - c) 8.1 s
 - d) 10.99 s
3. 🗨 In 2014, Justyna Kowalczyk won Olympic gold in...
 - a) snowboarding
 - b) cross-country skiing
 - c) figure skating
 - d) luge
4. 🏊 Robert Korzeniowski won four Olympic gold medals in...
 - a) fencing
 - b) race walking
 - c) swimming
 - d) boxing
5. 🏂 Kamil Stoch won three Olympic gold medals in...
 - a) speed skating
 - b) biathlon
 - c) bobsleigh
 - d) ski jumping
6. 🏐 The Polish men's volleyball team became world champions in...
 - a) 2014 and 2018
 - b) 2004
 - c) 2010
 - d) 1994
7. 💖 Anita Włodarczyk won three Olympic golds in...
 - a) swimming
 - b) the hammer throw
 - c) the high jump
 - d) cycling
8. 🌿 The Paralympic Games are a competition for...
 - a) veterans
 - b) children
 - c) athletes with disabilities
 - d) amateurs
9. ☆ The Russian doping scandal (2015–2016) showed that...
 - a) cheating destroys fair competition
 - b) doping is healthy
 - c) sport has no rules
 - d) everyone is guilty

MEDICINE

10. Digital Age

1990–2020 AD

Let's step into the digital age, when medicine reached for new tools. In 1999 Doctors Without Borders received the Nobel Peace Prize. Dr. Paul Farmer devoted his life to treating the poorest in Haiti and Rwanda. In 2006 Poland's first hand transplant was performed in Trzebnica. Biologic drugs are made from living cells, and electronic stethoscopes can amplify and record heart sounds. In 2015–2016 the Zika virus spread mainly through mosquitoes. The first image of the SARS-CoV-2 virus was taken with an electron microscope, and during the pandemic telemedicine – remote care via the internet – took off. Hospice care, meanwhile, focuses on relieving pain and giving care. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎧 **Electronic stethoscopes can...**
 - a) amplify and record heart sounds
 - b) play music
 - c) see bones
 - d) measure temperature
2. 👁 **The first image of the SARS-CoV-2 virus was taken with...**
 - a) a telescope
 - b) a magnifying glass
 - c) a phone camera
 - d) an electron microscope
3. 📞 **Telemedicine is...**
 - a) surgery on an airplane
 - b) remote care via the internet
 - c) drugs from a phone
 - d) medicine on television
4. ⚗ **Biologic drugs are produced from...**
 - a) living cells
 - b) plastic
 - c) salt
 - d) metals
5. 🇵🇱 **Poland's first hand transplant was performed in 2006 at a hospital in...**
 - a) Białystok
 - b) Gdańsk
 - c) Trzebnica
 - d) Lublin
6. 🌍 **Doctors Without Borders received the Nobel Peace Prize in...**
 - a) 2019
 - b) 1979
 - c) 1999
 - d) 1959
7. ❤ **Dr. Paul Farmer devoted his life to treating the poorest people in...**
 - a) Haiti and Rwanda
 - b) Norway
 - c) Monaco
 - d) Switzerland
8. 🌿 **The Zika virus epidemic (2015–2016) spread mainly through...**
 - a) the air
 - b) water
 - c) mosquitoes
 - d) food
9. ⭐ **Hospice care for the terminally ill focuses on...**
 - a) relieving pain and giving care
 - b) experiments
 - c) quick discharge
 - d) loneliness

ANSWERS

PHARMACY

10. Digital Age

1990–2020 AD

Let's step into the digital age and visit the pharmacy. Since the 1990s the USA has faced an opioid crisis – a wave of addiction to painkillers. In the 2000s cheap generic HIV drugs from India saved millions of lives in Africa. In 2015 Tu Youyou received the Nobel Prize for a malaria drug from sweet wormwood. Since 2020 Poland has used e-prescriptions. Paracetamol and ibuprofen are painkillers that reduce fever. A placebo is a substance with no therapeutic effect. Clinical trials run in phases to check a drug's safety and effectiveness. Automated machines in pharmacies can dispense drugs and package doses. And we store medicines as the leaflet says, away from children. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Electronic prescriptions (e-prescriptions) have been mandatory in Poland since...**
 - a) 2000
 - b) 2010
 - c) 2020
 - d) 1990
2. 👁 **Paracetamol and ibuprofen are...**
 - a) vitamins
 - b) vaccines
 - c) antibiotics
 - d) painkillers that reduce fever
3. 🗨 **The term "placebo" means...**
 - a) a new antibiotic
 - b) a vitamin
 - c) a type of plant
 - d) a substance with no therapeutic effect
4. ⚖ **Clinical trials of a drug are conducted in several phases in order to...**
 - a) change its color
 - b) advertise the drug
 - c) check its safety and effectiveness
 - d) make money and nothing else
5. ⚙ **Automated machines in hospitals and pharmacies can...**
 - a) treat patients
 - b) write prescriptions
 - c) dispense drugs and package doses
 - d) perform surgery
6. 🧑 **In the 2000s, cheap generic HIV drugs from India...**
 - a) were more expensive
 - b) did not work at all
 - c) were banned everywhere
 - d) saved millions of lives in Africa
7. ❤ **Medicines should be stored...**
 - a) always in the fridge
 - b) in direct sunlight
 - c) as the leaflet says, away from children
 - d) in your pocket
8. 🌿 **In 2015, Tu Youyou received the Nobel Prize for a malaria drug made from...**
 - a) willow bark
 - b) sweet wormwood
 - c) garlic
 - d) poppies
9. ⭐ **The opioid crisis in the USA (since the 1990s) is...**
 - a) a shortage of medicines
 - b) a wave of addiction to painkillers
 - c) an animal disease
 - d) a new vaccine

AGRICULTURE

10. Digital Age

1990–2020 AD

Let's step into the digital age and head out to a modern farm. Precision agriculture uses GPS, drones and sensors. Hydroponics means growing plants in nutrient-rich water, without soil. Farmers practice crop rotation – changing the crop in a field each year – and organic farming gives up synthetic fertilizers and pesticides. Bees are essential because they pollinate many crops. Some farmers play music to their cows, because calm cows give more milk. In 2008 a vault opened on Svalbard to store backup seeds from around the world. In 2015–2020 drought in Poland was caused partly by little snow and low rainfall. And worldwide about 1/3 of all food produced is wasted. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🚩 **Some farmers play classical music to cows because studies suggest that...**
 - a) music replaces feed
 - b) cows dance
 - c) calm cows give more milk
 - d) cows stop eating
2. 📡 **Precision agriculture uses...**
 - a) horses only
 - b) fortune-telling
 - c) GPS, drones and sensors
 - d) sickles
3. 📖 **Hydroponics means growing plants...**
 - a) in darkness
 - b) in nutrient-rich water, without soil
 - c) under snow
 - d) in the desert
4. 🐝 **Bees are essential for agriculture because they...**
 - a) give milk
 - b) pollinate many crops
 - c) scare off cows
 - d) plow fields
5. 🌱 **Farmers use crop rotation, which means...**
 - a) watering with milk
 - b) always planting the same crop
 - c) changing the crop in a field each year
 - d) sowing only at night
6. 🌍 **The Svalbard Global Seed Vault (2008) stores...**
 - a) ice for drinks
 - b) backup seeds from around the world
 - c) gold bars
 - d) documents
7. 💚 **Organic farming does without...**
 - a) sunlight
 - b) synthetic fertilizers and pesticides
 - c) soil
 - d) water
8. 🌿 **The agricultural drought in Poland in 2015–2020 was caused partly by...**
 - a) volcanoes
 - b) little snow and low rainfall
 - c) earthquakes
 - d) too much rain
9. ⭐ **Food waste is a problem because the world throws away about...**
 - a) half of its water
 - b) nothing
 - c) 1/3 of all food produced
 - d) 1% of food

1. c 2. c 3. b 4. b 5. c 6. b 7. b 8. b 9. c

ANSWERS

VETERINARY SCIENCE

10. Digital Age

1990–2020 AD

Let's step into the digital age, into the vet's office. A microchip implanted in dogs and cats helps find the animal's owner. Therapy dogs help children in therapy and learning to read. Rabies disappeared from many parts of Poland thanks to vaccine baits dropped for foxes. Bird flu, H5N1, was dangerous because it could spread from birds to humans. In 2014 African swine fever reached Poland. The "One Health" idea stresses that the health of people, animals, and the environment is interconnected. In zoos, vets examine large animals using special training crates and rewards. Bans on wild animals in circuses come from concern for their welfare. And a shelter dog needs time, care and exercise. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Therapy dogs help, among others, ...**
 - a) children in therapy and learning to read
 - b) people playing the piano
 - c) people driving cars
 - d) people cooking
2. 🐶 **A microchip implanted in dogs and cats makes it possible to...**
 - a) listen to music
 - b) open doors
 - c) find the animal's owner
 - d) track it from space
3. 🐷 **African swine fever (ASF) reached Poland in...**
 - a) 1984
 - b) 1994
 - c) 2014
 - d) 2004
4. 🦏 **Rabies has disappeared from many regions of Poland thanks to...**
 - a) rain
 - b) vaccine baits dropped for foxes
 - c) closing forests
 - d) hunting dogs
5. 🎧 **To examine large animals, zoo vets use...**
 - a) disco music
 - b) hypnosis
 - c) special training crates and rewards
 - d) the strength of many people
6. 🌐 **The "One Health" approach stresses that the health of people, animals and the environment...**
 - a) concerns only people
 - b) is interconnected
 - c) is unrelated
 - d) depends only on the weather
7. 💖 **When adopting a dog from a shelter, you must remember that the animal...**
 - a) will raise itself
 - b) is a toy
 - c) has no feelings
 - d) needs time, care and exercise
8. 🍃 **Bird flu (H5N1) was dangerous because it could...**
 - a) spread from birds to humans
 - b) make birds talk
 - c) change feather colors
 - d) turn birds into fish
9. ⭐ **Bans on using wild animals in circuses in many countries stem from...**
 - a) concern for their welfare
 - b) the cost of tickets
 - c) a lack of circuses
 - d) the animals leaving on their own

ANIMAL SCIENCE AND FISHERIES

10. Digital Age

1990–2020 AD

Let's step into the digital age, to the water and the farms. Farmed salmon in Norway is an example of large-scale aquaculture. The MSC label means fish come from sustainable fisheries. Cod in the Baltic became rare because it was overfished and lacks oxygen in the water. Aquarium fish respond to vibrations and sounds. Grey seals returned to the Polish coast thanks to protection of the species, and the lynx and beaver reintroduction program is about returning animals to the wild. Farm animal welfare means an animal has good conditions and does not suffer. Beekeepers harvest honey using a smoker and an extractor. And in 2013 the first hamburger made from lab-grown meat was presented. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🎵 **Fish in aquariums respond to...**
 - a) colors only
 - b) vibrations and sounds
 - c) music just like people
 - d) silence only
2. 🐟 **Farmed salmon in Norway is an example of...**
 - a) large-scale aquaculture
 - b) home breeding
 - c) wild fishing
 - d) rod fishing
3. 🏪 **The MSC label on fish means it comes from...**
 - a) an aquarium
 - b) banned fishing grounds
 - c) a toy store
 - d) sustainable fisheries
4. 🦈 **Cod has become rare in the Baltic because...**
 - a) only seals ate it
 - b) it was overfished and lacks oxygen
 - c) it emigrated
 - d) it froze
5. 🐝 **Beekeepers harvest honey from hives using...**
 - a) a net
 - b) a hammer
 - c) a smoker and an extractor
 - d) a fishing rod
6. 🦊 **The program to reintroduce the lynx and the beaver in Poland involves...**
 - a) breeding them in zoos
 - b) hunting them
 - c) selling them abroad
 - d) returning animals to the wild
7. ❤️ **Farm animal welfare means that the animal...**
 - a) lives in a cramped cage
 - b) is fattened quickly
 - c) never goes outside
 - d) has good conditions and does not suffer
8. 🌿 **Gray seals returned to the Polish coast thanks to...**
 - a) a swimming ban
 - b) feeding them bread
 - c) protection of the species
 - d) new ports
9. ⭐ **The first hamburger made of lab-grown meat was presented in...**
 - a) 2013
 - b) 1983
 - c) 2003
 - d) 1993

OTHER (NATURE)

10. Digital Age

1990–2020 AD

Let's step into the digital age, when we study nature with satellites and microphones. In 1992 Wanda Rutkiewicz, the first woman on K2, went missing on Kangchenjunga. In 2004 a hurricane that exposed the seabed led to the discovery of an underwater forest in the Gulf of Mexico. In 2010 Iceland's Eyjafjallajökull volcano paralyzed air traffic over Europe. In 2011 an earthquake in Japan shifted Earth's axis by over 10 cm. In 2018 Andrzej Bargiel became the first to ski down K2. Aleksander Doba crossed the Atlantic by kayak, three times. Satellite images show that glaciers are shrinking, and bioacoustics helps count the species in a forest. Even so, only part of the seabed has been mapped in detail. Remember these details – I'll ask you about them in a moment.

Read the story aloud. On the back: 9 questions – the answers are in the text.

Place: the field your pawn stands on – link it to the story, or use the app to hear that field's own story.

1. 🦋 **Recordings of natural sounds (bioacoustics) help scientists...**
 - a) catch fish
 - b) record thoughts
 - c) count the species in a forest
 - d) control the weather
2. 🛰 **Satellite images show that the world's glaciers are...**
 - a) shrinking
 - b) not changing
 - c) turning into sand
 - d) growing
3. 🗨 **In 2010, the Eyjafjallajökull volcano in Iceland...**
 - a) created a new island in the Baltic
 - b) flooded Poland
 - c) paralyzed air traffic over Europe
 - d) went extinct forever
4. 🌊 **The 2011 earthquake in Japan had a magnitude of 9 and...**
 - a) changed the color of the sky
 - b) stopped the Earth
 - c) caused snow
 - d) shifted Earth's axis by over 10 cm
5. ⚔ **Wanda Rutkiewicz, the first woman to climb K2, went missing in 1992 on...**
 - a) Kangchenjunga
 - b) Everest
 - c) Rysy
 - d) Mont Blanc
6. 🧑 **In 2018, Andrzej Bargiel became the first person to...**
 - a) ski down K2
 - b) climb Everest barefoot
 - c) climb Mont Blanc
 - d) fly over K2
7. 💖 **Aleksander Doba crossed the Atlantic...**
 - a) by plane
 - b) by submarine
 - c) by kayak, three times
 - d) by swimming
8. 🌿 **Mapping of the ocean floor is still going on – so far scientists have mapped in detail...**
 - a) only the Baltic seabed
 - b) the entire seabed
 - c) nothing at all
 - d) only part of the seabed
9. ☆ **The 2004 discovery of an underwater forest of 60,000-year-old trees in the Gulf of Mexico was made possible by...**
 - a) a hurricane that exposed the seabed
 - b) a satellite
 - c) a diver with a shovel
 - d) a volcanic eruption
